Taxes and Management Decisions MANZON, GIL
Spring 2021
This course provides students with a framework for tax planning. Specific applications of the framework integrate concepts from finance, economics, and accounting to help students develop a more complete understanding of the role of taxes in business strategy (e.g., tax planning for mergers, acquisitions, and divestitures; tax arbitrage strategies; taxation of competing legal entities; employee compensation; and others).

ACCT663401
Ethics and Professionalism in Accounting CURLEY, BRAD
Spring 2021
The professional role of the Certified Public Accountant is to protect the investing public, yet the CPA's profit is dependent on controlling costs and managing a portfolio of satisfied corporate clients. These realities lead to a conflict of interest that is at the heart of this course. This course will focus on the nature of professions and professionalism. Specific attention will be paid to the AICPA's code of ethics, economic and regulatory factors affecting the public accounting profession, and various aspects of the current accounting environment.

ACCT663501
Forensic Accounting MCCALL, MICHAEL P
Spring 2021
Forensic Accounting is a growing area of practice in which the knowledge, skills, and abilities of accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special

investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits--an extra quality control step in the auditing process that will help reduce financial statement fraud.

Dive, Dissect, and Decide with Big Business Data LO, KIN Y
Spring 2021
'Big data' has become a business buzzword, and in accounting and related fields there is an ever-growing demand for individuals who can dive into, dissect and drive decisions with data. This course draws on examples from both academic and practitioner research to introduce students to commonly used data analytics methods and processes in accounting settings. The course is designed with the following objectives in mind: (1) To develop students' ability to apply data analytics skills and research findings to evaluate business problems and solutions in accounting-related contexts. (2) To expose students to the process of extracting, processing, and analyzing accounting data. Students will learn how to perform data analytics using statistical software such as SAS and Python. Students will also acquire practical skills such as exposure to Structure Query Language (SQL) and learn to analyze structured and unstructured data. (3) To enhance students' ability to work in a group and to present findings either from their own research or from other people's work in front of colleagues from different disciplines.

Empirical Topics in Accounting III CARTER, MARY ELLEN; LEE, LIAN FEN
Spring 2021
The objective of this course is to provide students with a sound framework for understanding and assessing the quality of empirical archival research in accounting. The course has two objectives. Part of the course is aimed at facilitating a deeper understanding of the econometric issues facing empirical archival research. This part of the course will survey the common problems and potential solutions. The other part of the course will survey the empirical research on accounting and contracting. Topics will include the role of accounting information in evaluating managers and setting executive compensation, earnings management induced by the use of accounting in contracting, and the relation between accounting and corporate governance.

Business Analytics Courses: Summer 2020

OPER770001
Operations Management BEEBE, JONATHAN R
Summer 2020
Operations, like accounting, finance, and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.
Credits: 03
Room and Schedule: MAY 13 - JUN 23; **Satisfies Core Requirement:** None **Prerequisites:** OPER7703.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE

Managerial Statistics VANDERWERF, PIETER A
Summer 2020
This course teaches the tools and techniques of statistics most commonly used in business. The major topic areas include: populations, random variables, distributions, and sampling; parameter estimation; hypothesis testing; and simple and multiple regression. All topics are taught by application to actual business problems using original data. The course provides the tools students will need for their functional courses, such as finance and marketing, as well as for core courses in business analytics.

OPER770601
Data Analytics 1: Model Building VANDERWERF, PIETER A
Summer 2020
This course focuses on the use of quantitative methods to support managerial decisions. Fundamental to this type of decision analysis is a model, which is a

representation of reality. A child enjoys a model car or ▪ model train. An engineer uses a model of an airplane wing in ▪ wind tunnel. An architect uses a set of blueprints as a model to illustrate what is to be built. The National Weather Service uses computer models to predict the track of a hurricane. In this course we will see how mathematical models and modern spreadsheet software can be used to support managerial decision analysis. We will pay special attention to the assumptions and limitations of using mathematical models as part of the iterative process of making operational and strategic management decisions. Examples will be used to illustrate this process in real world situations.

OPER225501
Managing Projects COAKLEY, CHARLES E
Fall 2020
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.
Credits: 03
Room and Schedule: FULTON HALL 130,W 7-9 30; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None

OPER331001
Sports Analytics NEALE, JOHN J
Fall 2020
The focus of the course will be the development and use of quantitative analysis, particularly mathematical and statistical models, that are widely used to assist in decision making at all levels in the management of professional sports organizations. Concentration will be on player, team, and organizational performance in baseball, basketball, and football for the purpose of tactical and strategic decisions. If time permits, applications in other sports (e.g., golf) will be discussed, as well as collegiate baseball.
Credits: 03
Room and Schedule: FULTON HALL 150,W 4 30-6 50;
Satisfies Core Requirement: None
Prerequisites: OPER2235 AND OPER1135. Students taking this course should possess a passion for sports and numbers, working knowledge of basic probability and statistics, strong Excel skills. Students should have successfully completed OPER1135 or a similar statistics course.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

OPER337501
Operations Strategy and Consulting FIELD, JOY M
Fall 2020
This course examines concepts, principles, and techniques for formulating, implementing, and evaluating operations strategy. It links strategic and tactical operational decisions to creation of a competitive advantage. Topics include operations strategy content and process, service operations, capacity and facilities strategy, supply chain management, process design and technology choice, and quality and productivity improvement. Case studies are used to illustrate concepts covered in the course. In collaboration with a consulting firm, students also learn how to develop and deliver a consulting presentation. These skills are applied to a mock consulting project.
Credits: 03
Room and Schedule: FULTON HALL 220,W 1 30-3 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually

OPER660401
Management Science NEALE, JOHN J
Fall 2020
This course provides an overview of the concepts and methods of Management Science. Sometimes referred to as Prescriptive Analytics or Decision Analytics, management science is a subset of the larger field of Business Analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing.
Credits: 03
Room and Schedule: FULTON HALL 150,M 4 30-6 50;
Satisfies Core Requirement: None
Prerequisites: A previous course in statistics and probability and familiarity with Excel.

OPER660701
Machine Learning for Business Intelligence UNUVAR, MERVE
Fall 2020
Machine learning (ML) has been a popular topic for data scientists and analysts. The goal in ML is to learn from existing data and extract useful information such as patterns, behaviors and trends. We can then use this information to predict future activity. The ability of learning patterns from data and making accurate predictions on new instances makes ML a powerful tool for Business Intelligence since it helps us transform the raw data into better decisions. This course will not dive into the technical details of ML algorithms but rather focus on how to use these algorithms in Business Intelligence applications. We will study business applications including but not limited to customer segmentation, propensity, and churn.

OPER770001
Operations Management LIU, NAN
Fall 2020
Operations, like accounting, finance, and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.

OPER770601
Data Analytics 1: Model Building BEEBE, JONATHAN R
Fall 2020
This course focuses on the use of quantitative methods to support managerial decisions. Fundamental to this type of decision analysis is a model, which is a representation of reality. A child enjoys a model car or a model train. An engineer uses a model of an airplane wing in a wind tunnel. An architect uses a set of blueprints as a model to illustrate what is to be built. The National Weather Service uses computer models to predict the track of a hurricane. In this course we will see how mathematical models and modern spreadsheet software can be used to support managerial decision analysis. We will pay special attention to the assumptions and limitations of using mathematical models as part of the iterative process of making operational and strategic management decisions. Examples will be used to illustrate this process in real world situations.

The National Weather Service uses computer models to predict the track of a hurricane. In this course we will see how mathematical models and modern spreadsheet software can be used to support managerial decision analysis. We will pay special attention to the assumptions and limitations of using mathematical models as part of the iterative process of making operational and strategic management decisions. Examples will be used to illustrate this process in real world situations.

Business Analytics Courses: Spring 2021

BZAN102101
Operations Management ALEV, ISIL
Spring 2021
This course is an introduction to operations management. Operations, like accounting, finance, marketing, and human resources, is one of the primary functions of every organization.
Operations managers transform human, physical, and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm. A strong emphasis will be placed on the development and use of quantitative models to assist decision making.

Managing Projects COAKLEY, CHARLES E
Spring 2021
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

BZAN660401
Management Science NEALE, JOHN J
Spring 2021
This course provides an overview of the concepts and methods of Management Science. Sometimes referred to as Prescriptive Analytics or Decision Analytics, management science is a subset of the larger field of Business Analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing.
Credits: 03
Room and Schedule: FULTON 150,T 7-9 30;
Satisfies Core Requirement: None
Prerequisites: A previous course in statistics and probability and familiarity with Excel.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

BZAN660601
Forecasting Techniques TOMIC, ALEKSANDAR S
Spring 2021
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, and ARIMA modeling as well as combining models. PLEASE NOTE: This course is also offered as an online hybrid course with Fr. McGowan, OPER/MFIN6606.12, ECON2229.12. For his sections only: in addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on: Saturday morning February 22, and Saturday May 2. The midterm exam will also be held on campus on Monday evening March 16. Please see the course syllabus for additional details.

BZAN660612
Forecasting Techniques MC GOWAN, RICHARD
Spring 2021
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, and ARIMA modeling as well as combining models. PLEASE NOTE: This course is also offered as an online hybrid course with Fr. McGowan, OPER/MFIN6606.12, ECON2229.12. For his sections only: in addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on: Saturday morning February 22, and Saturday May 2. The midterm exam will also be held on campus on Monday evening March 16. Please see the course syllabus for additional details.

BZAN660701
Machine Learning for Business Intelligence VANDERWERF, PIETER A
Spring 2021
Machine learning (ML) has been a popular topic for data scientists and analysts. The goal in ML is to learn from existing data and extract useful information such as patterns, behaviors and trends. We can then use this information to predict future activity. The ability of learning patterns from data and making accurate predictions on new instances makes ML a powerful tool for Business Intelligence since it helps us transform the raw data into better decisions. This course will not dive into the technical details of ML algorithms but rather focus on how to use these algorithms in Business Intelligence applications. We will study business applications including but not limited to customer segmentation, propensity, and churn.

BZAN770001
Operations Management PARKER, DELVON B
Spring 2021
Operations, like accounting, finance, and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.
Credits: 03
Room and Schedule: FULTON HALL 415,TH 7-9 30; **Satisfies Core Requirement:** None **Prerequisites:** OPER7703.

Managerial Statistics VANDERWERF, PIETER A
Spring 2021
This course teaches the tools and techniques of statistics most commonly used in business. The major topic areas include: populations, random variables, distributions, and sampling; parameter estimation; hypothesis testing; and simple and multiple regression. All topics are taught by application to actual business problems using original data. The course provides the tools students will need for their functional courses, such as finance and marketing, as well as for core courses in business analytics.

BZAN770601
Data Analytics 1: Model Building VANDERWERF, PIETER A
Spring 2021
This course focuses on the use of quantitative methods to support managerial decisions. Fundamental to this type of decision analysis is a model, which is a representation of reality. A child enjoys a model car or a model train. An engineer uses a model of an airplane wing in a wind tunnel. An architect uses a set of blueprints as a model to illustrate what is to be built. The National Weather Service uses computer models to predict the track of a hurricane. In this course we will see how mathematical models and modern spreadsheet software can be used to support managerial decision analysis. We will pay special attention to the assumptions and limitations of using mathematical models as part of the iterative process of making operational and strategic management decisions. Examples will be used to illustrate this process in real world situations.

Law and Ethics POWERS, RICHARD E
Fall 2020
This course examines the legal and ethical challenges faced by business people in today's global society, focusing on the interplay of legal and ethical obligations in the business environment, the extent to which they overlap, and the application of moral principles in the absence of legal requirements. While laws provide some guidance on the right course of action, individuals are not strictly constrained by legal principles. The emphasis throughout this course is on assisting students to develop the decision-making skills necessary for their future roles as responsible managers and leaders.

Real Estate Fundamentals
CHAZEN, EDWARD
Fall 2020
This course serves as an introduction to the field of real estate. The course is structured around several themes that will seem more interconnected by the end of the course than at the start.
The course covers an overview of real estate and society; landlord-tenant relationship; numbers and capital in real estate; property development; market research and analysis; housing markets; environmental impact and sustainability; and risk management. The course uses various teaching and learning methods: class lectures; case study discussions; videos of interviews with experts and about illustrative projects; homework exercises and guest lectures.

BSLW118501
Topics: Law and Economics WESNER, THOMAS L
Fall 2020
Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

BSLW200001
The State of Affordable Housing in the States LEBLANC, DANIEL R
Fall 2020
How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

Real Estate and Urban Action
MCCULLAGH, NEIL P
Fall 2020
Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.

BSLW220701
Urban Design for Complexity and Sustainability LITTELL, MATTHEW
Fall 2020
The course explores the changing demands on urban environments in the twenty-first century and the newest policies, technologies, and design approaches that are being developed to address them. Topics will include analyses of the factors that shape the physical form of cities, including zoning and regulatory contexts, real estate development patterns, transportation infrastructure, environmental challenges, and aesthetics. The material will be introduced as case studies and surveys, with presentations by design professionals, city officials, and real estate developers. Students will gain literacy in zoning, real estate metrics, planning, and issues related to architectural design and large scale urban design. The semester will conclude with a final project synthesizing many of the topics covered.

Law for the Entrepreneur REDER, MARGO
Fall 2020
This course examines the legal issues and challenges created by the migration of business applications to the internet. The intersection of law, business, and technology is explored in depth in this course. Students learn some aspects of entrepreneurship with practical application to business transactions. This course covers business' digital assets, in the form of intellectual property--trademarks, copyrights, patents, and trade secrets. Other topics surveyed include: contracts, licensing agreements, jurisdiction, tax, financing start-ups, privacy, speech, defamation, content control, filtering, information security, and crime. The course introduces students to critical high-tech issues necessary for effective managers of e-commerce enterprises.

Real Estate Development CHAZEN, EDWARD
Spring 2021
This course is focused on what real estate development is and what it means to be a real estate developer. Students will gain an understanding of the process of real estate development, including design and construction; how developers engage with the public sector and the surrounding community to obtain approval for a development; how projects are financed; and, other important elements that contribute to completing successful real estate projects. Also learn about the legal aspects of developments; the ways that development is a catalyst for neighborhood improvement and local economic growth; and, trends in sustainable development.

Securities Regulation SPOONER, RACHEL S
Spring 2021
Securities Regulation is the study of how the government regulates financial markets and their participants, whether a start-up seeking capital through a Kickstarter campaign, a multi-national public company disclosing news to its shareholders, or an investment banker advising a company in its IPO. The course focuses upon the key federal statutes that regulate securities and participants in the securities markets: Securities Act of 1933, Securities Exchange Act of 1934, Sarbanes-Oxley, Dodd-Frank Act of 2010, Foreign Corrupt Practices Act, and several criminal statutes. The students learn the role of the Securities and Exchange Commission and how the SEC will impact securities markets and their participants. The course covers the multitude of methods for raising capital within the confines of the Securities Act and the J.O.B.S. Act. Students learn how executives of public companies, and their auditors, lawyers, and bankers, decide when and how to make disclosures about the company. The course also examines financial scams and fraud, considering the ethical boundaries of the complex, fast- paced financial world. The class hosts guests ranging from SEC enforcement attorneys, to in- house counsel at a large bank, to defense counsel with specialties in insider trading and white- collar crime, Foreign Corrupt Practices Act, and the Bernie Madoff case. The class is intended for students interested in careers in finance, audit, leadership in public companies, or law.

BSLW118501
Topics: Law and Economics WESNER, THOMAS L
Spring 2021
Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

Real Estate Field Projects CHAZEN, EDWARD
Spring 2021
This course is a complement to in-class learning and provides an experiential learning component to the real estate education at CSOM. The course consists of teams of 4-5 students each working on a field project for a real estate/developer investor, not-for-profit organization, or government agency. The field projects are "real world" real estate projects that involve extensive data collection/analysis, interviews with a range of experts and others that can influence the conclusions and recommendations of the team, and presentations to management of the sponsoring organization. The field projects typically include development proposals for a property; re-development plans for an existing property; and, real estate market research to assist an investor considering expansion into new geographic markets.

BSLW880301
Topics: Law for CPAs PAIGE, MICHAEL D
Spring 2021
The course focuses on the law of commercial transactions relevant to business professionals, especially accountants. It covers the common law of contracts and comprehensively reviews the Uniform Commercial Code, emphasizing the law of sales, commercial paper, and secured transactions. Agency and major forms of doing business such as partnerships, corporations, and limited liability companies, along with securities regulation are examined. The laws of property, bankruptcy, insurance, wills, trusts and estates, along with accountants' liability round out the course. Leading cases and major statutory laws pertaining to business regulation are discussed.

BCOM221001
The Business of Journalism DAHL, DAVID K
Spring 2021
This course will help students to become literate in the business of journalism and the changes underway in the profession. Discussing the history of mainstream news organizations and new business models brought by the digital revolution, we consider how questions of audience, revenue, and platform shape the rapidly changing news business. We live in an age of new money, new platforms, and new ways of telling stories, but also an age in which many journalism jobs have disappeared. The opportunities unleashed by these changes are helping to create the most exciting period ever for journalism. We need to know how and why these changes have occurred.

MFIN668001
Renewable Energy and Sustainable Investments ADAMSON, SEABRON C; RAIKAR, SANTOSH G
Summer 2020
In this course we will examine how large scale renewable energy projects actually get financed and built, using the structures of modern non-recourse project finance. We will examine the economics of large-scale green power production, and how it fits into the U.S. and global energy industries. Through a mixture of lectures and real-life examples students will get to see how renewable energy project finance works in actual deals that mix finance, public policy, legal, engineering, and environmental issues. The skills developed in analyzing non-recourse cash flow-based finance will be generally applicable to students interested not just in green energy, but also more widely in private equity and infrastructure investing. The course is designed to introduce students to the theory and practice of project finance in the energy and renewables sector, complementing academic finance theory with the practical aspects of financing capital intensive energy projects.

MFIN883501
Real Estate Finance CHAZEN, EDWARD
Summer 2020
Real Estate Finance is for graduate students to learn the ways that private and public capital sources are used to finance income-producing property. The class covers the following topics:
(1) basics of real estate financial analysis and financial statements; (2) how to value income property and terminology unique to real estate; (3) permanent loans; (4) construction loans; (5) equity financing and joint ventures; (6) distressed debt and equity, and workouts; (7) institutional real estate, private equity investing; (8) Real Estate Investment Trusts (REITs); (9) Commercial Mortgage-Backed securities (CMBS); (10) corporate sale-leaseback financing; (11) residential mortgage financing and the sub-prime mortgage crisis; (12) government role in real estate finance and tax credit financing. Teaching methods include lectures, illustrative case studies, Excel-based financial exercises and videos of interviews with industry experts and representative transactions. Grades consist of a midterm exam, one individual case study report, class participation, a team case study presentation, a team presentation of a REIT stock analysis, and a final project preparing an investment memorandum for debt or equity financing of an actual property.

MFIN886001
Derivatives and Risk Analytics MULLARKEY, COLM D
Summer 2020
This course is reserved for special topics, offering advanced course work in sub-fields of finance. This year, MFIN8860 is an introduction to derivative assets, financial engineering, and risk management. The course covers the pricing of futures and options contracts as well as securities that contain embedded options, risk management strategies using positions in derivative securities, static hedging, and dynamic hedging. Applications from commodity, equity, bond, and mortgage-backed markets are considered.
Credits: 03

MFIN886901
Fundamental Analysis ARGYROPLE, CHRISTOPHER
Summer 2020
This course will focus on cash-flow oriented models of the valuation of the firm. Wall Street-style analytical techniques will be utilized, including the production of quarterly earnings forecasts and the development of buy/sell/hold recommendations. Topics include enterprise value, free cash flow, economic value added, risk/reward analysis, and the art of the management interview. Due to the overlap of material, graduate students can only enroll in one of the following classes to count towards their Master's degree in the Carroll School: either MFIN8869 (Fundamental Analysis) or MFIN6665 (Applied Fundamental Analysis).
Credits: 03

MFIN887001
Data Analytics in Finance ZHANG, JUBAO
Summer 2020
Data Analytics in Finance focuses on critical skills in programming and computation/analysis of financial data, and more importantly, pragmatic applications in portfolio management and risk management. Theoretical concepts and background for these techniques will be introduced, and the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry (Python). The course will extensively focus on real-world applications of finance theory.

Corporate Financial Strategies HOTCHKISS, EDITH
Fall 2020
This course examines how corporate financial managers create value for stakeholders through a broad range of financial transactions. We will first take an in-depth look at corporate valuation methodologies from both a theoretical and applied perspective. Then, using a combination of case studies, class presentations, and assigned readings, we will focus on applications of these methods in the context of various types of corporate restructurings. Specific applications will include capital structure and financing decisions, M&A and other asset restructuring decisions, and more complex financial transactions including buyouts and distressed restructurings.

MFIN220701
Real Estate Finance CHAZEN, EDWARD
Fall 2020
This course focuses on debt and equity financing of income-producing real property, primarily in the U.S. market. The course will look at both the private debt and equity and public securities markets for real estate finance. Teaching methods include lectures, case study discussions, videos, select chapters in the text and relevant articles, practice exercises in Excel and guest speakers. The course considers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The course also covers the role of the public sector in using tax payer funds to advance public purposes by offering various kinds of subsidies to developers, and evaluating the relative success of such programs. The primary student goals and learning outcomes are to learn how the private and public securities capital markets provide funds to the real estate industry, understand risks unique to real estate and how to structure a financing of commercial real estate, the ability to discuss and present a professional financing request for real estate debt and equity, and appreciate the diverse ways financing can be used to positively influence community and neighborhood improvement.

Entrepreneurial Finance HESSION-KUNZ, ANDREW
Fall 2020
This course introduces undergraduate students to entrepreneurial finance with a focus on the strategic financing of rapidly growing ventures. Through a combination of readings, simulations, and analysis of current news and events, students will learn to

assess the value drivers of a firm, determine the capital needs and fundability of growth, assess and mitigate corporate risks, and study the strategy of potential exits. We will look at the most common vehicles for funding hyper-growth, including venture capital, angel funding, crowdfunding, and other alternatives.
We will study the cost of capital, including terms, for building a balance sheet for growth.

Financial Policy PETERS, HELEN F
Fall 2020
Topics treated intensively include the valuation of the firm, risk analysis in capital budgeting, capital structure theory and policy, and dividends. The second phase will deal almost exclusively with cases designed to provide an opportunity to (1) apply the principles covered during the first segment; (2) integrate the firm's financial decisions; (3) demonstrate the relationship between corporate finance and other subfields of finance; (4) introduce the notion of financial strategy; and (5) show the relationship between finance and other management functions.

Financial Policy PETERS, HELEN F
Fall 2020
Topics treated intensively include the valuation of the firm, risk analysis in capital budgeting, capital structure theory and policy, and dividends. The second phase will deal almost exclusively with cases designed to provide an opportunity to (1) apply the principles covered during the first segment; (2) integrate the firm's financial decisions; (3) demonstrate the relationship between corporate finance and other subfields of finance; (4) introduce the notion of financial strategy; and (5) show the relationship between finance and other management functions.

MFIN226001
Active Portfolio Management ZIEFF, WILLIAM E
Fall 2020
The course provides an introduction to portfolio management with focus on quantitative investment process and methods. The course balances theoretical foundations with practical applications. Primary topics include asset allocation, portfolio construction including optimization, risk modeling, and risk measurement and management. Instruction will combine lectures, case discussions, and workshops, providing opportunities for students to apply quantitative methods to real world problems in several of the explored areas. The course combines investment ideas with analytics, so prior study in any or all of the following areas will make the course more enjoyable: probability/statistics (e.g., normal distributions, regression analysis), linear algebra (e.g., matrix algebra), and introductory calculus (e.g., derivatives). In addition, workshops will include use of both Microsoft Excel and Python (e.g., Jupyter Notebooks). Basic competency in each is a minimum requirement, and of course, the greater your skills, the better.

MFIN660612
Forecasting Techniques MC GOWAN, RICHARD
Fall 2020
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, and ARIMA modeling as well as combining models. PLEASE NOTE: This course is also offered as an online hybrid course with Fr. McGowan, OPER/MFIN6606.12, ECON2229.12. For his sections only: in addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on: Saturday morning February 22, and Saturday May 2. The midterm exam will also be held on campus on Monday evening March 16. Please see the course syllabus for additional details.

MFIN664001
Finance Seminar: Simulation and Optimization in Finance HAIDAR, HAISSAM
Fall 2020
This course studies the theory and practice of financial simulation and optimization using quantitative techniques that enable finance professionals to make optimal decisions under uncertainty. While theoretical material and background for these techniques will be introduced, the focus is on their applications and hands-on implementation utilizing software packages and programing platforms that are widely used in the financial industry. Topics include simulation of important probability distributions, random walks, linear and nonlinear optimization, and backtesting. Lectures draw on examples such as asset allocation under different definitions of risk; portfolio risk management; modeling asset price dynamics; trading strategies; index tracking; derivative pricing, hedging, arbitrage; and capital budgeting under uncertainty and real options.

MFIN666501
Applied Fundamental Analysis NAVARATNAM, ARVIND
Fall 2020
The objective of the course is to provide hands-on experience in financial statement analysis in a real-world setting. Students will be exposed to general tools of financial analysis, theoretical concepts, and practical valuation issues. By the end of the course, students should develop a framework for evaluating an investment opportunity by using a firm's financial statements to draw an understanding of their performance and provide a basis for making reasonable valuation estimates, as well as have an understanding of the challenges investor face in determining the earnings power of a company. Due to the overlap of material, graduate students can only enroll in one of the following classes to count towards their Master's degree in the Carroll School: either MFIN8869 (Fundamental Analysis) or MFIN6665 (Applied Fundamental Analysis).

MFIN668001
Renewable Energy and Sustainable Investments ADAMSON, SEABRON C; RAIKAR, SANTOSH G
Fall 2020
In this course we will examine how large scale renewable energy projects actually get financed and built, using the structures of modern non-recourse project finance. We will examine the economics of large-scale green power production, and how it fits into the U.S. and global energy industries. Through a mixture of lectures and real-life examples students will get to see how renewable energy project finance works in actual deals that mix finance, public policy, legal, engineering, and environmental issues. The skills developed in analyzing non-recourse cash flow-based finance will be generally applicable to students interested not just in green energy, but also more widely in private equity and infrastructure investing. The course is designed to introduce students to the theory and practice of project finance in the energy and renewables sector, complementing academic finance theory with the practical aspects of financing capital intensive energy projects.

Real Estate Finance CHAZEN, EDWARD
Fall 2020
Real Estate Finance is for graduate students to learn the ways that private and public capital sources are used to finance income-producing property. The class covers the following topics:
(1) basics of real estate financial analysis and financial statements; (2) how to value income property and terminology unique to real estate; (3) permanent loans; (4) construction loans; (5) equity financing and joint ventures; (6) distressed debt and equity, and workouts; (7) institutional real estate, private equity investing; (8) Real Estate Investment Trusts (REITs); (9) Commercial Mortgage-Backed securities (CMBS); (10) corporate sale-leaseback financing; (11) residential mortgage financing and the sub-prime mortgage crisis; (12) government role in real estate finance and tax credit financing. Teaching methods include lectures, illustrative case studies, Excel-based financial exercises and videos of interviews with industry experts and representative transactions. Grades consist of a midterm exam, one individual case study report, class participation, a team case study presentation, a team presentation of a REIT stock analysis, and a final project preparing an investment memorandum for debt or equity financing of an actual property.
Credits: 03
Room and Schedule: HIGGINS HALL 310,W 4 30-6 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: Financial Management (either MFIN7704 or MFIN7722)--depending on the student's program.

MFIN886011
Derivatives and Risk Analytics MULLARKEY, COLM D
Fall 2020
This course is reserved for special topics, offering advanced course work in sub-fields of finance. This year, MFIN8860 is an introduction to derivative assets, financial engineering, and risk management. The course covers the pricing of futures and options contracts as well as securities that contain embedded options, risk management strategies using positions in derivative securities, static hedging, and

dynamic hedging. Applications from commodity, equity, bond, and mortgage-backed markets are considered.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** None **Prerequisites:** MFIN8801.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

MFIN886301
Ph.D. Seminar: Asset Pricing BALDUZZI, PIERLUIGI
Fall 2020
The course is intended to generate enthusiastic, high quality intellectual activity around the course material. Focuses on the development of skills that will help students become conversant enough with basic theory and the current literature on asset pricing that would permit them to read critically and analyze papers in this area, develop enough expertise in selected empirical methods in finance that they will be able to use these techniques in their research, and to find potential thesis topics.
Credits: 03
Room and Schedule: F 9-12 30;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: introductory doctoral-level course (or have equivalent knowledge).
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: This course is for second year Ph.D. students of finance.
Status: OPEN

MFIN887001
Data Analytics in Finance REUTER, JONATHAN M
Fall 2020
Data Analytics in Finance focuses on critical skills in programming and computation/analysis of financial data, and more importantly, pragmatic applications in portfolio management and risk management. Theoretical concepts and background for these techniques will be introduced, and the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry (Python). The course will extensively focus on real-world applications of finance theory.
Credits: 03

MFIN220701
Real Estate Finance CHAZEN, EDWARD
Spring 2021
This course focuses on debt and equity financing of income-producing real property, primarily in the U.S. market. The course will look at both the private debt and equity and public securities markets for real estate finance. Teaching methods include lectures, case study discussions, videos, select chapters in the text and relevant articles, practice exercises in Excel and guest speakers. The course considers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The course also

covers the role of the public sector in using tax payer funds to advance public purposes by offering various kinds of subsidies to developers, and evaluating the relative success of such programs. The primary student goals and learning outcomes are to learn how the private and public securities capital markets provide funds to the real estate industry, understand risks unique to real estate and how to structure a financing of commercial real estate, the ability to discuss and present a professional financing request for real estate debt and equity, and appreciate the diverse ways financing can be used to positively influence community and neighborhood improvement.

MFIN221001
Entrepreneurial Finance HESSION-KUNZ, ANDREW
Spring 2021
This course introduces undergraduate students to entrepreneurial finance with a focus on the strategic financing of rapidly growing ventures. Through a combination of readings, simulations, and analysis of current news and events, students will learn to assess the value drivers of a firm, determine the capital needs and fundability of growth, assess and mitigate corporate risks, and study the strategy of potential exits. We will look at the most common vehicles for funding hyper-growth, including venture capital, angel funding, crowdfunding, and other alternatives.
We will study the cost of capital, including terms, for building a balance sheet for growth.

MFIN226001
Active Portfolio Management ZIEFF, WILLIAM E
Spring 2021
The course provides an introduction to portfolio management with focus on quantitative investment process and methods. The course balances theoretical foundations with practical applications. Primary topics include asset allocation, portfolio construction including optimization, risk modeling, and risk measurement and management. Instruction will combine lectures, case discussions, and workshops, providing opportunities for students to apply quantitative methods to real world problems in several of the explored areas. The course combines investment ideas with analytics, so prior study in any or all of the following areas will make the course more enjoyable: probability/statistics (e.g., normal distributions, regression analysis), linear algebra (e.g., matrix algebra), and introductory calculus (e.g., derivatives). In addition, workshops will include use of both Microsoft Excel and Python (e.g., Jupyter Notebooks). Basic competency in each is a minimum requirement, and of course, the greater your skills, the better.
Credits: 03

Individual Directed Study SADKA, RONNIE
Spring 2021
This is an opportunity for students interested in independent study to engage in a one-to-one relationship with a faculty member of the Finance Department. This course is only available to students who have demonstrated (1) an extremely strong interest in a particular area of finance, and (2) a strong self-motivation and self-discipline in previous studies. Students are required to present their research results to a departmental faculty group towards the end of the semester. The permission of the department chairperson is to be obtained when the individual faculty member has agreed to direct the student's research project.

Equity Securities Analysis AZEVEDO DUARTE SILVA, ERNE
Spring 2021
The equities securities analysis and valuation course will teach a highly rigorous approach to equities securities analysis and valuation with a heavy emphasis on in-class discussion and case study analysis. Initially, the course will focus on financial theory that underpins equity security valuation, and then move on to understand how industry structure and a company's competitive advantage influences an investor's

decision making and valuation. Financial statement analysis, modeling, and different valuation techniques will be explored in detail.
Where appropriate, guest lecturers will be brought in to share their specific expertise and perspectives as an investor. By the end of the course, the goal will be to have every student be able to analyze a company as a potential investment and understand its valuation.

MFIN662501
Private Equity GASPERONI, JAMES H
Spring 2021
This course is the study of Private Equity as an asset class and its various components. Private Equity involves the investment of capital into companies and assets that are not publicly traded on stock exchanges. The objective of the course is to provide a basic understanding of the Private Equity ecosystem: private equity companies, underlying investments in companies (or assets) and the investors that provide financing for deals. A primary focus of the class will be traditional buyout investments: an area of the capital markets that is growing in both size and opportunity as well as increasing in interest from investors. In addition, the course will consider the similarities and differences between typical buyouts and other private equity styles.

Finance Seminar: Simulation and Optimization in Finance HAIDAR, HAISSAM
Spring 2021
This course studies the theory and practice of financial simulation and optimization using quantitative techniques that enable finance professionals to make optimal decisions under uncertainty. While theoretical material and background for these techniques will be introduced, the focus is on their applications and hands-on implementation utilizing software packages and programing platforms that are widely used in the financial industry. Topics include simulation of important probability distributions, random walks, linear and nonlinear optimization, and backtesting. Lectures draw on examples such as asset allocation under different definitions of risk; portfolio risk management; modeling asset price dynamics; trading strategies; index tracking; derivative pricing, hedging, arbitrage; and capital budgeting under uncertainty and real options.

Economics
ROMUALDO, DOMINGOS A
Spring 2021
The course is intended to introduce the students to basic economic concepts such as supply and demand, market equilibrium, efficiency, opportunity costs, sunk costs, different market structures, gross domestic product (GDP), money, inflation, unemployment, and monetary policy. The course will be divided into two parts: (1) Microeconomics where the focus is on individual economic agents. In this part consumer demand, firm supply, market structure, equilibrium, efficiency, opportunity costs, and sunk costs are covered. (2) Macroeconomics where the focus is the economy as a whole. In this part the topics are GDP, growth, money, inflation, and unemployment.

This course considers banks and other financial institutions as information and deal-making entities. This broad perspective is used to explain how and why changing information and contracting technologies are altering the structure of the financial services industry and financial regulation. Lectures explore the implications of these ongoing changes for the methods financial institution executives should use to measure and manage an institution's risk and return.

MFIN882501
AIM2: Applied Portfolio Management MARTENS, DAVID J
Spring 2021
Students in AIM2 will actively manage a million dollar portfolio for the University during the spring semester. Teams will implement strategies that they formulated during the fall semester. Students are expected to fundamentally analyze stocks, develop buy/sell recommendations, and monitor company news that may result in material changes to target prices. This hands-on learning builds competency in the areas of portfolio management, investment research, sales and marketing, back-office operations, portfolio accounting, custody platforms, trading, and settlement procedures.

MFIN884001
International Finance ALBUQUERQUE, RUI
Spring 2021
This course introduces students to identifying and managing currency risk by providing a description of the international financial markets, their products, and applications. The course presents an overview of international money markets, bond markets, the foreign exchange spot and forward markets, and foreign exchange derivative markets. The course sets to identify nominal international risk factors that firms might be exposed to and discusses several of the recent international banking and currency crises. Students are introduced to a variety of financial tools or derivative products that can be used to hedge part or all of the exposure to these risk factors; foreign currency futures, options, forward contracts, and swaps.

Data Analytics in Finance XU, RAN
Spring 2021
Data Analytics in Finance focuses on critical skills in programming and computation/analysis of financial data, and more importantly, pragmatic applications in portfolio management and risk management. Theoretical concepts and background for these techniques will be introduced, and the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry (Python). The course will extensively focus on real-world applications of finance theory.

Information Systems Courses: Summer 2020

ISYS216002
Intro to Programming using Swift for iOS App Development GALLAUGHER, JOHN M
Summer 2020
In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects.
This course can be used in place of ISYS 2157 Programming for Management for credit toward the Information Systems concentration.
Credits: 03

ISYS665001
FinTech Revolution: Disruptive Technologies, Blockchain, and Future of Finance KARPOVSKY, ANNA
Summer 2020
FinTech is the intersection of finance, technology, and regulation. The course aims to help students understand FinTech and recognize the challenges and opportunities the FinTech innovations pose. Students gain a basic understanding of the foundations and principles that enabled the rise of FinTech and examine cases for a more in-depth analysis of specific innovations such as blockchain and cryptocurrencies. The course advances students' knowledge of FinTech, much needed skill in the industry, and gives students insight into the applications, limitations, and risks of technological innovations in finance. The main goal of the course is to develop basic vocabulary and to understand the key technical terms related to FinTech technologies.

ISYS770001
Data Analytics 2: Management and Data Skills SPANG, JOHN J
Summer 2020
Information Technology (IT) systems permeate the strategy, structure, and operations of modern enterprises. IT has become a major generator of business value, especially for organizations that have the right set of resources and capabilities to exploit it. It is essential that managers become fluent with IT so that they can promote innovative strategic initiatives that are increasingly IT dependent. In this course, students will obtain a broad overview of IT fundamentals, key emerging technologies, and IT managerial frameworks. Students will develop their ability to identify new opportunities presented by IT. Section numbers 1 and 2 of this course (when offered) will be delivered on-campus and section numbers 11 and 12 (when offered) will be delivered online. Please see the link bit.ly/CSOM1 for details about the online sections.

Data Analytics 3: In Practice KARPOVSKY, ANNA
Summer 2020
Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to the R statistical computing software, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models.

Information Systems Courses: Fall 2020

ISYS102101
Digital Technologies: Strategy and Use LI, ZHUOXIN
Fall 2020
This class was formerly known as Computers in Management. Digital technologies play a vital and varying role in management. In this course we approach the subject in two ways. In one module students learn to use technology as a tool for problem solving by developing increasingly sophisticated models in Excel. The other module provides an introduction to management viewed through the lens of technology. Students examine the role of technology in promoting innovation and organizational competitiveness across a variety of functional areas of the firm (e.g., marketing, finance, operations).
Credits: 03
Room and Schedule: FULTON HALL 511,T TH 12*; **Satisfies Core Requirement:** None **Prerequisites:** None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: This course is required for all CSOM students and should be taken in their first year at BC.

ISYS226701
Technology and Culture GRIFFITH, WILLIAM
Fall 2020
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

ISYS317801
Design Thinking and Strategy DICKINSON, KRISTINE D
Fall 2020
"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

TechTrek East
KANE, GERALD C; DOYLE, JEREMIAH T
Fall 2020
The Shea Center presents TechTrek East, a 3-credit, field-study course combining class work with a weekend field study in New York City and several local Boston trips. During the trips students will meet with senior executives, entrepreneurs, and venture capitalists in technology industry firms. While focusing on the tech industry, TechTrek is designed to appeal to all majors. Course work and visits will have a managerial focus, highlighting executive, marketing, finance, operations, and R&D functions.

Managing Digital Innovation FICHMAN, ROBERT
Fall 2020
The steady march of Moore's Law has accelerated the introduction of new products, processes, and business models enabled by digital technology. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. This course will provide students with the concepts and frameworks they will need to: (1) understand the nature of digital innovations and the factors affecting their emergence and diffusion, (2) identify and evaluate digital innovation opportunities (and threats), (3) manage the digital innovation process in organizations, and (4) evaluate the effects of digital innovation on business and society.

ISYS334001
Data Analytics in Practice KOKKODIS, MARIOS
Fall 2020
Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data generated by modern information systems. Data analytics capitalizes on this data by processing, transforming it, and subsequently applying statistical and quantitative analysis and explanatory and predictive modeling. Managers can explore patterns, predict future trends, and develop proactive, knowledge-driven decisions that affect all parts of modern organizations.
This course will familiarize you with the capabilities and limitations of emerging analytics techniques, essential knowledge about data analytics programming and tools, and a core understanding required to be an intelligent manager and consumer of analytics. Upon completion of this course, you will be able to: perform basic data analytics tasks including: data profiling and feature engineering, data collection, transformation, and use of API, text transformation, data visualization, predictive modeling; understand biases in data and be a savvy consumer of analytics; justify decisions on the basis of analytics and identify opportunities; define problems that analytics can solve and provide data-driven solutions; use the ideas, concepts, and terminology of analytics appropriately to communicate with both business and data professionals. Course trailer:

ISYS335001
Analytics in Practice II KOKKODIS, MARIOS
Fall 2020
This course is a continuation of Data Analytics in Practice (ISYS334001). Having Python at its core, the course covers advanced data manipulation and modeling techniques, including random forest, gradient boosting, and deep and shallow neural networks. By using data from real business applications, students learn to use advanced modeling techniques that inform practical managerial decisions. This course meets twice a week in class. The class format includes (1) lectures that cover analytical methods and principles of good practices and (2) application of these methods to real data using Python. The goal of the course is for students to develop a deeper understanding of the nuances of analytical models and to get exposed to state-of-the-art, advanced algorithms that can inform managerial decisions.

ISYS336001
Machine Learning and Artificial Intelligence RANSBOTHAM, SAMUEL
Fall 2020
Machine Learning and Artificial Intelligence won't replace managers in the near term, but managers who use ML and AI will replace those who don't. Organizations now have too much data and not enough time for managers to consume in spreadsheets. Instead, the future of work involves managers working with machines to design algorithms that, for example, segment customers, forecast sales, schedule preventative maintenance, or predict markets. This course addresses both the technical and managerial aspects of these applications. Technically, the course applies a variety of classifiers, networks, and trees to machine learning contexts.
Students then evaluate and tune these models in supervised and unsupervised scenarios. Examples will use R; students need to have a basic understanding of

R. (However, students who know Python can use that instead.) Managerially, this course examines how organizations create value through AI applications.

Social Media, Emerging Technologies, and Digital Business SUTTON, LINDSAY A
Fall 2020
The past few years have witnessed the rapid rise of a number of new types of information technologies, such as social media, so-called "sharing economy" platforms, artificial intelligence, blockchain, internet of things, virtual and augmented reality, just to name a few. These new tools both present immense opportunities and pose considerable threats for businesses of all sizes and across industries. This course explores the impact that these tools are having on the competitive environment, as well as the characteristics that companies, leaders, and employees will need to possess in order to thrive in this new environment increasingly defined by digital tools. Additionally, this course both learns about and learns with these information technologies in novel ways.

ISYS662501
Geographic Information Systems for Planning and Decision-Making COHEN, WILL W
Fall 2020
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: (1) collecting and organizing data, (2) analyzing this data for appropriate patterns, and
(3) using software to represent data on maps to support decision making.

Special Topics: Cybersecurity Strategy and Management EVENCHIK, LEONARD N
Fall 2020
The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge.

ISYS665501
Business Applications of Blockchain and Cryptocurrency COLLEN, BENNETT I
Fall 2020
The objective of this course is to introduce the business of blockchain--a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course doesn't require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today.
Students who complete the course will understand blockchain and cryptocurrency's game- changing potential, be able to separate fact from hype, and be effective leaders in the space.

Data Analytics 2: Management and Data Skills EVENCHIK, LEONARD N
Fall 2020
Information Technology (IT) systems permeate the strategy, structure, and operations of modern enterprises. IT has become a major generator of business value, especially for organizations that have the right set of resources and capabilities to exploit it. It is essential that managers become fluent with IT so that they can promote innovative strategic initiatives that are increasingly IT dependent. In this course, students will obtain a broad overview of IT fundamentals, key emerging technologies, and IT managerial frameworks. Students will develop their ability to identify new opportunities presented by IT. Section numbers 1 and 2 of this course (when offered) will be delivered on-campus and section numbers 11 and 12 (when offered) will be delivered online. Please see the link bit.ly/CSOM1 for details about the online sections.

ISYS772001
Data Analytics 2: Management and Data Skills WYNER, GEORGE M
Fall 2020
Data has become an ever more powerful source of competitive advantage for modern enterprises. New technologies and business practices have led to an "orders of magnitude" change in the amount of data available for analysis, as well as to techniques, often referred to as analytics or business intelligence, which are now available to derive meaning from that data. It is essential that managers develop a deep understanding of how data can be structured,

captured, and queried in order to support operations, decision-making, and strategic insight. This course provides students with a deeper understanding of data by exploring the methods by which data is modeled, databases are designed, and data is queried from those databases, and by developing an understanding of how this capability can be integrated into an organization to obtain a competitive advantage. Topics include entity relationship diagramming, the relational database model, and in depth coverage of SQL, as well as a consideration of managerial best practice as exemplified in current business examples.
Credits: 02
Room and Schedule: CORE TIME; **Satisfies Core Requirement:** None **Prerequisites:** None

Information Systems Courses: Spring 2021

ISYS102101
Digital Technologies: Strategy and Use YE, XUAN
Spring 2021
This class was formerly known as Computers in Management. Digital technologies play a vital and varying role in management. In this course we approach the subject in two ways. In one module students learn to use technology as a tool for problem solving by developing increasingly sophisticated models in Excel. The other module provides an introduction to management viewed through the lens of technology. Students examine the role of technology in promoting innovation and organizational competitiveness across a variety of functional areas of the firm (e.g., marketing, finance, operations).

Digital Technologies: Strategy and Use None

Spring 2021
This class was formerly known as Computers in Management. Digital technologies play a vital and varying role in management. In this course we approach the subject in two ways. In one module students learn to use technology as a tool for problem solving by developing increasingly sophisticated models in Excel. The other module provides an introduction to management viewed through the lens of technology. Students examine the role of technology in promoting innovation and organizational competitiveness across a variety of functional areas of the firm (e.g., marketing, finance, operations).
Credits: 03
Room and Schedule: M W F 9 PM;ONLINE;SYNCHRONOUS;

ISYS216001
Intro to Programming using Swift for iOS App Development GALLAUGHER, JOHN M
Spring 2021
In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects.
This course can be used in place of ISYS 2157 Programming for Management for credit toward the Information Systems concentration.

ISYS225501
Managing Projects COAKLEY, CHARLES E
Spring 2021
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

Technology and Culture GRIFFITH, WILLIAM
Spring 2021
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

ISYS317801
Design Thinking and Strategy DICKINSON, KRISTINE D
Spring 2021
"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

TechTrek West--Undergraduate KANE, GERALD C; DOYLE, JEREMIAH T
Spring 2021
Enrollment is limited. Admission is competitive, and applications are available at www.bc.edu/techtrek. Interested students can contact the instructor for application details. TechTrek West is a 3 credit, field-study course combining class work and due to the COVID situation one hour Zoom meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. The class focuses on how to develop an entrepreneurial mindset, which is critical for numerous fields both in the wake of COVID and with the increasing digitalization of work and society. TechTrek is designed to appeal to all majors. The class will meet in a cohort model, with students attending in-person classes every other week and an average of 1-2 Zoom meetings each week outside of class time. Course work and visits will have an entrepreneurial focus, helping students identify and explore their own interests in relation to the increasing digitalization of the business environment. Applications are available at www.bc.edu/techtrek, and students will be admitted on a rolling basis during registration.

ISYS334001
Data Analytics in Practice TEODORESCU, MIKE
Spring 2021
Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data generated by modern information systems. Data analytics capitalizes on this data by processing, transforming it, and subsequently applying statistical and quantitative analysis and explanatory and predictive modeling. Managers can explore patterns, predict future trends, and develop proactive, knowledge-driven decisions that affect all parts of modern organizations.
This course will familiarize you with the capabilities and limitations of emerging analytics techniques, essential knowledge about data analytics programming and tools, and a core understanding required to be an intelligent manager and consumer of analytics. Upon completion of this course, you will be able to: perform basic data analytics tasks including: data profiling and feature engineering, data collection, transformation, and use of API, text transformation, data visualization, predictive modeling; understand biases in data and be a savvy consumer of analytics; justify decisions on the basis of analytics and identify opportunities; define problems that analytics can solve and provide data-driven solutions; use the ideas, concepts, and terminology of analytics appropriately to communicate with both business and data professionals. Systems Analysis and Design STERPE, PETER J
Spring 2021
The course studies information systems (IS) development including requirements, analysis, design, and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (ISYS3257/CSCI1157) must be completed prior to taking this course.

Social Media, Emerging Technologies, and Digital Business KANE, GERALD C
Spring 2021
The past few years have witnessed the rapid rise of a number of new types of information technologies, such as social media, so-called "sharing economy" platforms, artificial intelligence, blockchain, internet of things, virtual and augmented reality, just to name a few. These new tools both present immense opportunities and pose considerable threats for businesses of all sizes and across industries. This course explores the impact that these tools are having on the competitive environment, as well as the characteristics that companies, leaders, and employees will need to possess in order to thrive in this new environment increasingly defined by digital tools. Additionally, this course both learns about and learns with these information technologies in novel ways.

ISYS662501
Geographic Information Systems for Planning and Decision-Making COHEN, WILL W
Spring 2021
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: (1) collecting and organizing data, (2) analyzing this data for appropriate patterns, and
(3) using software to represent data on maps to support decision making.

Special Topics: Cybersecurity Strategy and Management EVENCHIK, LEONARD M
Spring 2021
The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects

at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge.

ISYS665501
Business Applications of Blockchain and Cryptocurrency COLLEN, BENNETT I
Spring 2021
The objective of this course is to introduce the business of blockchain--a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course doesn't require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today.
Students who complete the course will understand blockchain and cryptocurrency's game- changing potential, be able to separate fact from hype, and be effective leaders in the space.

ISYS770001
Data Analytics 2: Management and Data Skills EVENCHIK, LEONARD N
Spring 2021
Information Technology (IT) systems permeate the strategy, structure, and operations of modern enterprises. IT has become a major generator of business value, especially for organizations that have the right set of resources and capabilities to exploit it. It is essential that managers become fluent with IT so that they can promote innovative strategic initiatives that are increasingly IT dependent. In this course, students will obtain a broad overview of IT fundamentals, key emerging technologies, and IT managerial frameworks. Students will develop their ability to identify new opportunities presented by IT. Section numbers 1 and 2 of this course (when offered) will be delivered on-campus and section numbers 11 and 12 (when offered) will be delivered online. Please see the link bit.ly/CSOM1 for details about the online sections.

Data Analytics 2: Management and Data Skills
EVENCHIK, LEONARD N
Spring 2021
Information Technology (IT) systems permeate the strategy, structure, and operations of modern enterprises. IT has become a major generator of business value, especially for organizations that have the right set of resources and capabilities to exploit it. It is essential that managers become fluent with IT so that they can promote innovative strategic initiatives that are increasingly IT dependent. In this course, students will obtain a broad overview of IT fundamentals, key emerging technologies, and IT managerial frameworks. Students will develop their ability to identify new opportunities presented by IT. Section numbers 1 and 2 of this course (when offered) will be delivered on-campus and section numbers 11 and 12 (when offered) will be delivered online. Please see the link bit.ly/CSOM1 for details about the online sections.

Data Analytics 3: In Practice TEODORESCU, MIKE
Spring 2021
Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to the R statistical computing software, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models.

Digital Transformation KANE, GERALD C
Spring 2021
Many legacy organizations are seeking to modernize their digital infrastructure to adapt to an increasingly digital competitive environment. Yet, oftentimes the technology is only half the battle, and effective digital transformation requires fundamental changes to culture, organizational structure, leadership style, talent models, and the like. This course provides a conceptual managerial overview of key digital technologies in today's business environment (e.g. cloud computing, machine learning, blockchain, enterprise social media, cybersecurity) as well as the organizational changes necessary to take advantage of them. This class also makes use of many of these tools in the classroom to enable an innovative interactive educational experience that will give students hands-on experience working within a more digitally enabled environment.

Management and Organization Courses: Summer 2020

MGMT770901
Managing People and Organizations DANFORTH, STUART G
Summer 2020
This course focuses on the analysis and diagnosis of organizational problems. It attempts to enable students to apply these concepts to real organizational and managerial problems. It also provides opportunities for participation in ongoing work teams while learning about team effectiveness. Finally, students can examine their own behavior and beliefs about organizations to compare, contrast, and integrate them with the theories and observations of others.

Strategic Management LOWD, NANCY E
Summer 2020
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

MGMT771101
Managing Business in Society MORRIS, ROBERT J
Summer 2020
This course deals with the complexities of managing corporate sustainability and responsibility (new CSR) in today's dynamic and ever-more difficult world. Emphases include the integration of issues related to business in society, ethics, responsibility, accountability, transparency, governance, and ecological sustainability into corporate strategies and practices. We use a strategic management lens to learn the potential sources of strategic and competitive advantage that can derive from CSR, and explore some of the problems associated with poor responsibility practices.

Special Topics: Managing Across Cultures ARAOZ, ZAREEN K
Summer 2020
This highly interactive course is essential for future global leaders and those dealing with diverse cultures to develop critical cross-cultural insights and competencies. We will explore the changing global scenario, and see how complex current forces impact beliefs, interactions and communications in different cultures. We will experience differing approaches to management, and beliefs about successfully leading people and teams in various cultures. We will see how differing approaches to time, hierarchy, individualism, independence, supervision, respect, risk- taking, problem-solving, collaboration, and motivation) impact business interactions and outcomes in organizations. We will learn to lead, coach and collaborate more effectively across borders.

MGMT814301
Technological Innovation and Disruption MACDONALD, JOHN A
Summer 2020
To be competitive organizations need to drive innovation in their products and services. Organizations need to innovate rapidly and in some cases this involves reinventing the enterprise to compete in disruptive business environments. The course on Technological Innovation looks closely at the company value chain and where technology can be leveraged as a source of innovation. Company vision sets the context for the type of innovation necessary to achieve sustainable competitive growth. During the course we examine the process of building innovative capability across the company value chain, developing and implementing an innovation plan and creating the capacity for sustained innovation as a competitor or disruptor.

Management and Organization Courses: Fall 2020

MGMT102101
Organizational Behavior GRUBB, ANITZA R
Fall 2020
As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

MGMT211001
Human Resources Management GORDON, JUDITH R
Fall 2020
This course surveys the functions, processes, and techniques of human resource management. It examines human resource management from the perspective of human resources systems implemented by managers and human resources professionals. The development of programs to reduce turnover, forecast personnel needs, and create career tracks is critical to the success of companies competing in the international arena. Just as it would be unthinkable for a modern manager to be computer illiterate, it is extremely difficult for a manager to succeed without a solid background in human resources management.

Negotiation PRATT, MICHAEL G
Fall 2020
Negotiating is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

Leadership CLAIR, JUDITH
Fall 2020
In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

Social Impact and Entrepreneurship FRECHETTE, EDWARD K
Fall 2020
Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for- profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

Special Topics: International Management MARITAN, JAMES G
Fall 2020
The world has changed in fundamental ways over the last several decades, resulting in a more integrated, complex, and global economy. This has created new opportunities as well as new risks. How managers respond to changes in the global business environment have important implications to the firm's competitive position and overall survival. Historically it was primarily large firms that operated internationally; however, nowadays firms of all sizes are internationalizing. Thus, no matter what firm you work for or business you start after graduation, you will benefit from a strong understanding of the global business environment. We will explore a broad range of topics important to the success of businesses outside the firm's "home country," including cultural, social, political, and legal differences, international trade and investment policies, and international organizations. We will also look at issues surrounding international market entry options and competitive strategies. And finally, we will close with a review of the ways that business functions need to be adapted when operating across international markets. The course material will be presented via in-class learning, case discussion, and project work.

MGMT214301
Idea Work: Making Things That Matter ROUSE, ELIZABETH D
Fall 2020
Any change, innovation, or new thing begins with an idea. While one person might come up with an initial idea, the idea, and the thing it consequently turns into, has the potential to become better when built upon by other people. The purpose of this course is to learn how to effectively develop and work with ideas to innovate and enact change in the context of organizations and beyond. Building from research on organizational creativity, innovation, collaboration, and entrepreneurship, students will learn frameworks for understanding the influence of individuals, social processes, and context on creativity and innovation and apply these frameworks throughout the course. Students will practice the key skills of idea work--generating, connecting, communicating, evaluating, and reshaping ideas--so that they can make things that matter.

Entrepreneurial Management SHAW, DOUGLAS J
Fall 2020
Entrepreneurial opportunities often exist when industries are created or transformed by new technologies, new business models, or new product categories. This course introduces conceptual frameworks and tools that help students to identify, evaluate, launch, and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including: car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, and food services. This course requires strong qualitative and quantitative analysis skills. There are no official prerequisites. However, to evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements and cash flows.

Strategic Management SPINELLO, RICHARD
Fall 2020
This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Capstone: Leadership and Mindfulness WADDOCK, SANDRA A
Fall 2020
No matter what your major, you will participate in groups and organizations that will consistently ask or expect you to lead. The best leader is authentic, has integrity, is self- and other-aware, and acts with this awareness firmly in mind. Good leaders, that is, act mindfully with respect for the people and world around them. This course explores your development as a mindful focusing inward and outward, reflecting on where you have come from and where you are going, what type of world you want to live in, your relationships with others, and how you can be an effective leader.

Introduction to Strategic Management
SENGUL, METIN
Fall 2020
The course is designed to provide you with a general understanding of how firms formulate and implement strategies to create competitive advantage. Relying exclusively on the case method, it will expose you to some basic strategy concepts, which will lay the foundation for the strategic management core course that you will take later on. The cases chosen for this course will place you in a diversity of managerial situations--large multinational firms and small startups, manufacturing and service industries, growing and mature organizations, U.S. and non-U.S. settings. Discussion of these cases will enable you to learn different analytic techniques, and illustrate (1) the essence of strategy, (2) how to understand the external competitive environment, (3) ways to consider beyond the current business landscape, and (4) the role of top management in strategy implementation.

Management and Organization Courses: Spring 2021

MGMT102101
Organizational Behavior GRUBB, ANITZA R
Spring 2021
As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.
Credits: 03

Organizational Behavior RAMSDELL, KIMBERLY
Spring 2021
As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

MGMT211101
Ethical Leadership Skills NIELSEN, RICHARD P
Spring 2021
This course focuses on ethics leadership and engagement methods in different types of pre- modern, modern, and postmodern organizational and political-economic contexts. What are our visions of ethical leadership, relationships, and organization? What were we doing when we were at our best in leading meaningful and effective change and problem resolution in our relationships with family and friends and in our work and citizenship lives? What have been the individual, organizational, and environmental obstacles that made it difficult for us to lead meaningfully and effectively? What are different types of methods in trying to intervene and lead ethical change?

Negotiation NIELSEN, RICHARD P
Spring 2021
Negotiating is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

Leadership LEDUC, STEVEN M
Spring 2021
In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

Social Impact and Entrepreneurship FRECHETTE, EDWARD K
Spring 2021
Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for- profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

Idea Work: Making Things That Matter ROUSE, ELIZABETH D
Spring 2021
Any change, innovation, or new thing begins with an idea. While one person might come up with an initial idea, the idea, and the thing it consequently turns into, has the potential to become better when built upon by other people. The purpose of this course is to learn how to effectively develop and work with ideas to innovate and enact change in the context of organizations and beyond. Building from research on organizational creativity, innovation, collaboration, and entrepreneurship, students will learn frameworks for understanding the influence of individuals, social processes, and context on creativity and innovation and apply these frameworks throughout the course. Students will practice the key skills of idea work--generating, connecting, communicating, evaluating, and reshaping ideas--so that they can make things that matter.

Entrepreneurial Management SHAW, DOUGLAS J
Spring 2021
Entrepreneurial opportunities often exist when industries are created or transformed by new technologies, new business models, or new product categories. This course introduces conceptual frameworks and tools that help students to identify, evaluate, launch, and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including: car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, and food services. This course requires strong qualitative and quantitative analysis skills. There are no official prerequisites. However, to evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements and cash flows.

MGMT217501
Thinking Strategically Integrative Strategy Simulation MONTES, JUAN
Spring 2021
This course prepares students to make executive-level decisions by participating and competing in business simulation. The course utilizes a sophisticated, market-leading simulation platform calls "Global DNA" to create a realistic, hands-on learning experience. The course allows students to manage a company and see the results of specific functional and team decisions, integrating all management areas: marketing, organizational behavior, operations, accounting, and finance. The course is based around the concept of experiential learning, and student teams have a high degree of freedom to follow different strategies. The competitive nature of the simulation shows and compares the results of each company in every round, with a high level of detail (i.e., sales and production reports, financial information), teaching teams to effectively analyze quantitative business information. Students learn to think strategically by incorporating the potential scenarios of what other teams can do during the simulation in their own decisions.

Leadership and Corporate Accountability SPINELLO, RICHARD
Spring 2021
This course is designed to provide an overview of the economic, legal, and ethical responsibilities of companies and their leaders. Through a series of case studies, it will demonstrate the acute challenges of ensuring that a company's conduct conforms to those responsibilities. A major portion of the course will review the principal obligations of corporations to five primary stakeholder groups: investors and shareholders, customers, employees, suppliers, and the general public. Insider trading, fiduciary duties, disclosure of health risks, fairness in pricing, power asymmetries, affirmative action, international labor rights, market failures, privacy rights, environmental sustainability, and corporate citizenship represent some of the issues to be discussed in this segment of the course. A secondary theme is corporate governance. Several cases will explore the proper role of management, the Board of Directors, financial intermediaries, and external regulators.

MGMT226501
Globalization, Culture, and Ethics SPINELLO, RICHARD
Spring 2021
This course helps students learn how to manage responsibly across different countries and cultures. The spread of capitalism and expansion of markets around the globe provoke challenging questions about socially responsible management. Managers must decide whether strategies and ethical principles that make sense in one culture can be applied to others. Central to the course will be the difficult choice between adapting to prevailing cultural norms or initiating a cultural/moral transformation. The course considers a number of cases set in different cultural contexts. There are selected readings about the beliefs, ideals, and values at the core of these different cultures.

Strategic Management MONTES, JUAN
Spring 2021
This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Strategic Management POTTS, JEREMIAH M
Spring 2021
This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Managing People and Organizations DANFORTH, STUART G
Spring 2021

This course focuses on the analysis and diagnosis of organizational problems. It attempts to enable students to apply these concepts to real organizational and managerial problems. It also provides opportunities for participation in ongoing work teams while learning about team effectiveness. Finally, students can examine their own behavior and beliefs about organizations to compare, contrast, and integrate them with the theories and observations of others.

Strategic Management LOWD, NANCY E
Spring 2021
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

MGMT773001
Strategic Analysis YU, TIEYING
Spring 2021
This course introduces you to a set of analytical frameworks that enable you to explain performance differences among firms and that provide a structure for strategic decisions to enhance firms' future competitive positions. Building on the foundation laid by the Introduction to Strategic Management course that you took earlier, we will cover strategy both at the business level (introducing tools of industry analysis and competitive positioning) and at the corporate level (examining how decisions regarding corporate scope--horizontal, vertical, and global--create or destroy value in multibusiness firms). We will also study strategy implementation, focusing on the organizational structure, systems and processes that are put in place to manage the corporation. Throughout the course, our viewpoint will be that of the top management team who has responsibility for the long-term health of the entire organization.

MGMT776001
Thinking Strategically: A Global Integrative Simulation MONTES, JUAN
Spring 2021
This course is about the art of strategy. Courses like marketing, organizational behavior, operations, accounting, and finance help you understand the functional areas of management, but now (and before you finish your first-year MBA), you need to close the knowing and doing gap, and that is the role of the present course. We will use a simulation called Global DNA in which teams compete in planning and executing a multi-year, multinational business strategy in a highly competitive global market. The course utilizes a sophisticated, market-leading simulation platform to create a realistic, hands-on learning experience. Engaging with the complexities of the simulated international business environment will prompt discussions on decision making, team dynamics, strategic planning and tactical execution. Thinking strategically is what C-level managers need to understanding competitive contexts, and make decisions that take into account all the relations and variables inside and outside the organization. A simulation presents a unique opportunity to challenge your managerial and strategic skills, and additionally, it creates a virtual competitive context that is usually fun, demanding and complex. This course culminates with the Diane Weiss Competition in which student teams will compete in a final round of the simulation.

MGMT810901
Digital Strategy SUBRAMANIAM, MOHAN
Spring 2021
Digital technologies are revolutionizing traditional interdependencies among businesses. Managers have hence begun to recognize their business environments as digital ecosystems. But for firms accustomed to framing their business environments as industries, this is a significant shift in perspective, requiring an understanding of fresh strategic initiatives necessary to compete in the digital era. This course will elaborate on what is new and different about digital ecosystems for firm strategy. The course will offer frameworks that explain how digital ecosystems provide firms with new sources of value and new avenues for growth and highlight new strategic options for firms to compete in the new digital era.

Strategic HR
KIERNER, AGNIESZKA D
Spring 2021
Whether leading a start-up or a team in a large organization, after this course you will have the skills needed to effectively design and execute strategies to manage people in such a way that they support long term business goals and outcomes. The course will help you think systematically about critical aspects of managing human assets and provide practical examples on how these strategies need to be implemented to achieve competitive advantage. Through a mix of lecture, case study analysis, in-class simulation and discussion we will take a journey around key issues leaders need to tackle: data driven HR, recruiting and onboarding, talent management, dealing with high and low performers, benefits and compensation, managing in diverse and multicultural environments. The course will draw upon personal experiences of the instructor from leading technology start-ups, advising and driving chance in large organizations, as well recent literature on these topics.

MGMT812001
Leading Healthcare Organizations GIORDANO, KEVIN T
Spring 2021
This course introduces and examines the structure and function of the American healthcare system. Students will focus on key issues across the system by analyzing the organization, economics, and delivery of healthcare, as well as major stakeholders within the industry. By the end of the course students will: (1) Acquire a working knowledge of each of the major components that make up the American healthcare system, and the complex inter-relationships among them. (2) Practice a conceptual framework for understanding pertinent healthcare issues and their potential solutions moving forward.

Marketing Principles SAMARAS, XANTHE P
Summer 2020
Marketing is dynamic, changing, creative, challenging and plays a leading role in a firm's strategy and destiny. Intended for those planning a career in Marketing, or will do career activities requiring marketing--doing a business startup, designing new services, online/social media, retail. Marketing owns the customer relationship and defines market-driven strategy. You will learn three skill sets: Target Marketing Skills--segmenting and targeting within markets, Strategic Marketing Skills--positioning vis-a-vis competitors, and Marketing Management Skills--managing the design of products/services, pricing, message and media, distribution channels, and online search/social media.

Marketing Operations Management TEOPACO, JOHN L
Summer 2020
This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the

marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

Consumer Behavior HAGTVEDT, HENRIK
Fall 2020
This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning,

attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

MKTG311401
Pricing and Demand Analytics ENGEL, SAMUEL
Fall 2020
How do companies decide what prices to set for a COVID vaccine? A new model Tesla? Investment fees for a Fidelity mutual fund? A Disney+ subscription? A new financial planning service by Charles Schwab? A new Apple iPhone? Or the Amazon cloud? There are ethical questions about pricing, like Uber's surge prices that fluctuate with demand, or congestion pricing on highways or to enter cities. And there is puzzling pricing, like why Taylor Swift or Bruce Springsteen sell their concert tickets at lower prices even though Stub-Hub sells them for way more in the open market. Pricing is one of the most fascinating, and most important skills for anyone entering a management career--in finance, marketing, sales, accounting, retailing, e- commerce, or business analytics. In this course you will learn about value-based pricing based on the value customers perceive, the psychology of pricing ($9.99 versus $10), segmented pricing (for different segments in the marketplace), using cost accounting to estimate customer cost-to-serve and customer profitability, and how to set prices for really new products (like new innovations). In addition, you will learn demand analytics and dynamic pricing used by airlines, destination theme parks like Disney, and the digital economy. The instructor is a leader in pricing innovation for an aviation pricing consulting firm.

Services Marketing SAMARAS, XANTHE P
Fall 2020
The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial and professional services. Service providers include hotel, airline, theme park, car rental and retail personnel, customer service representatives, bankers, doctors, accountants, and lawyers.

Multichannel Retailing SEIDERS, KATHLEEN
Fall 2020
This class focuses on the necessary concepts and principles of retailing involved in making retail and wholesale decisions. The course looks at retailing from both a consumer perspective (e.g., why does a consumer shop a particular retail outlet?) and a business-to-business perspective (e.g., how does the retailer decide which supplier to use?). Additionally, the course examines the various methods of retailing (e.g., bricks and mortar, bricks and clicks) and how these methods have evolved and will evolve in the future.

Digital Marketing O'HERN, MATTHEW S
Fall 2020
In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a number of different aspects of digital marketing including content marketing, website optimization, social media marketing, paid search, and search engine optimization. Perhaps more importantly, this course will help you develop a strong understanding of the digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

Professional Selling and Sales Management BROWN, JASON T
Fall 2020
Two fundamentals of business: someone must get the goods and services out the door, and someone must get the cash to come in the door. Sales is the function that does the latter. It, and its management, will be covered in this course. We will study the art of persuasion, modern day Rhetoric in actual practice. The discipline will be addressed biologically. We will dissect real industry practitioners when they visit class, and actual sales calls in the field as a research paper. Upon course completion, students will have a complete understanding of both the selling and sales management process.

Sales Analytics LUO, SONGJUN
Fall 2020
Like most business decision-makers, sales leaders can no longer afford to make decisions relying on their experience and gut-feelings alone. Effective sales-related business decisions are increasingly made by utilizing the appropriate decision frameworks combining insights drawn from data with the sales leaders' experience. In a world where ever-growing volume of data is available, sales leaders need to know how to harness the power of data and analytics to optimize their sales force and to stay ahead. In this class, students will learn to leverage the power of analytics to solve critical sales-related business problems. Specifically, students will learn: (1) business problems faced by sales leaders in building and managing a sales force; (2) decision frameworks and analytical methodologies that are used in the areas of sales, strategy design, and sales force management; (3) skills for applying the appropriate approaches for solving given sales-related problems.

MKTG316501
Strategic Brand Management FISHER, JOHN H
Fall 2020
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision- making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

MKTG317701
Special Topics: Heritage Marketing HUDSON, BRADFORD T
Fall 2020
This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to develop a strategic position based on heritage, activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

Design Thinking and Strategy DICKINSON, KRISTINE D
Fall 2020
"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course

content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

Strategic Selling and Persuasion WESTMAN, JOHN C
Fall 2020
What does it take to be a highly successful professional salesperson? This course answers this question and guides the student to explore and understand successful sales behaviors. This course is practical, high energy, low-stress, collaborative, and uses real-world, real-time situations based on student interests and experiences. Students will develop their competence in professional selling theory and approaches, presentation skills, and sales techniques. Course topics include the selling process, the buying process, creating value in buyer-seller relationships, prospecting, sales call planning, communicating the message, negotiating for win- win solutions, closing the sale, as well as technologies that improve selling effectiveness.

Special Topics: Sports Marketing LEV, MARK T
Fall 2020
The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

Social Media, Emerging Technologies, and Digital Business SUTTON, LINDSAY A
Fall 2020
The past few years have witnessed the rapid rise of a number of new types of information technologies, such as social media, so-called "sharing economy" platforms, artificial intelligence, blockchain, internet of things, virtual and augmented reality, just to name a few. These new tools both present immense opportunities and pose considerable threats for businesses of all sizes and across industries. This course explores the impact that these tools are having on the competitive environment, as well as the characteristics that companies, leaders, and employees will need to possess in order to thrive in this new environment increasingly defined by digital tools. Additionally, this course both learns about and learns with these information technologies in novel ways.

MKTG800301
Product Planning and Strategy BRIGHT, JAMES P
Fall 2020
This course focuses on the challenge of creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company, or in starting their own business at some point. The course is built on the concept of learning by doing, as small student teams go through the full process of coming up with their own new product or service ideas, evaluating them, doing market research, and developing launch plans. We also assess a number of current new product ideas, analyze cases from a range of industries, and have one or two outside speakers. There is a heavy emphasis on discussion and practicality.

Consumer Behavior HAGTVEDT, HENRIK
Fall 2020
This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning, attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

Strategic Pricing Management SMITH, GERALD
Fall 2020
This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

MKTG802001
Sales Analytics ENGEL, SAMUEL
Fall 2020
Like most business decision-makers, sales leaders can no longer afford to make decisions relying on their experience and gut-feelings alone. Effective sales-related business decisions are increasingly made by utilizing the appropriate decision frameworks combining insights drawn from data with the sales leaders' experience. In a world where ever-growing volume of data is available, sales leaders need to know how to harness the power of data and analytics to optimize their sales force and to stay ahead. In this class, students will learn to leverage the power of analytics to solve critical sales-related business problems. Specifically, students will learn: (1) business problems faced by sales leaders in building and managing a sales force; (2) decision frameworks and analytical methodologies that are used in the areas of sales, strategy design, and sales force management; (3) skills for applying the appropriate approaches for solving given sales-related problems.

MKTG311401
Pricing and Demand Analytics ENGEL, SAMUEL
Spring 2021
How do companies decide what prices to set for a COVID vaccine? A new model Tesla? Investment fees for a Fidelity mutual fund? A Disney+ subscription? A new financial planning service by Charles Schwab? A new Apple iPhone? Or the Amazon cloud? There are ethical questions about pricing, like Uber's surge prices that fluctuate with demand, or congestion pricing on highways or to enter cities. And there is puzzling pricing, like why Taylor Swift or Bruce Springsteen sell their concert tickets at lower prices even though Stub-Hub sells them for way more in the open market. Pricing is one of the most fascinating, and most important skills for anyone entering a management career--in finance, marketing, sales, accounting, retailing, e- commerce, or business analytics. In this course you will learn about value-based pricing based on the value customers perceive, the psychology of pricing ($9.99 versus $10), segmented pricing (for different segments in the marketplace), using cost accounting to estimate customer cost-to-serve and customer profitability, and how to set prices for really new products (like new innovations). In addition, you will learn demand analytics and dynamic pricing used by airlines, destination theme parks like Disney, and the digital economy. The instructor is a leader in pricing innovation for an aviation pricing consulting firm.

Services Marketing SAMARAS, XANTHE P
Spring 2021
The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial and professional services. Service providers include hotel, airline, theme park, car rental and retail personnel, customer service representatives, bankers, doctors, accountants, and lawyers.

MKTG315301
Multichannel Retailing SEIDERS, KATHLEEN
Spring 2021
This class focuses on the necessary concepts and principles of retailing involved in making retail and wholesale decisions. The course looks at retailing from both a consumer perspective (e.g., why does a consumer shop a particular retail outlet?) and a business-to-business perspective (e.g., how does the retailer decide which supplier to use?). Additionally, the course examines the various methods of retailing (e.g., bricks and mortar, bricks and clicks) and how these methods have evolved and will evolve in the future.

Integrated Marketing Communications NENKOV, GERGANA Y
Spring 2021
This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P's) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

Digital Marketing O'HERN, MATTHEW S
Spring 2021
In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a number of different aspects of digital marketing including content marketing, website optimization, social media marketing, paid search, and search engine optimization. Perhaps more importantly, this course will help you develop a strong understanding of the digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

Strategic Brand Management FISHER, JOHN H
Spring 2021
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision- making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

MKTG317701
Special Topics: Heritage Marketing HUDSON, BRADFORD T
Spring 2021
This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to develop a strategic position based on heritage, activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

Design Thinking and Strategy DICKINSON, KRISTINE D
Spring 2021
"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

TechTrek West--Undergraduate KANE, GERALD C; DOYLE, JEREMIAH T
Spring 2021
Enrollment is limited. Admission is competitive, and applications are available at www.bc.edu/techtrek. Interested students can contact the instructor for application details. TechTrek West is a 3 credit, field-study course combining class work and due to the COVID situation one hour Zoom meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. The class focuses on how to develop an entrepreneurial mindset, which is critical for numerous fields both in the wake of COVID and with the increasing digitalization of work and society. TechTrek is designed to appeal to all majors. The class will meet in a cohort model, with students attending in-person classes every other week and an average of 1-2 Zoom meetings each week outside of class time. Course work and visits will have an entrepreneurial focus, helping students identify and explore their own interests in relation to the increasing digitalization of the business environment. Applications are available at www.bc.edu/techtrek, and students will be admitted on a rolling basis during registration.

New Media Industries MCNEALY, PAUL-JON
Spring 2021
This course is designed to introduce the changing business models of new media (video games, music, TV and film, and journalism) industries. This is achieved by examining in detail the technology enablers and disruptive forces in both the U.S. and around the world, consumer behaviors, as well as legal and regulatory concerns. A special emphasis will also be placed on media companies whose business models have been heavily influenced or altered by digital distribution. This class will be a combination of in-class and Zoom sessions during class time, and will have an emphasis on influential guest speakers from various industries.

MKTG800801
Integrated Marketing Communications NENKOV, GERGANA Y
Spring 2021
This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P's) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

Strategic Pricing Management SMITH, GERALD
Spring 2021
This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

MKTG801501
Strategic Brand Management FISHER, JOHN H
Spring 2021
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision- making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

MKTG801901
Entrepreneurial Marketing Strategy NEESON, JOHN J
Spring 2021
This course focuses on how to develop an integrated marketing plan for a new company. The class will teach techniques and skills for developing a marketing strategy for a startup, including prioritizing market segments, positioning and messaging approaches, sales model and capacity planning for marketing, and developing an integrated marketing model to help scale the new endeavor. Startups are unique, requiring an agile marketing approach, the ability to scale quickly, and the requirement to build a new category or quickly enter an existing one. Classes will incorporate a combination of lectures, projects, guest speakers, and the development of a marketing plan for a new or early stage startup.

PRTO330001
Senior Seminar in Business Ethics SMITH, MICHAEL J
Fall 2020
The purpose of this course is to provide Portico Teaching Assistants a greater depth of understanding of the philosophical issues covered in Portico, and to offer an introduction to the core pedagogical techniques involved in teaching applied ethics. Participating TA's will study the course material on a second-order level by considering the evolution of their understanding of the course material over their undergraduate career, and by exploring pedagogical best- practices to improve teaching outcomes. The structure of the course will thus run concurrently with that of Portico. While primarily directed towards enriching the experience of the TA's, the course will simultaneously aim to facilitate the goals of Portico itself by providing TA's with additional tools and resources for engaging with their students and creating a more cohesive and impactful classroom community.

Senior Seminar in Business Ethics EVANS, JEREMY A
Fall 2020
The purpose of this course is to provide Portico Teaching Assistants a greater depth of understanding of the philosophical issues covered in Portico, and to offer an introduction to the core pedagogical techniques involved in teaching applied ethics. Participating TA's will study the course material on a second-order level by considering the evolution of their understanding of the course material over their undergraduate career, and by exploring pedagogical best- practices to improve teaching outcomes. The structure of the course will thus run concurrently with that of Portico. While primarily directed towards enriching the experience of the TA's, the course will simultaneously aim to facilitate the goals of Portico itself by providing TA's with additional tools and resources for engaging with their students and creating a more cohesive and impactful classroom community.

The Good Life: Life, Money, and Generosity BAGNANI, ELIZABETH S
Fall 2020
This course is about becoming. It encourages students to reflect on the type of person they are becoming and the type of person they want to become. First part considers the question "what is a good life?" and revisits some themes from Portico. Students also reflect on their assumptions about and tensions around money. Second part narrows to consider some tools relating to budgeting and debt. Final part considers "what does it mean to be generous?" and questions that consider a life that includes both money and much more. In use: reflections, reading quizzes, interview, first-post-graduation-year budget, and final paper.
Credits: 03
Room and Schedule: GASSON HALL 302,T 3-5 30;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. Restricted to seniors in the Carroll School of Management.

PRTO240101
Free Markets, Faith, and the Common Good CIONI, JOSEPH R
Spring 2021
If sharing our gifts, pursuing justice, and acting on our concern for the poor and marginalized of society are core values of Jesuit-trained students, to what extent is free market capitalism a good "fit" for helping us meet those goals? In this course, we will explore several key moral and philosophical foundations of free market capitalism. These arguments will then be placed in dialogue with central insights contained in Catholic social teaching, especially the principles of human dignity, solidarity, the preferential option for the poor, and the common good.

Case Competition Cohort LA COMBE, AMY M
Fall 2020
This course is for Sophomore and Juniors in the Carroll School of Management who are interested in learning how to better prepare for strategy and ethics case competitions. The class will meet weekly for one hour with the objective to develop skills in the following areas: be able to effectively analyze an ethics case and a strategy case, determine feasible alternatives, craft a recommendation, implement recommendations, and prepare for judges' questions. The course will also help students with a PowerPoint presentation for case competitions and oral tips for such a competition. The 10-week course will end with an internal case competition where winning groups will be chosen to attend competitions and represent the Carroll School nationally in the spring and subsequent fall (juniors who are abroad in the spring will not be eligible to take the course).

Perspectives on Management CLAVIN, JOHN C; DOYLE, JEREMIAH T
Spring 2021
This course, taught by practitioners John Clavin (BC '84) and Jere Doyle (BC '87), provides BC students with an excellent opportunity to explore the functional disciplines of business from a real-world perspective. Using a combination of lectures, case studies, readings and outside speakers, the course provides students the opportunity to get grounded in each of the CSOM concentrations while gaining outside views on careers in related fields and industries. The course will also provide a framework to explore and discuss cross-functional issues that impact business strategy and execution. This is a highly interactive class that places a premium on both preparation and participation each week. The course is initially open to CSOM sophomores but normally has availability for juniors and seniors across all undergraduate majors

Connell School of Nursing

Nursing Courses: Summer 2020

NURS324401
Childbearing Nursing Theory SIMONELLI, MARY C
Summer 2020
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed.
Emphasis will be placed on AWHONN and ACOG standards of care.

Ecuador: Global Health Perspectives BYRNE, ROSEMARY F
Summer 2020
This course will involve the study of global health from the perspective of the various stakeholders: Populations, governments, Non-Government Organizations (NGOs), health care providers and health educators. Social, political, economic, legal and ethical perspectives will be addressed. This course will be offered in Quito, Ecuador and will include field trips to health care facilities and discussions with local health professionals on current health issues and challenges for the future. Using a case-based approach, students will analyze and develop potential solutions and options for addressing global health care issues and create strategies for improving the health of specific populations.

NURS535001
Global Healthcare: Meeting Challenges and Making Connections
SIMONELLI, MARY C
Summer 2020
This course brings together students and faculty from around the world to discuss and synthesize perspectives on global health, specifically the challenges and common connections experienced across patient centered care, health education, healthcare systems and policy development. The participants will develop a deeper understanding of the particular needs of diverse and underserved populations. Emphasis will be placed on social justice and health of individuals, families, and populations. Through the lens of public health, this course explores assessment of healthcare needs, assurance of a quality healthcare infrastructure, and development of healthcare policy.

NURS641101
Nursing Synthesis Practicum
MCNUTT-CLARKE, BETH; CULLINAN, DONNA L; MANSFIELD, KATHLEEN J
Summer 2020
This course provides nontraditional nursing students with an opportunity to synthesize, expand, and to refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience based in institutional and/or community settings, students will be able to focus on health care needs of specific client populations, study in-depth the interventions used to restore and/or optimize health, and utilize nursing research in practice.

NURS741701
Role of Advanced Practice Nurses O'REILLY-JACOB, MONICA K
Summer 2020
Dimensions of advanced practice nursing including its historical development; role theory and implementation; legal and regulatory factors, and role implementation across practice settings will be explored. A focus on organization behavior and systems leadership, excellence in care delivery, practice evidence and care outcomes, relationship-based practice, quality improvement models and patient safety initiatives will be stressed and linked to APN role. National initiatives including the IOM Report as well as financial, political, social, and economic factors that influence care will be studied along with strategies to influence health care delivery systems and innovative practice models.

NURS743001
Advanced Health Assessment Across the Life Span
HOWLETT, MARY SUSAN L; REPSHA, CHRISTINE L; PADOS, BRITT F
Summer 2020
Building on undergraduate course work and previous clinical experience, this course utilizes life span development and health risk appraisal frameworks as the basis for health assessment.
Students master health assessment skills for individuals within family, environmental, and cultural contexts. The course provides advanced practice nursing students with planned classroom and clinical laboratory experiences to refine health assessment skills and interviewing techniques. Health promotion, health maintenance, and epidemiological principles are emphasized in relationship to various practice populations.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;JUL 06 - AUG 14;
Satisfies Core Requirement: None **Prerequisites:** NURS7672 AND NURS7420. **Corequisites:** None
Cross-listed with: None **Frequency:** Annually **Student Level:** GRADUATE
Comments: This course is taken the semester prior to practicum entry.
Status: CLOSED

NURS749201
Basic Principles of Nurse Anesthesia Practice THOMAS, ALLAN C
Summer 2020
This course is an introduction to the clinical application of nurse anesthesia practice. An historical perspective of the nurse anesthetist role will be explored and current anesthesia practice and techniques will also be described. Students will be introduced to anesthesia delivery systems and to concepts of patient safety and advocacy. Specific local and national legal aspects of nurse anesthesia practice will be examined.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 18 - AUG 10;
Satisfies Core Requirement: None **Prerequisites:** NURS7491 AND NURS7490. **Corequisites:** NURS7493 AND NURS7494. **Cross-listed with:** None

NURS749301
Pharmacology of Anesthetics and Accessory Drugs EMERY, SUSAN A
Summer 2020
This course is a study of the pharmacologic theories as they relate to nurse anesthesia practice. The application of pharmacokinetic and pharmacodynamic principles as they relate to specific anesthetic and adjunct drugs used in anesthetic practice will be explored. Integration of theory into practice will be emphasized through the use of case studies. Ethical, legal and economic considerations of drug selection will also be discussed as the student learns to develop an anesthesia plan of care.

NURS749401
Physiologic Variables for Nurse Anesthesia II--Card EMERY, SUSAN A
Summer 2020
This course builds on basic concepts of the anatomy, physiology, and pathophysiology of the cardiovascular system and provides in-depth information about the

cardiovascular system and anesthesia. The impact of anesthesia on the structure and function of the heart as a pump as well as the characteristics of both systemic and pulmonary circulation will be explored.
Measures to evaluate cardiovascular function, including electrocardiography, cardiac output, blood volume and arterial and venous pressures, will be described using clinical examples.
Alterations in normal anatomy and physiology and implications for the anesthetic plan for both non-cardiac and cardiac surgery will be discussed.

NURS752001
Research Methods for Advanced Practice Nursing GOULD, KATHLEEN A; MARCHETTI, CAROL A
Summer 2020
The focus of this course is the formal process of acquiring and evaluating evidence that supports nursing practice. Quantitative and qualitative methods of inquiry are examined. Quality considerations of various research designs are explored. Levels of evidence are identified in relation to existing research outcomes. Evaluation of existing research outcomes as evidence to support clinical practice, demonstrate quality improvement (QI), and advance nursing knowledge is a major emphasis of the course.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 14 - JUN 25;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Biennially
Student Level: GRADUATE
Comments: Open to upper-division R.N. and B.S. nursing students, and non-matriculated nursing students.

NURS759501
Nurse Anesthesia III THOMAS, ALLAN C
Summer 2020
This course focuses on the delivery of anesthesia care within advanced nursing practice in a broad range of clinical situations for patients with multiple, complex health problems. Through the refinement of assessment and management skills, critical thinking is further developed. With supervision, students assume more overall responsibility for anesthetic management. Through seminar participation students explore the anesthetic management of diverse populations and specialty situations. Likewise, simulation is focused on the management of complex and specialty situations. Concurrent with this semester, students begin a student-directed review of didactic content in advance preparation for the National Certification Exam.

NURS800201
Direct Entry Adult Health I
HURLEY, DOREAN L; REPSHA, CHRISTINE L
Summer 2020
This course focuses on the nursing care of adults and older adults. Students are introduced to the roles and responsibilities of professional nursing. Relevant theories from nursing and other disciplines, research, and evidence-based guidelines related to the care of adults and older adults and families are examined. Person/family-centered approaches to promote, restore, and maintain health are emphasized. The biopsychosocial, cultural, legal, and ethical factors influencing the health and care of adults and older adults and their families are explored.
Laboratory instruction includes fundamental health assessment, physical examination, and basic clinical skills.

NURS871401
Nursing Ethics and Professional Responsibility in Advanced Practice GRACE, PAMELA J; UVEGES, MELISSA K
Summer 2020
The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

NURS971701
Methods of Advanced Scholarly Inquiry
REID PONTE, PATRICIA A; KELLY-WEEDER, SUSAN A
Summer 2020
This is the second of four courses to prepare DNP students to conduct an organization approved, scholarly inquiry project to improve health services and patient outcomes. Students critically evaluate the literature and related information to address a health care problem.
Scholarly inquiry approaches are presented to enable students to identify a problem, plan change to improve a process or outcome, or develop innovative solutions related to health care delivery. Upon course completion, there will be a faculty and organization approved DNP project charter, which includes the problem, processes, and expected outcomes.

NURS973101
Pharmacotherapeutics in Advanced Practice Nursing LAPIERRE, KELLIE L
Summer 2020
This course will provide the advanced practice nursing student with the fundamental pharmacologic principles necessary to support pharmacotherapeutic decision making in collaboration with patients across the lifespan. The interrelationship of physical, psychosocial, cultural, pharmacogenomic, economic, ethical, and legal factors will be

explored. The student will develop evidence-based, cost effective interventions to promote optimal person-centered drug therapy. Application of these principles to various real world clinical situations and individual responses will be emphasized.

NURS973201
Advanced Health/Physical Assessment across the Life Span LAPIERRE, KELLIE L
Summer 2020
This course uses a holistic approach and risk appraisal frameworks as a basis for health assessment across the lifespan. Building on knowledge of basic health assessment, the APRN student performs comprehensive health histories and physical and mental health examinations. Students will incorporate subjective and objective data to evaluate healthy individuals and those with acute and/or chronic disease. The course utilizes learning laboratory experiences, high-low fidelity simulation, and standardized patients to facilitate students' learning. Health promotion, health maintenance and harm reduction concepts are emphasized and applied, taking into consideration life circumstances and cultural, ethnic, and developmental variations.

Public Health in a Global Society FRANCKLE, REBECCA L; SABBATH, ERIKA L
Fall 2020
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An

inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

NURS208001
Pathophysiology HURLEY, DOREAN L
Fall 2020
Pathophysiology offers an integrated approach to human disease. The course builds on the underlying concepts of normal function as they apply to the basic processes of pathogenesis. Biological variations of age, gender, and cultural differences are integrated into the course content where applicable. Common acute and chronic health problems are introduced to explore the interrelatedness of a variety of stressors that affect physiological function.
Successful completion of Pathophysiology facilitates the student's transition into clinical nursing practice.

NURS212201
Nursing Assessment of Health Across the Life Span PARK, JINHEE; KATIGBAK, CARINA
Fall 2020
This course introduces the concepts of health, health promotion, and growth and development across the lifespan. The interactions of underlying mechanisms such as environment, culture, ethnicity, family, genetics, and gender that are foundational to the development and individual health will be explored. Theories and principles that address physical, cognitive, and psychosocial growth and development will guide understanding of the complex healthy human, from birth to geriatrics and death. Principles and theories of health promotion will be analyzed and applied from a nursing perspective to support the individual's desire to increase personal and/or family health potential and well-being.
Credits: 03
Room and Schedule: M W 2-3 20;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: NURS2070 min grade C-.

NURS317001
Principles of Evidence-Based Nursing
LEE, CHRISTOPHER S; HORRELL, LINDSEY N
Fall 2020
This course seeks to develop an applied understanding of evidence-based practice as it relates to the science of nursing. Through exploring components of the research process, an appreciation of the various types of evidence used by nurses and an understanding of the importance of evidenced-based research to improve clinical practice will be fostered. The ethical considerations related to evidence-based practice will be discussed. At the conclusion of the course, students are prepared to be to be critical consumers of research used in evidence-based practice.
Credits: 02

NURS324201
Adult Health Nursing Theory II
SLY, JACQUELINE R; REPSHA, CHRISTINE L
Fall 2020
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.
Credits: 03
Room and Schedule: MERKERT CENTER 127,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS2231 AND NURS2230 AND NURS2204.

NURS324401
Childbearing Nursing Theory CAPOTOSTO, MELISSA K
Fall 2020
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed.
Emphasis will be placed on AWHONN and ACOG standards of care.

Clinical Laboratory of Childbearing Theory CAPOTOSTO, MELISSA K
Fall 2020
Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities.
Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

NURS425201
Psychiatric Mental Health Nursing Theory DUNNE, JULIE P
Fall 2020
This course builds upon the standards of practice from APNA-ISPN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality,

and cognitive disorders is analyzed. Evidence- based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

NURS425301
Psychiatric Mental Health Nursing Clinical Laboratory DUNNE, JULIE P
Fall 2020
Therapeutic communication skills provide a foundation for implementing the nursing role based on the American Psychiatric Nurses Association standards of practice with psychiatric patients/clients in a variety of psychiatric treatment settings. In the clinical experience, students work collaboratively with multidisciplinary teams in applying evidenced-based practice based on current interdisciplinary research to the nursing process. In weekly supervision with clinical faculty, students are mentored to extend their skills in clinical reasoning to meet the psychological, social, cultural, biological, and spiritual needs of persons from varied backgrounds (economic, racial, ethnic, age, and gender) who are in treatment for mental illness.

NURS426001
Population Health Nursing Theory EDMONDS, JOYCE K
Fall 2020
This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

NURS426401
Actualizing the Role of Professional Nurse SIMONELLI, MARY C; MAHONEY, ELLEN K
Fall 2020
Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

NURS710101
Independent Study in Nursing LAPIERRE, KELLIE L
Fall 2020
Students with a special interest in nursing may pursue that interest under the direction of the faculty member. A written proposal for an independent study in nursing must be obtained, completed and returned to the Graduate Office. The student is required to submit written reports to the faculty member directing the study.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. Permission of instructor and the Graduate Office.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None

NURS741501
Conceptual Basis for Advanced Practice Nursing BOND, STEWART
Fall 2020
The focus of this course is the development of knowledge as the basis for advanced practice nursing. Philosophical, conceptual, and theoretical perspectives of leaders and scholars from nursing and related fields are surveyed and critiqued. Opportunities are provided to explore and evaluate key issues such as levels of theory development, the domain of clinical judgement, and language and information technology. Emphasis is on knowledge-based quality improvements within various systems and environments that affect health care. Theories and models related to organizational change and health policy are applied.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE

NURS741601
Ethical Issues in Advanced Practice Nursing UVEGES, MELISSA K
Fall 2020
The focus of this course is to explore the boundaries of Advanced Practice Nurses' (APNs) ethical responsibilities to individuals, groups, and society in an intra- and interdisciplinary, collaborative health care environment. The philosophical and theoretical foundations of ethical practice are critically examined for their ability to enhance decision-making that best serves the interests of current and future patients and meets societal needs. An emphasis is placed on developing the skills needed to address challenges and obstacles to ethical practice in advanced practice roles and settings. Strategies to influence health policy related to various specialty populations are explored.
Credits: 03
Room and Schedule: T 4 30-7 30;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

NURS743701
Advanced Practice Psychiatric Nursing Across the Life Span I MARCHETTI, CAROL A; PETRECA, VICTOR G
Fall 2020
In this combined didactic and clinical course, students learn to conduct mental health evaluations, to formulate psychiatric and nursing diagnoses, and to plan and implement short- term/initial treatment, case management, referral plans, and client services for adults, children, and families. Clinical placements (20 hours/week) are individualized to match students' interests in a variety of psychiatric-mental health (PMH) settings including mental health outpatient services and forensic practice settings. Faculty and agency preceptors assist students to develop essential evaluation and diagnostic skills and to provide individualized, culturally sensitive nursing care and clinical services to diverse client populations.
Credits: 06
Room and Schedule: CARNEY HALL 305,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7420 AND NURS7672 AND NURS7430.
Corequisites: NURS7438.
Cross-listed with: None **Frequency:** Annually **Student Level:** GRADUATE **Comments:** None

NURS743801
Advanced Practice Theories of Psychotherapy MARCHETTI, CAROL A
Fall 2020
This course is designed to explore major approaches to individual psychotherapy, such as Psychodynamic, Humanistic, Interpersonal, Behavioral, Cognitive, Dialectical Behavioral, Brief, and Multicultural. Commonalities and differences among the processes and techniques are discussed. Selected theorists and their approaches to psychotherapy will be examined as examples of major schools of thought concerning the nature of the psychotherapeutic relationship. Applications across the life span and among diverse populations are critically examined.
Credits: 03
Room and Schedule: CARNEY HALL 007,T 1-3 50; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE

NURS745001
Women and Children's Health Advanced Practice Theory ST PIERRE, SHERRI B
Fall 2020
This course focuses on theoretical knowledge for the indirect and direct roles of the advanced practice nurse in health care of women and children. Content will address use, analysis, and synthesis of theories and research with attention to the impact of culture, ethnicity, race, socioeconomic status, and family structures. Psychosocial influences on women's health, parenting, and child development are explored. Students will interpret the roles of the advanced practice nurse in MCH as these affect and are affected by health care and health care delivery systems at the national level.
Credits: 03
Room and Schedule: CARNEY HALL 009,T 1-3 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE

NURS745301
Women's Health Advanced Practice Nursing I HARRIS, ALLYSSA L; MURPHY-SWENSON, ERIN E
Fall 2020
This course is the first of two courses in the Advanced Practice in Women's Health series. The role of the advanced practice nurse with women across the life span is explored with a focus on wellness promotion and management of common alterations in the sexuality-reproductive pattern, with special concern for cultural, ethnic, and socioeconomic diversity. Theories and research from nursing and other disciplines are synthesized and evaluated through seminars, clinical conferences, clinical experiences (20 hours/week), and course assignments.
Credits: 06
Room and Schedule: CARNEY HALL 303,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7420 AND NURS7672 AND NURS7430.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

NURS745701
Pediatric Primary Care/Advanced Practice Nursing I WHITE, LAURA S; ST PIERRE, SHERRI B
Fall 2020
This clinical course is the first of two advanced practice specialty nursing courses for preparing pediatric nurse practitioners. This course focuses on health promotion and maintenance and prevention of illness and disability, as well as assessment, diagnosis, and management of common pediatric problems/illnesses. Anatomical, physiological, psychological, cognitive, socioeconomic, and cultural factors affecting a child's growth and development are analyzed. Parenting practices, family life styles, ethical issues, and environmental milieu are also explored. Students engage in precepted clinical practice (20 hours/week) where they apply their cognitive, affective, and psychomotor skills and are guided by critical thinking and clinical decision making.
Credits: 06
Room and Schedule: DEVLIN HALL 101,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7420 AND NURS7430 AND NURS7672.

NURS746201
Primary Care of Adults and Older Adults Theory I HOWARD, ELIZABETH P
Fall 2020
First AG health course focusing on primary care of adult and older adults, exploring advanced practice in context of nursing knowledge and concepts from other disciplines. Includes integration of concepts in health promotion, prevention, identification of risk factors that potentially threaten health of adults. Variables include health status, age, development, gender, ethnicity, socio-economics, and cultural characteristics associated with health behaviors across group settings are studied as they impact health and related behaviors. Emphasis on related concepts. Discussions integrate role of APN as leader in health care reform and articulation of nursing contributions to interdisciplinary adult and older health care outcomes.
Credits: 03
Room and Schedule: T 1-3 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: NURS7415 AND NURS7417. Or concurrently.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

NURS746301
Primary Care Adult and Older Adult/Advanced Practice Nursing I CONNOLLY, MAUREEN A; HOWARD, ELIZABETH P; FLANAGAN, JANE M
Fall 2020
This first course in the adult-gerontology health practicum series concentrates on the application of the clinical reasoning process used to assess, diagnose, and treat common primary care and chronic illness problems of the adult population throughout the lifespan. Emphasis is placed on the integration of epidemiologic, genetic, environmental, social-political, and cultural determinants that contribute to alterations in the health status of young, middle, and older adults. Health promotion, evidence-based practice, and holistic health strategies are integrated to promote the optimal level of being and functioning of adults across the life span.
Credits: 06
Room and Schedule: FULTON HALL 115,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7420 AND NURS7430 AND NURS7672.
Corequisites: None
Cross-listed with: None
Frequency: Annually **Student Level:** GRADUATE **Comments:** None

NURS747001
Community and Family Health Advanced Theory I DWYER, ANDREW A
Fall 2020
This course is the first of a series in theories, relevant to advanced practice nurses in Family and Community Health specialties. It focuses on concepts, theories, and research needed to thrive in the advanced practice role. Emphasis is on health promotion: helping individuals, families, and aggregates to attain optimum levels of wellness. Theories and related research from nursing and other disciplines are integrated, and innovative health promotion programs or practice models are showcased.
Credits: 03
Room and Schedule: CARNEY HALL 005,T 1-3 50; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

NURS747301
Primary Care of Families/Advanced Practice Nursing I
MARSHALL, ALISON O; CULLINAN, DONNA L; UNDERWOOD, PATRICIA
Fall 2020
This combined didactic and practicum course focuses on the assessment, diagnosis, and management of selected primary health care problems in individuals and families using critical thinking and diagnostic reasoning. Incorporation of health promotion, health maintenance, and delivery of care strategies as they relate to individuals and families are emphasized. Students practice 20 hours per week in a variety of clinical settings including health departments, health centers, homeless clinics, health maintenance organizations, private practices, and occupational health clinics.
Credits: 06
Room and Schedule: CARNEY HALL 005,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7430 AND NURS7420 AND NURS7672.

NURS759001
Physiologic Variables for Nurse Anesthesia III EMERY, SUSAN A
Fall 2020
This course builds upon the clinical physiology of the neurological, endocrine, and renal systems. The focus of discussion will be on the anatomy and physiology of the nervous system, including nerve action potential, neuromuscular transmission, the autonomic nervous system, neurotransmitters, and cerebral blood flow. Also, normal physiology of the endocrine and renal system will be studied, including the more commonly seen alterations in these systems.
Emphasis will be placed on the anesthetic implications of caring for patients with high risk conditions.
Credits: 03
Room and Schedule: CARNEY HALL 007,M 1-3 50;
Satisfies Core Requirement: None
Prerequisites: NURS7490 AND NURS7415 AND NURS7494.
Corequisites: NURS7591. **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE

Status: OPEN

NURS759101
Nurse Anesthesia I THOMAS, ALLAN C
Fall 2020
This course provides the opportunity for students to integrate theory into practice within the clinical setting. The focus is on the development of diagnostic, therapeutic, and ethical judgments for the patient undergoing surgery and anesthesia. During the first semester of clinical anesthesia practice the emphasis is on the development and implementation of a patient specific plan of anesthesia care for healthy patients undergoing minimally invasive surgical procedures. Synthesis of theoretical knowledge with clinical practice is enhanced by weekly seminars, case presentations, care plan exemplars, and high fidelity simulation.
Credits: 05
Room and Schedule: M 7 AM;CARNEY 007;CARNEY HALL 007,M 8;
Satisfies Core Requirement: None
Prerequisites: NURS7491 AND NURS7492 AND NURS7493 AND NURS7494 AND NURS7490 AND NURS7415.
Corequisites: NURS7590. **Cross-listed with:** None **Frequency:** Annually **Student Level:** GRADUATE **Comments:** None
Status: OPEN

NURS769101
Nurse Anesthesia IV EMERY, SUSAN A
Fall 2020
This course provides the opportunity for students to assume more responsibility for anesthetic management for routine anesthetics while also gaining appropriately supervised experience with complex and specialty cases. The student-directed review begun during the previous semester continues and students take responsibility for writing, implementing, and debriefing scenarios during the simulation experience.
Credits: 05
Room and Schedule: CARNEY HALL 306,M 9-11 50;CARNEY HALL 306,W 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7592 AND NURS7593 AND NURS7595.

NURS800301
Direct Entry Adult Health II
REPSHA, CHRISTINE L; BOND, STEWART
Fall 2020
This course focuses on the nursing care of adults and older adults experiencing complex health problems. Relevant theories from nursing and other disciplines, research, and evidence-based guidelines are applied. Person/family-centered approaches to promote, restore, and maintain health are emphasized. Students develop and revise plans of care considering biopsychosocial, cultural, legal, and ethical factors influencing the health and care of adults and older adults with complex health problems and their families. Students will examine the nurse's role in safety and quality improvement.
Credits: 03
Room and Schedule: CARNEY HALL 005,W 9-11 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: NURS8001 AND NURS8002.

NURS800401
Direct Entry Adult Health Nursing Clinical HURLEY, DOREAN L; MCNUTT-CLARKE, BETH
Fall 2020
This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for adults and older adults with acute and chronic conditions and their families. Students will learn and practice advanced psychomotor skills in simulated settings.
Through interprofessional collaboration, students implement evidence-based practice to provide high-quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision making to meet the biopsychosocial and cultural needs of adults and older adults from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care.
Credits: 03
Room and Schedule: TUES & THURS; **Satisfies Core Requirement:** None **Prerequisites:** NURS8001 AND NURS8002.
Corequisites: NURS8005 AND NURS8006 AND NURS8003.

NURS800501
Direct Entry Psychiatric Mental Health Nursing Theory DUNNE, JULIE P
Fall 2020
This course focuses on the nursing care of individuals across the lifespan with psychiatric illness and mental health needs. Relevant theories from nursing and other disciplines, research, and evidenced-based guidelines related to mental health are examined. Holistic, person/family- centered approaches to promote, restore, and maintain mental health and wellness are integrated. Psychopharmacology and psychosocial treatment modalities are emphasized to promote high quality, safe, cost-sensitive care. Biopsychosocial, cultural, legal, and ethical factors influencing mental health and wellness are explored.
Credits: 03
Room and Schedule: M 1-3 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

NURS871301
Healthcare Information Technology STETTHEIMER, TIMOTHY D
Fall 2020
This course explores the critical role of e-health and information systems in the planning, operation, and management of healthcare organizations. Students will learn how to assess and evaluate health information systems and business requirements in a variety of settings such as health systems, hospitals, and medical practices. Students will develop skills in healthcare technology implementation design that addresses such industry-specific requirements as translating HIPAA and other regulations into specific technology decisions while implementing medical systems (EMR, lab, clinical services, medical database providers, etc.). Students will also learn how to manage multi-institutional relationships as they are expressed in technology implementations, including the many vendor configurations but also cross-provider organization relationships. Specific topics include data and systems integrations, communications protocols, security standards, procurement, and authentication and authorization.

Nursing Leadership in Complex Health Care Settings REID PONTE, PATRICIA A
Fall 2020
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

Secondary Analysis of Health-Related Datasets QIU, MEI R
Fall 2020
In this course, students apply concepts from earlier methods and statistics courses to the secondary analysis of large datasets to answer health-related research questions of interest. Students may choose to work with one of the datasets available for use in the course or, with permission, work with a faculty member on one of his/her datasets. Students are expected to:
(1) delineate a research question; (2) select an appropriate dataset and analytic approach to answer the question; (3) execute the analysis; (4) discuss the strengths and limitations of the approach and the results; and (5) disseminate findings through publications or presentations.

NURS972001
Epidemiology ABUELEZAM, NADIA
Fall 2020
Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

NURS975101
Advanced Qualitative Research Methods QIU, MEI R
Fall 2020
Various qualitative approaches to research typically used in nursing and health science will be examined. Topics will include research paradigms, postpositivism, critical, constructivism, participatory, qualitative rigor, ethics, problem identification, research purpose and specific aims, literature review, sampling strategy and techniques, sample, multiple data collection techniques, data management, multiple strategies for data analysis, differentiating data vs. findings, constructing findings that are congruent with the research aims and specific qualitative approaches, and conclusion-drawing. The course will provide students with experience in conducting data analysis from several qualitative approaches, as well as presentation and critique of in-class and homework data analysis activities.
Credits: 03
Room and Schedule: W 4 30-7 40;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: Enrollment in Nursing Ph.D. Program OR permission of Teacher of Record (TOR); NURS9701; NURS9712; NURS9808; NURS9809; NURS9810 Permission of TOR is required for non
nursing students. **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually

NURS980601
Philosophical Inquiry for Knowledge Development in Nursing FLANAGAN, JANE M
Fall 2020
Movements in the history and philosophy of science are reviewed for appreciating nursing's epistemological development. Contemporary understandings of philosophy and philosophy of science and their influences on knowledge development and nursing are examined. A focus is on understanding the relationship of the epistemological foundations of nursing to those of the health and social sciences. The course aims to develop scholars who can critically evaluate scientific initiatives and their relevance for nursing practice and emerging societal needs.
Emphasis is on integrating knowledge of movements in philosophy of science and nursing epistemology with themes developed in Strategies for Knowledge Development in Nursing.
Credits: 03
Room and Schedule: T 9-11 50;ONLINE;SYNCHRONOUS;

NURS980701
Strategies for Knowledge Development in Nursing LYONS, KAREN S
Fall 2020
In conjunction with Philosophical Inquiry for Knowledge Development in Nursing, this course provides an in-depth exploration of theory and knowledge development for nursing purposes and interdisciplinary collaborations. Students will gain an understanding of the various ways by which important disciplinary questions arise, are formulated, and pursued. Select theoretical frameworks and concepts are critiqued for their clarity, logic and utility for disciplinary knowledge development. A particular focus is placed on application to the student's area of interest and in formulating salient, researchable questions.
Credits: 03
Room and Schedule: M 9-11 50;ONLINE;SYNCHRONOUS;

NURS980801
Research Design and Methods I WOOD, LISA J
Fall 2020
This course provides an overview of scientific approaches relevant to nursing and health care research. Current epistemological and qualitative, quantitative and mixed methods approaches are discussed. The application of both classic and emerging quantitative, qualitative, and mixed methods research approaches for answering questions and generating knowledge relevant to the discipline and practice of nursing are explored. Strengths and limitations of research approaches are examined.

NURS981401
Bridge to Primary Care Advanced Practice Nursing LAPIERRE, KELLIE L
Fall 2020
This is the first in a series of clinical reasoning and decision-making courses required for all primary care DNP students. Building on the skills acquired in Advanced Health/Physical Assessment across the Lifespan, the course will focus on communication and clinical decision- making for DNP students. Specific consideration will be given to wellness and health promotion across the lifespan, screening procedures, ordering and interpretation of diagnostic tests, health behavior change interventions, as well as problems frequently encountered in primary care. The combination of didactic, clinical, and simulated learning experiences will prepare the student for subsequent specialty clinical course work and experiences.
Credits: 03
Room and Schedule: CARNEY HALL 005,TH 9-11 50;
Satisfies Core Requirement: None
Prerequisites: Advanced Health/Physical Assessment Across the Lifespan, Pharmacotherapeutics in Advanced Practice Nursing, Advanced Physiology and Pathophysiology across the Lifespan.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** GRADUATE **Comments:** None

NURS981501
Advanced Practice Nursing Role DWYER, ANDREW A
Fall 2020
This course prepares students to transition into an advanced practice nursing role. Historical and contemporary influences leading to the development of this professional role are explored, along with anticipated future dimensions. The impact of the advanced practice nurse on patient, family, and population outcomes will be examined. The course incorporates discussions of relationship-based care, role implementation across practice settings, and advanced practice nursing competencies. It also provides a synthesis of legal, regulatory and scope of practice considerations. The course facilitates a comprehensive understanding of political, economic, social and professional issues relevant to advanced practice nursing.

Pediatric Primary Care Advanced Practice Nursing I WHITE, LAURA S; ST PIERRE, SHERRI B
Fall 2020
The first of three in the Pediatric Primary Care Advanced Practice Nursing series, this course focuses on promoting optimal physical, mental, and social health of pediatric populations through evidence-based, ethical, and reflective practice, leadership, and advocacy. Emphasis is placed on utilizing child/family-centered theoretical, evidence-based, cost-effective clinical approaches to the promotion of health, growth and development, and common pediatric primary care problems. Assessment, diagnosis, and management of common pediatric primary health concerns are addressed within the context of biopsychosocial, developmental, cognitive, socioeconomic, and cultural factors.

NURS983701
Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan I MARCHETTI, CAROL A; PETRECA, VICTOR G
Fall 2020
The first of three in the Psychiatric-Mental Health Advanced Practice Nursing series, this course focuses on promoting optimal mental health treatment for populations in diverse settings through practice, leadership, and advocacy that is evidence-based, reflective, and ethical.
Students examine neurobiological, psychosocial, developmental, and nursing frameworks to conduct mental health evaluations and risk assessments; formulate diagnoses; and implement evidence-based, patient-centered care across the lifespan. Societal influences on mental health, such as race, ethnicity, gender, poverty and violence are explored; and factors related to mental health promotion and treatment are identified.

Nursing Courses: Spring 2021

NURS121001
Public Health in a Global Society EDMONDS, JOYCE K; FRANCKLE, REBECCA L
Spring 2021
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

NURS207001
Introduction to Professional Nursing
HURLEY, DOREAN L; GENNARO, SUSAN; PADOS, BRITT F
Spring 2021
This course provides an introduction to professional nursing, exploring nursing's history and the development of nursing knowledge grounded in theory and evidenced-based practice. The course places the study of socially just nursing practice within the tradition of liberal arts education. Engaging in critical self-reflection, students apply new value-based self-awareness to culturally congruent nursing care. Ethical reasoning processes are applied, utilizing clinical and population-based case studies. Therapeutic communication with individuals across the lifespan is introduced. Nursing education, practice, and professional careers as well as the influence of current health care environmental factors on health and evidenced-based nursing practice are discussed.

NURS209001
Sophomore Formation Seminar SIMONELLI, MARY C
Spring 2021
This course is required for sophomore undergraduate nursing students and will involve guided review and reflection to reinforce the inherent professional values of altruism, human dignity, integrity, and social justice fundamental to the discipline of nursing. Activities in the weekend long retreat will be guided by the Ignatian formation principles and student's values and beliefs as they relate to professional practice, development as individuals and as members of caregiving teams. The goal is to build a foundation for professional leadership as nursing students become aspiring members of the nursing profession and productive and committed citizens of society at large.

NURS223001
Adult Health Nursing Theory I
BARONE, STACEY H; BOND, STEWART; REPSHA, CHRISTINE L
Spring 2021
This course focuses on the theoretical basis of the nursing care of adults across the life span with altered states of health. Emphasis is placed on beginning application of the clinical reasoning process with a focus on frequently occurring nursing diagnoses, interventions, and outcomes for adults, in particular older adults. Evidence-based practice and standards of care are integrated throughout the course. The role and responsibilities of the nurse in the acute care setting including those related to quality, safety, ethics, and legal issues are emphasized. Cultural awareness is incorporated throughout the course.
Credits: 03
Room and Schedule: YAWKEY ATHLETIC CENTER 426,T 8 30-11 30;
Satisfies Core Requirement: None
Prerequisites: NURS2080 AND NURS2121 AND NURS2070 AND NURS2120.
Corequisites: NURS2231. **Cross-listed with:** None **Frequency:** Annually

NURS301601
Comparing Health Care Systems through a Global Lens SIMONELLI, MARY C
Spring 2021
Introduction to the concepts of global health and the critical links between public health and social and economic development. Determinants of health and patterns of disease and health outcomes across the globe are critically examined. The course reviews the determinants of health status in terms of biology, demography, epidemiology, culture, sociology, economics, and politics. Key concerns regarding reproductive health, child survival, nutrition, communicable diseases, and chronic diseases are examined. Health care delivery in developed vs. undeveloped regions of the world is emphasized.

NURS317001

Principles of Evidence-Based Nursing PARK, JINHEE
Spring 2021
This course seeks to develop an applied understanding of evidence-based practice as it relates to the science of nursing. Through exploring components of the research process, an appreciation of the various types of evidence used by nurses and an understanding of the importance of evidenced-based research to improve clinical practice will be fostered. The ethical considerations related to evidence-based practice will be discussed. At the conclusion of the course, students are prepared to be to be critical consumers of research used in evidence-based practice.
Credits: 02

NURS321001
Contemporary Issues in Public Health HAWKINS, SUMMER S
Spring 2021
This course provides students the opportunity to apply the foundational skills of public health to contemporary public health issues. The course integrates data and research to begin a more in- depth examination of the major burdens of disease and several emerging areas of concern.
With a consistent goal of reducing health disparities, the course identifies population-level risk factors as well as evidence-based interventions for health promotion and disease prevention. Principles and concepts learned in 'Public Health in a Global Society' are reinforced through specific health conditions, behaviors, and topics.
Credits: 03

NURS324201
Adult Health Nursing Theory II ASHLEY, JANE; BARONE, STACEY H
Spring 2021
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.
Credits: 03
Room and Schedule: CARNEY 202,W 1-3 50;
Satisfies Core Requirement: None
Prerequisites: NURS2231 AND NURS2230 AND NURS2204.
Corequisites: NURS3243. **Cross-listed with:** None **Frequency:** Annually

NURS324301
Adult Health Nursing II Clinical Laboratory BARONE, STACEY H; ASHLEY, JANE
Spring 2021
This course provides clinical experiences with adults who have acute health problems and acute exacerbations of chronic health problems. Students perform the role of the primary nurse with emphasis on the implementation of evidence-based interventions, documentation of patient outcomes, collaboration, and communication. This course builds on knowledge from previous courses and expands the students' understanding of the professional role with a focus on nursing standards of care, safety, quality improvement, and transitional care planning.
Credits: 03
Room and Schedule: TH 6 30-3 30 AM;
Satisfies Core Requirement: None
Prerequisites: NURS2230 AND NURS2231 AND NURS2204.

NURS324401
Childbearing Nursing Theory CAPOTOSTO, MELISSA K
Spring 2021
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed.
Emphasis will be placed on AWHONN and ACOG standards of care.
Credits: 03
Room and Schedule: CARNEY HALL 009,T 9-11 50;

NURS324501
Clinical Laboratory of Childbearing Theory CAPOTOSTO, MELISSA K
Spring 2021
Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities.
Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.
Credits: 03
Room and Schedule: M 7-3PM;M 3-11PM;

NURS425001
Child Health Nursing Theory HAZE, NANCI J
Spring 2021
This course builds on the published *Pediatric Nursing: Scope and Standards of Practice* to discuss the unique responses of children and their families to acute and chronic illness. Emphasis is placed on the child's growth and development in relation to wellness and illness. A family- centered approach is used to address the health teaching, promotion, restoration, and maintenance needs of children and their families. Theoretical principles are presented, and creative, evidence-based nursing intervention strategies to meet the needs of children and their families across the health care continuum are discussed.
Credits: 03
Room and Schedule: YAWKEY ATHLETIC CENTER 426,M 9-11 50;
Satisfies Core Requirement: None

NURS425201
Psychiatric Mental Health Nursing Theory DUNNE, JULIE P
Spring 2021
This course builds upon the standards of practice from APNA-ISPN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence- based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.
Credits: 03

NURS426001
Population Health Nursing Theory NGUYEN, TAM H
Spring 2021
This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

NURS426401
Actualizing the Role of Professional Nurse
SIMONELLI, MARY C; ASHLEY, JANE; HURLEY, DOREAN L
Spring 2021
Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

Global Healthcare: Meeting Challenges and Making Connections SIMONELLI, MARY C
Spring 2021
This course brings together students and faculty from around the world to discuss and synthesize perspectives on global health, specifically the challenges and common connections experienced across patient centered care, health education, healthcare systems and policy development. The participants will develop a deeper understanding of the particular needs of diverse and underserved populations. Emphasis will be placed on social justice and health of individuals, families, and populations. Through the lens of public health, this course explores assessment of healthcare needs, assurance of a quality healthcare infrastructure, and development of healthcare policy.

NURS735501
An Aging Society: Interdisciplinary Perspectives on Health Care LYONS, KAREN S
Spring 2021
This course provides a conceptual foundation for interdisciplinary health care delivery to older adults and their families. Emphasis is placed on the exploration of significant individual and societal issues in gerontology to guide and expand perspectives of advanced practice nurses and other health professionals in existing and future health systems. These issues are examined at the global and national level. Collaborative inter-professional practice and research are emphasized as a basis for care and services that support meaningful and purposeful life for older adults and families.
Credits: 03

NURS741501
Conceptual Basis for Advanced Practice Nursing BOND, STEWART
Spring 2021
The focus of this course is the development of knowledge as the basis for advanced practice nursing. Philosophical, conceptual, and theoretical perspectives of leaders and scholars from nursing and related fields are surveyed and critiqued. Opportunities are provided to explore and evaluate key issues such as levels of theory development, the domain of clinical judgement, and language and information technology. Emphasis is on knowledge-based quality improvements within various systems and environments that affect health care. Theories and models related to organizational change and health policy are applied.

NURS742001
Advanced Pharmacology Across the Life Span WOOD, LISA J; LAPIERRE, KELLIE L
Spring 2021
This course is intended to provide the student with an understanding of pharmacology and drug therapy as it relates to advanced practice (general and/or in a clinical specialty). The interrelationships of nursing and drug therapy will be explored through study of pharmacodynamics, dynamics of patient response to medical and nursing therapeutic regimens, and patient teaching as well as the psychosocial, economic, cultural, ethical, and legal factors affecting drug therapy, patient responses, and nursing practice. The role of the nurse practicing in an expanded role in decision-making related to drug therapy is also included.
Credits: 03
Room and Schedule: HIGGINS HALL 225,W 4 30-7 30;
Satisfies Core Requirement: None

NURS742601
Advanced Psychopharmacology Across The Life Span PETRECA, VICTOR G
Spring 2021
This course builds upon the standards of practice from APNA-ISPN, AACN, NONPF, and APA. The legal, ethical, and therapeutic role of the advanced practice nurse in prescribing psychotropic medications for individuals with psychiatric disorders is examined across the lifespan. The evidence based prescription of psychopharmacological agents according to practice guidelines will be a focus in each class. The course will review neurobiology, the action of central nervous system medications, and the implications for ethno-psychopharmacology. Standardized tools to evaluate treatment efficacy and diagnostic criteria will be identified. Collaborative practice models, indications for referral, and monitoring to enhance treatment adherence are reviewed.
Credits: 03
Room and Schedule: CARNEY HALL 009,M 4 30-7 30;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. Graduate standing or permission of instructor.

NURS743001
Advanced Health Assessment Across the Life Span CONNOLLY, MAUREEN A; WHITE, LAURA S
Spring 2021
Building on undergraduate course work and previous clinical experience, this course utilizes life span development and health risk appraisal frameworks as the basis for health assessment.
Students master health assessment skills for individuals within family, environmental, and cultural contexts. The course provides advanced practice nursing students with planned classroom and clinical laboratory experiences to refine health assessment skills and interviewing techniques. Health promotion, health maintenance, and epidemiological principles are emphasized in relationship to various practice populations.
Credits: 03
Room and Schedule: M 9-1 20;MALONEY HALL LAB;
Satisfies Core Requirement: None **Prerequisites:** NURS7672 AND NURS7420. **Corequisites:** None
Cross-listed with: None

Student Level: GRADUATE
Comments: This course is taken the semester prior to practicum entry.
Status: OPEN

NURS749001
Physiologic Variables for Nurse Anesthesia I--Respiratory VITALE, CAITLIN M
Spring 2021
This course is an in-depth study of the anatomy, physiology, and pathophysiology of the respiratory system and related anesthesia implications for the whole person. It complements physiologic principles learned in master's core courses. The concepts of ventilation and perfusion as well as oxygen transport will be examined. Assessment of baseline pulmonary function and alterations seen in common disease states will be reviewed. The effect of compromised pulmonary function and implications for the patient and the anesthesia plan will be discussed. The effect of surgery and anesthesia on the respiratory system will be emphasized.
Credits: 03
Room and Schedule: MALONEY HALL 365,W 9-11 50;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: NURS7491 AND NURS7672.
Cross-listed with: None **Frequency:** Annually **Student Level:** GRADUATE **Comments:** None

NURS749101
Chemistry and Physics for Nurse Anesthesia Practice EMERY, SUSAN A
Spring 2021
This course is an in-depth study of principles of chemistry and physics as they relate to nurse anesthesia practice. Aspects of organic and biochemistry, including the chemical structure of compounds and their significance in pharmacology, will be explored. The role of acid-base balance in maintaining the body's internal milieu and cellular integrity will be examined. Laws of physics as they pertain to the nurse anesthesia practice will be illustrated with specific examples. The emphasis will be placed on the assimilation and integration of scientific theory into practice.
Credits: 03
Room and Schedule: MALONEY HALL 365,M 9-11 50;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: NURS7672 AND NURS7490.

NURS752001
Research Methods for Advanced Practice Nursing PARK, JINHEE
Spring 2021
The focus of this course is the formal process of acquiring and evaluating evidence that supports nursing practice. Quantitative and qualitative methods of inquiry are examined. Quality considerations of various research designs are explored. Levels of evidence are identified in relation to existing research outcomes. Evaluation of existing research outcomes as evidence to support clinical practice, demonstrate quality improvement (QI), and advance nursing knowledge is a major emphasis of the course.
Credits: 03
Room and Schedule: GASSON HALL 306,M 4 30-7 30;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Biennially
Student Level: GRADUATE
Comments: Open to upper-division R.N. and B.S. nursing students, and non-matriculated nursing students.
Status: CLOSED

NURS753701
Advanced Practice Psychiatric Nursing Across Life Span II MARCHETTI, CAROL A; PETRECA, VICTOR G
Spring 2021
In this second Family PMHNP course, students build on the theoretical frameworks of NURS7437 to continue to examine major DSM-5 diagnoses that occur in childhood, adolescence, and throughout adulthood. Students apply models of individual, family and group psychotherapy from NURS7438 Advanced Practice Theories of Psychotherapy and NURS7538 Advanced Theories of Family and Group Psychotherapies, and pharmacologic approaches from NURS7420 Advanced Pharmacology and NURS7426 Advanced Psychopharmacology. Crisis management, prevention/health promotion, continuous quality improvement, and allocation of services including case management, collaboration, consultation, and referral are analyzed. In the clinical practicum (minimum 250 hours) students synthesize their diagnostic and clinical reasoning abilities and advance their treatment skills as members of the multidisciplinary team.
Credits: 06
Room and Schedule: CARNEY HALL 303,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7430 AND NURS7420 AND NURS7438 AND NURS7672 AND NURS7437.
Corequisites: NURS7538. **Cross-listed with:** None **Frequency:** Annually **Student Level:** GRADUATE **Comments:** None

Status: OPEN

NURS755001
Current Issues in Sexual Health Care WHITE, BRADLEY
Spring 2021
Sexual health is a critical component of well-being across the lifespan. Current research reveals that gender and sexual health identity and orientation are key factors in understanding patterns of sexual health behaviors and risks, and experiences of health, wellness, and illness. This course examines current and emerging issues affecting sexual health and strategies to inform clinical practice, including: the nurse-patient relationship and its influence on sexual well-being; health disparities linked to societal stigmas, prejudices, and discrimination; and ways to improve access to quality health care for populations disproportionately at risk for or affected by STIs including HIV/AIDS.
Credits: 03
Room and Schedule: CARNEY HALL 202,T 4 30-7 30;HYBRID;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. Matriculation in a graduate program in CSON or permission of the instructor.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE

NURS755301
Women's Health Advanced Practice Nursing II
HARRIS, ALLYSSA L; MURPHY-SWENSON, ERIN E; CAPOTOSTO, MELISSA K
Spring 2021
This course builds on Women and Children's Health Advanced Practice Theory and Women's Health Advanced Practice Nursing I. It concentrates on the role of the nurse in advanced practice with women across the lifespan, focusing on the development and evaluation of management strategies to promote optimal functioning in women seeking obstetrical and gynecological care as well as the indirect role functions in advanced practice as Clinical Nurse Specialists/Nurse Practitioners. Theories and research from nursing and other disciplines are applied and integrated through seminars, clinical conferences, clinical experiences (20 hours/week), and course assignments.
Credits: 06
Room and Schedule: CARNEY HALL 007,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7672 AND NURS7420 AND NURS7430 AND NURS7450.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

NURS755601
Advanced Clinical Decision-making in Pediatric Primary Care WHITE, LAURA S
Spring 2021
The purpose of this course is to provide an in-depth focus and understanding of the complexities of contemporary pediatrics and the process of diagnostic reasoning directly related to clinical experience. Emphasis is placed on the new morbidities of pediatrics, current research in child development, and the current policies and expectations of primary care pediatrics. This course will provide content specific to pediatrics, teen, and young adult health and development.
Credits: 03
Room and Schedule: CARNEY HALL 305,T 1-3 50;
Satisfies Core Requirement: None
Prerequisites: NURS7430; NURS7420; NURS7672; NURS7447.
Corequisites: NURS7557. **Cross-listed with:** None **Frequency:** Annually **Student Level:** GRADUATE **Comments:** None

NURS755701
Pediatric Primary Care/Advanced Practice Nursing II ST PIERRE, SHERRI B; WHITE, LAURA S
Spring 2021
This course builds on NURS 7457. The focus is on management of children with more complex or chronic health problems. Theories and research from nursing and other disciplines are synthesized, with special consideration of the influences of culture and SES on wellness and health care. Students continue in precepted clinical practice (20 hours/week) to develop advanced skills in differential diagnosis and gain increased comfort in managing psychosocial problems. In consultation with preceptors, students make referrals, develop treatment and teaching plans with clients, document accurately, and further develop confidence and competence in the role of pediatric nurse practitioner.
Credits: 06
Room and Schedule: CARNEY HALL 202,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7672 AND NURS7420 AND NURS7430 AND NURS7450 AND NURS7457.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE

NURS756201
Primary Care of Adults and Older Adults Theory II
HOWARD, ELIZABETH P
Spring 2021
The second course focused on primary care of adult/older adult. Analysis/synthesis of nursing and knowledge to guide evidenced-based interventions/outcomes. Intervention strategies, complementary healing modalities, actions responsive to changing health-care delivery systems are explored in relation to outcome indicators that distinguish the APN role addressing commonly occurring nursing problems. Innovative practice models designed to highlight APN leadership and practice. Evaluation of current knowledge to address nurse sensitive indicators is also explored. Interdisciplinary collaborations discussed, especially relating to development of APN led care models promoting health and life transitions of adults/older adults. Measures used to evaluate effectiveness of the APN outcomes are identified.
Credits: 03
Room and Schedule: T 1-3 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: NURS7462.
Corequisites: NURS7415 AND NURS7417.
Cross-listed with: None **Frequency:** Annually **Student Level:** GRADUATE **Comments:** None
Status: CLOSED

NURS756301
Primary Care Adult and Older Adult/Advanced Practice Nursing II
LAPIERRE, KELLIE L; CONNOLLY, MAUREEN A; HOWARD, ELIZABETH P
Spring 2021
This second course in the adult-gerontology health practicum series builds upon the knowledge gained in NURS7463. The course continues to apply the clinical reasoning process used to assess, diagnose, and treat common primary care problems and chronic illnesses of the adult- gerontology population considering lifespan, frailty, and socio-cultural influences. Through critically appraising current strategies used to promote the optimal level of being and functioning of adults and older adults, students will be encouraged to develop plans that address gaps in care.
Credits: 06
Room and Schedule: CARNEY HALL 305,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7420 AND NURS7430 AND NURS7463 AND NURS7672.
Corequisites: NURS7562. **Cross-listed with:** None **Frequency:** Annually **Student Level:** GRADUATE **Comments:** None

NURS757001
Community And Family Health Advanced Theory II MARSHALL, ALISON O
Spring 2021
This course is the second of a series in the theory and advanced practice of community and family health nursing. It focuses on theories, concepts, and research findings in the development and evaluation of nursing interventions and strategies that promote health in aggregates and communities. Health legislation and multiple socioeconomic and environmental factors are analyzed to determine their influence on planning for family health and community wellbeing.
Credits: 03
Room and Schedule: YAWKEY ATHLETIC CENTER 426,T 1-3 50;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: NURS7415, NURS7416, NURS7417; NURS7520.

NURS757301
Advanced Practice in Community and Family Health Nursing II MARSHALL, ALISON O; CULLINAN, DONNA L
Spring 2021
This combined didactic and practicum course continues to integrate the assessment, diagnosis, and management of selected primary health care problems for individuals and families. Building on NURS7473 course content, this course emphasizes management of complex health problems. Students practice 20 hours per week to integrate theory, practice, and research as Family Nurse Practitioners.

Credits: 06
Room and Schedule: CARNEY HALL 005,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7430 AND NURS7420 AND NURS7672.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE

Status: OPEN

NURS759201
Advanced Principles for Nurse Anesthesia Practice EMERY, SUSAN A
Spring 2021
This course focuses on selected problems associated with the provision of anesthesia for specialty and emergency surgeries. It explores anesthesia considerations related to the diverse needs of persons across the life span. Special attention is given to the anesthesia needs of the maternity, pediatric, and the aging patient. Content also addresses the specialty areas of acute and chronic pain management and outpatient surgery. Attention is given to patient comfort and safety issues implicit in surgical interventions and anesthesia delivery.
Credits: 03
Room and Schedule: MALONEY HALL 365,M 1-3 50;
Satisfies Core Requirement: None
Prerequisites: NURS7492 AND NURS7590 AND NURS7591.
Corequisites: NURS7593. **Cross-listed with:** None **Frequency:** Annually **Student Level:** GRADUATE **Comments:** None

NURS759301
Nurse Anesthesia II THOMAS, ALLAN C
Spring 2021
This course provides the opportunity for students to integrate theory into clinical practice for patients with significant comorbidities undergoing more complex procedures. Anesthetic requirements as dictated by patient assessment, including the surgical procedure are studied in greater depth. Seminar and simulation experiences are sequenced to complement the theoretical content presented in NURS7592, Advanced Principles of Nurse Anesthesia Practice.
Credits: 05
Room and Schedule: CARNEY HALL 007,M 10-12; **Satisfies Core Requirement:** None **Prerequisites:** NURS7590 AND NURS7591.
Corequisites: NURS7592. **Cross-listed with:** None **Frequency:** Annually **Student Level:** GRADUATE **Comments:** None
Status: CLOSED

NURS767201
Advanced Pathophysiology Across the Life Span DWYER, ANDREW A
Spring 2021
This course focuses on the processes that underlie diseases and dysfunctions that affect individuals across the lifespan. The emphasis is on central concepts of pathophysiology, including alterations in cellular communication, genetic mechanisms, homeostasis, cell growth regulation, metabolism, immunity, and inflammation. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.
Credits: 03
Room and Schedule: DEVLIN HALL 008,M 4 30-7 30;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. Baccalaureate degree in nursing, enrollment in graduate program in School of Nursing or permission of the instructor.

NURS800801
Direct Entry Child Health Nursing Clinical
HAZE, NANCI J; MANSFIELD, KATHLEEN J
Spring 2021
This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for children and families. A primary focus is promoting wellness and family-centered care for children with acute illness and chronic conditions. Through interprofessional collaboration, students implement evidence-based practice to provide high quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision-making to meet the biopsychosocial and cultural needs of children and families from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care for children and families.

NURS801001
Direct Entry Childbearing Nursing Clinical
CAPOTOSTO, MELISSA K; MURPHY-SWENSON, ERIN E
Spring 2021
This clinical course focuses on the application of knowledge and implementation of professional nursing practice in the care of childbearing women and families. The primary focus is on prenatal, perinatal, and postnatal periods. Through interprofessional collaboration, students implement evidence-based practice to provide high quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision-making to meet the biopsychosocial and cultural needs of childbearing women and families from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care for childbearing women and families.
Credits: 02
Room and Schedule: MON OR TUES 3-11PM;
Satisfies Core Requirement: None
Prerequisites: NURS8002 AND NURS8003 AND NURS8004 AND NURS8005 AND NURS8001 AND NURS8006.
Corequisites: NURS8008 AND NURS8007 AND NURS8009.
Cross-listed with: None **Frequency:** Annually **Student**

NURS871201
Healthcare Quality Management REID PONTE, PATRICIA A
Spring 2021
This course explores the theoretical foundations and application of quality improvement methods, tools, and strategies needed to increase organizational effectiveness. The course focuses on measurement and accountability in health care delivery systems through the examination and analysis of data, structures, processes, and outcomes. Process improvement theories and models are explored with the goal of preparing students to lead and practice in organizations that advance high reliability principles, patient safety, inter-professional teamwork, and continuous learning.
Credits: 03
Room and Schedule: ONLINE COURSE,;ASYNCHRONOUS,;JAN 28-MAR 21.;DISCUSSION HOUR;TUE, 5:30-6:30 PM;
Satisfies Core Requirement: None
Prerequisites: ADHA7000 AND ADHA7045. With permission of the Department.

NURS871301
Healthcare Information Technology STETTHEIMER, TIMOTHY D
Spring 2021
This course explores the critical role of e-health and information systems in the planning, operation, and management of healthcare organizations. Students will learn how to assess and evaluate health information systems and business requirements in a variety of settings such as health systems, hospitals, and medical practices. Students will develop skills in healthcare technology implementation design that addresses such industry-specific requirements as translating HIPAA and other regulations into specific technology decisions while implementing medical systems (EMR, lab, clinical services, medical database providers, etc.). Students will also learn how to manage multi-institutional relationships as they are expressed in technology implementations, including the many vendor configurations but also cross-provider organization relationships. Specific topics include data and systems integrations, communications protocols, security standards, procurement, and authentication and authorization.
Credits: 03
Room and Schedule: ONLINE COURSE,;ASHYNCHRONOUS,;JAN 28-MAR 21.;DISCUSSION HOUR;TUE, 7-8 PM;
Satisfies Core Requirement: None

NURS871401
Nursing Ethics and Professional Responsibility in Advanced Practice ROSS, RICHARD E
Spring 2021
The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

NURS871501
Nursing Leadership in Complex Health Care Settings O'REILLY-JACOB, MONICA K
Spring 2021
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

NURS871601
Health Care Policy for Nursing Leaders O'REILLY-JACOB, MONICA K; RYAN, KATHLEEN M
Spring 2021
This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

NURS971601
Healthcare Policy and Social Justice
O'REILLY-JACOB, MONICA K; RYAN, KATHLEEN M
Spring 2021
This course prepares scholars to influence healthcare and related policies in support of social justice. Theories of social justice and other scholarly perspectives are used to explore the interrelationships among health policy and the social, political, and economic determinants of health. Strategies for developing, initiating, analyzing, and evaluating health policies are proposed using students' areas of focus as a basis. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address health policy at the regional, national, and global levels.

Methods of Advanced Scholarly Inquiry JURGENS, CORRINE Y; REID PONTE, PATRICIA A
Spring 2021
This is the second of four courses to prepare DNP students to conduct an organization approved, scholarly inquiry project to improve health services and patient outcomes. Students critically evaluate the literature and related information to address a health care problem.
Scholarly inquiry approaches are presented to enable students to identify a problem, plan change to improve a process or outcome, or develop innovative solutions related to health care delivery. Upon course completion, there will be a faculty and organization approved DNP project charter, which includes the problem, processes, and expected outcomes.
Credits: 03

Room and Schedule: M 5-6 30;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: Healthcare Quality Management; Nursing Leadership; Foundations of Evidence- based ANP; Healthcare Information Technology; Healthcare Policy, Epidemiology.

NURS973001
Advanced Physiology and Pathophysiology across the Lifespan DWYER, ANDREW A
Spring 2021
This course focuses on physiologic and pathophysiologic processes that affect individuals across the lifespan. The emphasis is on central concepts of physiology and pathophysiology, including genetic and epigenetic mechanisms, immunity, inflammation, cell growth regulation, hematopoiesis, and hemostasis. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.

NURS973101
Pharmacotherapeutics in Advanced Practice Nursing WOOD, LISA J; LAPIERRE, KELLIE L
Spring 2021
This course will provide the advanced practice nursing student with the fundamental pharmacologic principles necessary to support pharmacotherapeutic decision making in collaboration with patients across the lifespan. The interrelationship of physical, psychosocial, cultural, pharmacogenomic, economic, ethical, and legal factors will be explored. The student will develop evidence-based, cost effective interventions to promote optimal person-centered drug therapy. Application of these principles to various real world clinical situations and individual responses will be emphasized.

NURS981901
Adult-Gerontology Primary Care Advanced Practice Nursing I LAPIERRE, KELLIE L
Spring 2021
The first of three in the Adult-Gerontology Primary Care Advanced Practice Nursing series, this course focuses on the promotion of optimal physical, mental, and social health of individuals across the adult-gerontology age spectrum through evidence-based, ethical, reflective practice, leadership, and advocacy. Students utilize patient-centered theoretical, evidence-based, cost- effective, high quality, and safe clinical approaches to the health promotion, disease prevention, and common adult and age-related primary care problems. Emphasis is on assessment, diagnosis, and management of common primary care problems. Primary health conditions are addressed within the context of biopsychosocial, developmental, cognitive, socioeconomic, and cultural factors.

NURS983901
Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan II MARCHETTI, CAROL A; PETRECA, VICTOR G
Spring 2021
The second of three in the Psychiatric-Mental Health (PMH) Advanced Practice Nursing (APN) series, this course prepares students for the PMH APN role. Knowledge of theoretical frameworks from NURS9837 is applied to assessment, diagnosis, and management of PMH problems. Students hone clinical judgment and communication skills to foster effective therapeutic alliances with patients/families, and facilitate interprofessional collaboration, consultation, and referrals. Topics in crisis management, mental illness prevention, mental health promotion, quality improvement, and case management for diverse populations are explored. A 375-hour supervised practicum provides opportunities for students to develop skills to treat people in diverse PMH clinical settings.
Credits: 06

Forensics Courses: Summer 2020

No records found

Forensics Courses: Fall 2020

FORS531501
Victimology BURGESS, ANN W
Fall 2020
This course examines the wide range of victimization experiences from the perspective of the victim, their families, and society. Crimes to be studied include robbery, burglary, carjacking, assault and battery, rape, domestic violence, stalking, homicide, arson, child sexual abuse and exploitation, child pornography crimes, federal crimes, identity theft, terrorism, and internet crimes. Emphasis will be given to exploring the etiology of trauma, motivational issues of offending, response patterns to victimization, secondary trauma effects of victimization, and community and media response. Class format will utilize cases from the forensic practice of the lecturers.

FORS531801
Forensic Science I BURGESS, ANN W
Fall 2020
Forensic science concepts and principles play a critical role in analyzing crime scene evidence. This course draws on scientific principles and examines cases where there has been a death, including suicide, accidental, and criminal; and cases where there is a survivor, in which there is a legal and/or ethical component. Specifically, the course applies a case method format to forensic science issues including forensic pathology, clinical forensics, crime victims, computer crime, and equivocal death.

FORS531901
Forensic Science Lab BURGESS, ANN W
Fall 2020
Students will learn and use equipment and techniques from the field of forensics to process and evaluate evidence from mock crime scenes. Students will employ various diagnostic tests and methods from the sciences of serology, pathology, ballistics, molecular biology, physics, and biochemistry to solve a contrived criminal case. The laboratory experience will invite students to utilize an array of scientific techniques and to confront and deliberate the ethical and legal implications surrounding the application of forensic science in a court of law.

Wounded Warriors in Transition BURGESS, ANN W
Spring 2021
Over 65,000 U.S. troops have been wounded since 2001. Many have suffered "the hidden injuries"--traumatic brain injuries and post-traumatic stress disorder. The purpose of this course is for students to gain an understanding of military culture, catastrophic injuries, and the journey of Wounded Warriors and their family members. The course examines the history and culture of the Armed Services and the developing knowledge of the rehabilitation of Wounded Warriors.

Forensic Mental Health

PETRECA, VICTOR G; BURGESS, ANN W
Spring 2021
The course examines the components of human behavior that bring people into a criminal justice setting and analyzes the legal question involved. Content will cover homicide, rape, abduction, cyber crimes, stalking, domestic violence, child abuse, and criminal parenthood from the offender's perspective. Content covered includes forensic and behavioral interviewing, interrogation, role of forensic mental health examiners, case formulation, DSM IV-R diagnosis, criminal investigations and charges, state of mind, duty to warn, memory and recall, malingering, and secondary gain. Forensic cases will form the basis for discussion of each class topic.

Palliative Care Courses: Summer 2020

HLTH770001
Serious Ill, Death, and Dying TABLOSKI, PATRICIA
Summer 2020
This course provides an opportunity for examination of personal, professional, and societal beliefs and perspectives on serious illness, death, and dying across the lifespan. Students become aware of and sensitized to personal assumptions, biases, attitudes and reactions to serious illness, death, and dying. Philosophies, principles, and models of palliative and end-of- life care are discussed. Students develop an appreciation for individual and family coping processes throughout serious illness, death, dying, and bereavement. Students explore communication and bio-psycho-social-spiritual strategies that can be used to partner with individuals and families to maximize quality of life throughout serious illness, death, and dying.

Examining Diversity in Nursing and Health Care ABUELEZAM, NADIA; MAGNY-NORMILUS, CHERLIE
Summer 2020
This course is designed to help students develop foundational insights regarding diversity as an all-inclusive concept with complex intersections. It will focus on the professional nurse as a multifaceted cultural being with a network of identities and group affiliations that serve as both resources and barriers in the development of effective and meaningful patient/family-provider interactions. The primary goals of this course involve identifying sources of difference, deconstructing sociopolitical hierarchies, and recognizing the strengths and challenges inherent in diverse societies. The course will emphasize inclusive leadership strategies for transforming care delivery systems across multiple health care contexts.

Ethical Issues in Advanced Practice Nursing ROSS, RICHARD E
Fall 2020
The focus of this course is to explore the boundaries of Advanced Practice Nurses' (APNs) ethical responsibilities to individuals, groups, and society in an intra and interdisciplinary, collaborative health care environment. The philosophical and theoretical foundations of ethical practice are critically examined for their ability to enhance decision-making that best serves the interests of current and future patients and meets societal needs. An emphasis is placed on developing the skills needed to address challenges and obstacles to ethical practice in advanced practice roles and settings. Strategies to influence health policy related to various specialty populations are explored.

Global Health Challenges and Disparities NGUYEN, TAM H
Fall 2020
Marginalized groups and residents of resource-deprived communities often suffer from excessive rates of poor health and mortality. Such health disparities exist within the U.S. and around the world. In order to achieve the goals of "increasing longevity and quality of life" and "eliminating health disparities" (U.S. Public Health Service), health care professionals need to understand health disparities, their casual roots, and how to design and implement effective health-promoting programs and policies. This course provides an introduction to health disparities, measuring indices of health status, and implications for programming and policy. Contemporary global health challenges are addressed as exemplars.

HLTH770201
Responding to Suffering in Serious Illness, Death, and Dying DEPARTMENT
Fall 2020
This course focuses on improving the quality of life and care for individuals and families living with serious illness and at end of life. Emphasis is placed on recognizing and responding to suffering from an interdisciplinary perspective. Barriers and facilitators of effective care during serious illness, death and dying, such as social determinants of health, family dynamics, spiritual and cultural variations, are explored. Evidence-based interventions and strategies to address, manage, and alleviate physical, psychosocial, spiritual, and existential suffering across the lifespan are discussed. Established palliative care standards are utilized to evaluate outcomes within the context of interdisciplinary care.

HLTH770401
Interdisciplinary Leadership in Palliative Care BOND, STEWART
Spring 2021
This course emphasizes the role of interdisciplinary palliative care leaders in promoting teamwork and collaboration in coordinating care for individuals and families throughout serious illness, death, and dying. The impact of serious illness, death, and dying on the individual, family, community, and healthcare system are analyzed to inform and promote quality palliative care.
Resource availability and barriers to care across different settings are examined. Interdisciplinary leadership is explicated with an emphasis on communication, advocacy, ethics, policy development, quality, and safety. Standards of practice, policies, protocols, evidence- based practice and research are applied and evaluated to catalyze palliative care growth and development.

APSY332201
Religion and the Brain: An Introduction to Neurotheology BLACK, JESSICA M
Summer 2020
The brain is an organ of adaptation and such plasticity allows humans the capacity to build and draw upon faith and reason throughout times of stress and the building of resilience. Brain development throughout all life stages will be examined as we consider the following primary question: What does the field neuroscience help us to understand about faith throughout the life span, and what does it leave out? Contexts that confer stress or build resilience are examined throughout the course as students discover how neuroscience and faith converge or diverge in their contributions to understanding of the human experience and its development throughout life's unique pathways. To engage in this exciting dialogue about larger questions that may integrate these seemingly disparate and often siloed modern and ancient disciplines, students will be exposed to key concepts, definitions and vocabulary in neuroscience and recent advancements in related biological fields such epigenetics. We will then be able to engage in investigating and returning to important questions that may thematically bridge these fields.
Through extensive writing, reflection and dialogue students will have the opportunity to deepen their understanding of the relationships among faith, religion, spirituality, and modern science.

Inside-Out: Perspectives on Crime, Corrections, and Justice DELSESTO, MATTHEW J
Summer 2020
This Inside-Out course is an opportunity for a group of students from Boston College and the Suffolk County House of Correction to exchange ideas and perceptions about crime, corrections, and justice. It is a chance for all participants to gain a deeper understanding of the United States criminal justice system through the marriage of theoretical knowledge and practical experience achieved in meetings throughout a semester. Topics include causes and definitions of crime, criminal justice institutions, myths and realities of prison life, experiences of crime victims, theories of punishment and rehabilitation, and the relationship between crime and community. Most sessions will meet at the Suffolk County House of Correction.

Applied Adolescent Development SEPULVEDA, JONATHAN A
Summer 2020
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

Issues in Counseling Men MAHALIK, JAMES R
Summer 2020
Examines issues related to counseling men by addressing the influence of socially constructed roles on men, their families, and broader society. Specifically, will examine how men's gender roles impact on their personal development through the life span, and contribute to their health, roles as partners and fathers, and how men approach mental health services. In the final part of the course, issues specific to counseling men from access to services to creating therapeutic environments for men are addressed.

Preparing the Whole Person for Global Citizenship LIANG, BELLE
Summer 2020
This course is for graduate students and upper-level undergraduates who are interested in the fields of education and psychology. The course will focus on the development of individuals and their role as global citizens. We will explore the whole person development of adolescents and emerging adults in the digital age--one marked by a participatory culture. We explore these questions while foregrounding the different strategies and methodologies of counseling, developmental, and educational psychology.

APSY741901
Applied Adolescent Development SEPULVEDA, JONATHAN A
Summer 2020
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

Counseling, Developmental, and Educational Psychology Courses: Fall 2020

APSY103001
Child Growth and Development LASKI, ELIDA V
Fall 2020
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.
Credits: 03
Room and Schedule: T TH 9*;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Social Science **Prerequisites:** None
Corequisites: None

APSY203201
Psychology of Learning HOPMAN, RACHEL J
Fall 2020
Discusses classic and contemporary theories of learning and of cognitive development and theories of the relation between learning and cognitive development. Also looks at major studies with children. Compares and contrasts theories along key dimensions on which they vary. Addresses issues and questions that include the following: Is the environment or our biological endowment and innate knowledge responsible for our learning; are babies born with a lot of knowledge or must all cognition develop from scratch; does development precede learning (readiness to learn). Also looks at role of motivational factors, and discusses practical applications of theory and research.

APSY224301
Social Oppression and Transformation GOODMAN, LISA A
Fall 2020
This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations--social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

APSY331001
Contemporary Issues in Applied Psychology and Human Development HENRY, DAPHNE A
Fall 2020
This advanced undergraduate seminar introduces students to theory and research that contextualizes the development of children of color. This course will use a theoretically- grounded, scientific approach to investigate the multiple factors shaping the development and developmental contexts of racially- and ethnically-diverse children. We will explore these influences from an interdisciplinary perspective grounded in developmental psychology but drawing from scholarship in sociology, economics, and education. By adopting an interdisciplinary perspective, we can critically assess the complex influences--both proximal and direct as well as distal and indirect--shaping the development of children of color. Participants in this course will learn about multiple domains of child and youth development, socio-historical factors and policy issues that impact children and families of color, and the specific contextual challenges and developmental assets that confer risk or support resilience among diverse children.

Inside-Out: Perspectives on Crime, Corrections, and Justice DELSESTO, MATTHEW J
Fall 2020
This Inside-Out course is an opportunity for a group of students from Boston College and the Suffolk County House of Correction to exchange ideas and perceptions about crime, corrections, and justice. It is a chance for all participants to gain a deeper understanding of the United States criminal justice system through the marriage of theoretical knowledge and practical experience achieved in meetings throughout a semester. Topics include causes and definitions of crime, criminal justice institutions, myths and realities of prison life, experiences of crime victims, theories of punishment and rehabilitation, and the relationship between crime and community. Most sessions will meet at the Suffolk County House of Correction.

Health Psychology LAI, BETTY S
Fall 2020
Health psychology is the study of how psychology and health interact and influence: health promotion and health risk behaviors, the treatment individuals receive for medical problems, how people cope with stress and pain, and how people behave when they are ill. This course will review these issues across the life course, with special attention to approaches which influence health promoting behaviors and the treatment of illnesses.

APSY605001
Cybersecurity Policy: Privacy and Legal Requirements POWERS, KEVIN R; FICK, KATHERINE J
Fall 2020
Course provides a comprehensive examination of the laws, regulations, and Executive Orders concerning data protection and privacy, including PCI, HIPAA, GLBA, SOX, FISMA, NIST, FISA, CFAA, and their overseas counterparts, and the roles of federal, state, and local regulators and law enforcement officials. The course also examines data protection and national security issues governed by various Federal agencies (e.g., SEC, FTC, FCC, DOE, DOJ, DHS, NSA, Treasury), including suspicious activity reporting (SAR) requirements under the Patriot Act. Additionally, the course addresses intellectual property protection, security classifications, data location requirements, audits, compliancy assessments, and individual, class-action, and shareholder derivative litigation and liability.

Social Issues and Social Policy COLEY, REBEKAH L
Fall 2020
This seminar provides participants with a foundation of knowledge concerning current social policy issues involving children and families in the U.S., with a particular focus on issues related to poverty and disadvantage. Considers how research, politics, and advocacy play a role in the initiation, implementation, and evaluation of policy, and how social policies impact children and families. Seeks to help students explore scientific evidence and social perceptions, and think critically about central social issues and social policies.

APSY642001
Positive Youth Development LERNER, JACQUELINE V
Fall 2020
Applied Developmental Science (ADS) uses research about human development to inform programs and policies pertinent to topics of social importance. Students will integrate readings about and class discussions of ADS theory and research with information about community- based programs. The focus of this class will be a discussion and analysis of the role of developmental research and, in particular from longitudinal research (for example, the 4-H Study of Positive Youth Development), in framing applications (programs and policies) for promoting positive development among youth. In addition to an overview of the theoretical models that are the bases of the PYD perspective, the course will present the work of researchers who have conducted applied developmental studies of adolescents and their ecological settings in order to advance understanding of how individuals and context are involved across the adolescent years in providing a basis for both healthy and problematic development.

APSY650001
Organizational Effectiveness: Governance, Risk Management, and Compliancy ALDRICH, PHILIP
Fall 2020
Technical proficiency is not enough to manage business risk. Every potential or identified threat cannot be mitigated, and organizations must choose where to focus their often limited resources to support business goals. This course focuses on Governance, Risk and Compliance (GRC) as an organizational capability that all organizations require in today's complex world.
Topics include understanding the business context of key stakeholders, corporate culture, and organizational risks. Students will understand how GRC capabilities such as enterprise risk management (ERM), compliance management (SOX, ISO, PCI, NIST, etc.) and policy management should work together to build a cohesive strategy within the business context. Students will learn about GRC technology and GRC program management required to support and grow GRC capabilities. Lastly, students will hear from guest lecturers about the roles and responsibilities of the Board of Directors, Risk/Audit Governance Committees, Chief Executives (Chief Information Security Officer (CISO), Chief Risk Officer (CRO), Chief Security Officer (CSO), etc.) and how they rely on GRC capabilities to support the business.

APSY741901
Applied Adolescent Development SEIDER, SCOTT
Fall 2020
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.
Satisfies Core Requirement: None
Prerequisites: prereq undergraduates junior/senior status.

APSY744401
Theories of Counseling and Personality I MAHALIK, JAMES R
Fall 2020
First part of a year-long sequence examining personality and counseling theories. To introduce students to major theories of personality in the field of psychology and how theories are applied in constructing counseling and psychotherapy models. Students will focus on humanistic, behavioral, and cognitive personality theories and how they become operationalized in person- centered, behavioral, and cognitive counseling models, respectively. In addition to examining the theoretical foundations, client and counselor dimensions, techniques, and the active ingredients of change for these major models of personality and counseling, students examine how socio-cultural context contributes to client presenting concerns and may be addressed in counseling.

Cultural Processes, Social and Emotional Development MORELLI, GILDA A
Fall 2020
This course reviews the theoretical and empirical literatures pertinent to the study of emotional and social development across the life span. Perspectives derived from the disciplines of biology, psychology, anthropology, sociology, and history are presented. The interrelations between social and affective processes, and their association with familial, societal, cultural, and historical context of development are discussed. Issues derived from social psychology, such as group processes, will also be discussed. Methodological problems present in these literatures and resultant conceptual and empirical challenges involved in developing a life span understanding of social and affective processes are reviewed.

APSY866901
Psychometric Theory LUDLOW, LARRY H
Fall 2020
Presents a study of theoretical concepts, statistical models, and practical applications in educational and psychological measurement. General topics include the history of measurement, Thurstone and Guttman scales, true-score theory, and item response theory. Specific topics include principles of Rsch measurement parameter estimation procedures, fit statistics, item banking, and computer adaptive testing.
Credits: 03
Room and Schedule: TH 4 30-6 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None **Prerequisites:** APSY8667 AND APSY7462. **Corequisites:** None
Cross-listed with: None **Frequency:** Biennially **Student Level:** GRADUATE
Comments: Ph.D. students only; all others by instructor permission.
Status: OPEN

APSY871401
Advanced Research in Applied Developmental and Educational Psychology DEARING, ERIC
Fall 2020
Students design and carry out an original empirical project on a defined area within developmental or educational psychology. Requires design, data collection and analysis, interpretation, and formal APA-style write-up. Students also required to complete two colloquium presentations of their work.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: Restricted to doctoral students in Applied Developmental and Educational Psychology and MA students in the research focus. Permission of instructor required. **Status:** OPEN

APSY874201
Advanced Clinical Case Consultation in Counseling Psychology LIANG, BELLE
Fall 2020
This one-credit course is required for doctoral students who have completed both Advanced Practicum courses and have chosen to do another practicum. The course meets monthly throughout the year and is designed to help students further develop their capacity to integrate theory and practice in their work clients.
Credits: 00
Room and Schedule: CAMPION HALL 204,W 7-9 30;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: Class meets monthly - Sept. 16, Oct. 14, Nov. 11, and Dec. 9.
Status: OPEN

APSY882201
History of Psychology LYKES, M BRINTON
Fall 2020
This course surveys the philosophical roots and the development of psychological thought from the Grecian and medieval periods to the present. Topics include: doctrines of human nature in early Greek philosophy; emergence of science in the post-Renaissance period; contributions of Descartes, Locke, the British empiricists and associationists to mental philosophy; major developments in nineteenth-century physiology; Darwin's evolutionary theory and its implications for psychology; emergence of psychology as an independent discipline; the rise and demise of the major systematic schools in psychology--structuralism, functionalism, Gestalt, behaviorism and psychoanalysis and, an overview of recent theoretical developments and controversies in contemporary psychology.
Credits: 03
Room and Schedule: TH 4 30-6 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

APSY891201
Participatory Action Research: Gender, Race, Power LYKES, M BRINTON
Fall 2020
This graduate seminar introduces students to theoretical and practical issues in the design and implementation of community- and school-based participatory and action research, including a review of theories and practices that have contributed to community-based knowledge construction and social change policies and processes. Ethnographic, narrative, oral history, and visual methodologies are additional resources

for understanding and representing the individual and collective stories co-constructed through the research process. Students participate in a community-based collaborative undoing racism workshop and have opportunities for ongoing collaborative work on a site. We reflect collaboratively and contextually on multiple and complex constructions of "gender," "race," and social class in and through these research processes. OPEN TO ALL Ph.D. STUDENTS. MASTER'S LEVEL STUDENTS REQUIRE PERMISSION OF THE INSTRUCTOR.
Credits: 03
Room and Schedule: T 1 30-4 20;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: Restricted to Ph.D. students. Master's students must get permission from the instructor.
Corequisites: None
Cross-listed with: EDUC8912 **Frequency:** Annually **Student Level:** GRADUATE **Comments:** None

APSY891701
Cognitive-Affective Bases of Behavior VASILYEVA, MARINA
Fall 2020
This course discusses theories of human development and examines empirical research on cognitive and affective processes underlying behavior. In addressing the cognitive bases of behavior, it explores key mental processes (e.g., attention, memory, problem solving) and constructs (e.g., schemas, heuristics) that have been instrumental in understanding everyday functioning. The socio-affective bases of behavior addressed in the course include emotions, temperament, and self-concept. The students in this course explore fundamental theoretical questions, such as the role of biology and environment in development, and consider practical applications of current theoretical and empirical knowledge concerning the bases of human behavior.
Credits: 03
Room and Schedule: CAMPION HALL 010,TH 9-11 20;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: Ph.D. students only. All others must get instructor approval.

APSY984101
Quantitative Research Design in Counseling and Developmental Psychology DEARING, ERIC
Fall 2020
In this year-long seminar, students examine quantitative research designs and application employed in the Counseling and Developmental Psychology literatures, including randomized, nonrandomized, cross-sectional, and longitudinal designs. Students present and critique published research exemplifying specific designs, propose empirical studies that could advance counseling and developmental psychology, and present findings from their own empirical work.
Credits: 01
Room and Schedule: CAMPION HALL 010,W 9 30-12;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: Doctoral students in Counseling and Developmental Psychology. Others by instructor's permission. This is a year-long course, 1 credit in the fall, 2 credits in the spring. **Status:** OPEN

APSY984201
Seminar in Counseling Theory TUMMALA-NARRA, PRATYUSHA
Fall 2020
Deepens students' understanding of psychological theory, and facilitates a life-long journey of integrating theory with practice. Provides knowledge and understanding of traditional and contemporary theories of psychotherapy, and helps students develop a critical perspective that will enable them to evaluate the usefulness of these theories for their clinical work with clients. Class discussions cast a critical eye on the development of the discipline, including its philosophical and contextual roots, and analyze the values inherent in mainstream psychological practice. Considers strengths and limitations of each school, and uses case examples to gain expertise in applying theory to practice.
Credits: 03
Room and Schedule: CAMPION HALL 204,T 2-4 30; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Biennially
Student Level: GRADUATE
Comments: Doctoral students in Counseling Psychology only

APSY986401
Advanced Qualitative Research WARGO, JON M
Fall 2020
Building upon the foundation concepts of qualitative research and initial exploration of an introductory course in qualitative methodologies, this course explores the theoretical, methodological, and analytic implications of conducting qualitative research from differing theoretical perspectives. Key readings include texts on social theory, qualitative methodologies, and exemplar qualitative research from various social scientific fields. Students will distinguish between methodology and methods, analyze

data, and produce either a report for a specified audience or a research manuscript for possible submission to an educational research journal.

Counseling, Developmental, and Educational Psychology Courses: Spring 2021

APSY103001
Child Growth and Development LASKI, ELIDA V
Spring 2021
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.
Credits: 03
Room and Schedule: T TH 9*;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Social Science **Prerequisites:** None
Corequisites: None
Cross-listed with: EDUC1030
Frequency: Annually

APSY203203
Psychology of Learning VASILYEVA, MARINA
Spring 2021
Discusses classic and contemporary theories of learning and of cognitive development and theories of the relation between learning and cognitive development. Also looks at major studies with children. Compares and contrasts theories along key dimensions on which they vary. Addresses issues and questions that include the following: Is the environment or our biological endowment and innate knowledge responsible for our learning; are babies born with a lot of knowledge or must all cognition develop from scratch; does development precede learning (readiness to learn). Also looks at role of motivational factors, and discusses practical applications of theory and research.

APSY224301
Social Oppression and Transformation SEIDER, SCOTT C
Spring 2021
This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations--social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

Spirituality, Religion, and College Student Experience JAMES, MICHAEL J
Spring 2021
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

Gender Roles MAHALIK, JAMES R
Spring 2021
This course examines biological, social, and psychological factors that interact in contributing to men's and women's gender roles. Within the social domain, particular attention will be given to how culture affects the social construction of gender, and how factors such as racism and homophobia interact with societally prescribed norms for men and women. The second half of the class will focus on the effects of gender roles on mental and physical health, social problems like aggression, and issues in education, work, and relationships including family life.

APSY331001
Contemporary Issues in Applied Psychology and Human Development HENRY, DAPHNE A
Spring 2021
This advanced undergraduate seminar introduces students to theory and research that contextualizes the development of children of color. This course will use a theoretically- grounded, scientific approach to investigate the multiple factors shaping the development and developmental contexts of racially- and ethnically-diverse children. We will explore these influences from an interdisciplinary perspective grounded in developmental psychology but drawing from scholarship in sociology, economics, and education. By adopting an interdisciplinary perspective, we can critically assess the complex influences--both proximal and direct as well as distal and indirect--shaping the development of children of color. Participants in this course will learn about multiple domains of child and youth development, socio-historical factors and policy issues that impact children and families of color, and the specific contextual challenges and developmental assets that confer risk or support resilience among diverse children.

APSY337501
Ed Leadership/Higher Ed JACOBSEN, CHRISTOPHER D
Spring 2021
This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings. Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings

Psychology of Work BLUSTEIN, DAVID L
Spring 2021
Work is one of the central roles in life, encompassing much of our time, energy, and effort. Applied psychology has a deep foundation in the psychology of work, which represents a key context for people to interact socially and economically with their communities. In this course, students will learn how psychology can be used to enhance knowledge of the role of work in career development, organizational life in the private and public sectors, and within broader social and political contexts. Students will also explore the impact of the future of work on individuals and communities, and the ways in which the psychology of work can inform meaning, purpose, and social justice.

Cybersecurity Policy: Privacy and Legal Requirements POWERS, KEVIN R; FICK, KATHERINE J
Spring 2021
Course provides a comprehensive examination of the laws, regulations, and Executive Orders concerning data protection and privacy, including PCI, HIPAA, GLBA, SOX, FISMA, NIST, FISA, CFAA, and their overseas counterparts, and the roles of federal, state, and local regulators and law enforcement officials. The course also examines data protection and national security issues governed by various Federal agencies (e.g., SEC, FTC, FCC, DOE, DOJ, DHS, NSA, Treasury), including suspicious activity reporting (SAR) requirements under the Patriot Act. Additionally, the course addresses intellectual property protection, security classifications, data location requirements, audits, compliancy assessments, and individual, class-action, and shareholder derivative litigation and liability.

Prevention and Intervention Strategies for Children, Families, and Communities DEARING, ERIC
Spring 2021
This course is designed to provide an overview of key issues that arise in the development, implementation, evaluation, and scaling of prevention and intervention programs that intersect with the field of psychology. Key issues include the challenges and opportunities of research- practice partnerships, the critical role of theories of change, diverse perspectives on evidence, and unintended consequences of good intentions. A variety of exemplar prevention and intervention programs are used to illustrate and analyze these key issues using theoretical, conceptual, and empirical works from psychological science.

Translating the Science of Learning into Practice LASKI, ELIDA V
Spring 2021
The science of learning has a tremendous potential for enhancing educational outcomes and job performance. Yet findings obtained in laboratory settings are not easily replicated, expanded, and integrated into applied settings. This course will consider key issues to consider in translating learning science into practice across diverse contexts. Students will consider examples of how findings from the science of learning have been applied either successfully or unsuccessfully to practice in fields such as education, counseling, design, and business.

CYBER Investigations and Digital Forensics SWINDON, KEVIN; NOONAN, DAVID M
Spring 2021
Course covers forensic investigation, case prioritization, and case management, and addresses procedural documentation, standards of evidence, reporting, and disclosure requirements. The digital forensic portion of the course provides an understanding as to disk imaging, file recovery, trace-back techniques, network analytics, evaluation of metadata, malware, and anti-forensics.
Additionally, the course covers the out-sourcing of the investigative function, or part thereof, to third parties, and provides specific case studies, including a practical laboratory project.

APSY650001
Organizational Effectiveness: Governance, Risk Management, and Compliancy ALDRICH, PHILIP
Spring 2021
Technical proficiency is not enough to manage business risk. Every potential or identified threat cannot be mitigated, and organizations must choose where to focus their often limited resources to support business goals. This course focuses on Governance, Risk and Compliance (GRC) as an organizational capability that all organizations require in today's complex world.
Topics include understanding the business context of key stakeholders, corporate culture, and organizational risks. Students will understand how GRC capabilities such as enterprise risk management (ERM), compliance management (SOX, ISO, PCI, NIST, etc.) and policy management should work together to build a cohesive strategy within the business context. Students will learn about GRC technology and GRC program management required to support and grow GRC capabilities. Lastly, students will hear from guest lecturers about the roles and responsibilities of the Board of Directors, Risk/Audit Governance Committees, Chief Executives (Chief Information Security Officer (CISO), Chief Risk Officer (CRO), Chief Security Officer (CSO), etc.) and how they rely on GRC capabilities to support the business.

APSY692501
Cybersecurity: Risk and Resiliency WILKINSON, DAVID; ANTONS, KAREN E
Spring 2021
Course provides a comprehensive understanding of the fundamentals of risk management and applies them to the cyber security and digital risk management environments. It addresses methodologies for comparing digital risks and deciding between acceptance, mitigation, risk transfer, and avoidance. The course compares popular methodologies for quantifying, comparing, and categorizing digital risks. It includes specific topics such as Risk and Control Self- Assessment (RCSA), Risk Appetite Statement (RAS), Risk Tolerance metrics, Three Line Defense Model, Risk Register, Third-Party Risk Management, and Factor Analysis of Information Risk (FAIR). Participants attending this course will be introduced to a broad spectrum of risk management principles, learn how to apply them in cyber security and digital environments, and immediately be able to contribute to cyber risk management using a risk management toolbox learned in this course that is applicable across a wide scope of business, government, academia, and beyond.

APSY695501
Applied Research Project For Non-Profit Organizations MISATA, KELLEY
Spring 2021
This course provides students with hands-on experience in the development, delivery, and results analysis of an information and cybersecurity assessment process for local non-profit organizations. The assessment tool that will be used is a prototype based on the NIST Cybersecurity Framework (CSF). Students will explore how NIST CSF maps to other well-known assessment frameworks including NIST SP800-53, NIST SP800-171, COBIT 5, and ISO 27000.
Students will review the assessment tool and other research through the lens of the non-profit environment. Students will complete a controlled assessment of a local non-profit, which will help them develop skills in assessing, through the lens of information and cyber security, a business environment. Students will utilize these skills in bridging the gap between technical jargon and non-technical audiences by preparing and presenting their assessment findings to the executive leadership of the assessed non-profit. Students will gain a practical ability to perform an information/cybersecurity risk assessment along with the process of developing and delivering the assessment as a part of the students' learning.

APSY722101
Neurological and Biological Bases of Behavior ROWLEY, AMELIA
Spring 2021
Health professionals work with many clients where biological and neurological factors play a role in influencing or exacerbating psychological problems. This course will touch on a variety of topics in psychology from a biological perspective that will be helpful in clinical practice. Areas to be covered include the basic structure and function of neurons, basic neuroanatomy, cognitive functions, substance abuse, addictions, and psychopharmacology. Discussion of these topics will be approached from a biopsychosocial approach. Students are encouraged to ask questions throughout the lecture to both clarify material and to work toward application of the material to clinical work

APSY741901
Applied Adolescent Development SEIDER, SCOTT C
Spring 2021
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

APSY744501
Theories of Counseling and Personality II DECANDIA, CARMELA J
Spring 2021
Second part of a year-long sequence examining personality and counseling theories. Continues introduction to major theories of personality in the field of psychology and how those theories are applied in constructing counseling and psychotherapy models. Focuses on psychoanalytic personality and counseling models as well as critical theory as manifested in the psychology of gender and counseling models that integrate gender into working with clients. Specifically, for each model, students will examine the theoretical foundations developed in its theory of personality, relevant client and counselor dimensions, counseling techniques, and the active ingredients of change that each model uses in bringing about change.

APSY746101
Human Rights Interdisciplinary Seminar LYKES, M BRINTON
Spring 2021
The study of human rights defies disciplinary boundaries. This seminar, sponsored by the Center for Human Rights and International Justice, provides a rare space to examine human rights from an interdisciplinary perspective. It brings together faculty affiliated with the Center, students from across the university, visiting scholars, and guest speakers to examine issues of human rights and international justice. The spring 2021 seminar will begin with an overview and brief historical review of human rights as understood in the West and then explore a series of complexities for those seeking to engage in human rights scholarship, advocacy, and activism.
We seek to engage critically with human rights discourse and actions as they intersect with gender, culture/ethnicity, "race," social class, and other categorizations as well as with emergent challenges from Indigenous people of the global South beyond Northern epistemologies, understandings, and praxis.

APSY862001
Educational and Social Issues and Social Policy COLEY, REBEKAH L
Spring 2021
Examines a range of social issues relevant to children and families and the social policies directed at such issues. Discusses policy creation, implementation and evaluation, and considers the roles of advocacy, research and politics. Addresses how current social policies impact children and families and compares U.S. policies to those in other industrialized countries. Likely topics include poverty, economic redistribution, work/family balance, early childhood education, educational reform, and other issues. The seminar aims to help students think critically about the political and empirical issues involved in assessing social issues and developing and evaluating social policies.

APSY867001
Psychometric Theory II LI, ZHUSHAN
Spring 2021
This course continues the examination and application of the principles of item response theory and educational measurement introduced in previous courses. The first section of the course will address the use of a variety of item response theory models for dichotomous and polytomous items. The second section of the course will focus on application of the principles of item response theory to a variety of practical situations and problems commonly encountered in educational testing. In the final section of the course, overarching theoretical and practical issues are addressed and future directions in item response theory are discussed.

APSY886101
Multilevel Regression Models O'DWYER, LAURA
Spring 2021
This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.
Credits: 03

APSY891901
Advanced Topics in Cognition and Learning LASKI, ELIDA V
Spring 2021
This course will explore the basic processes underlying human cognition and the role of these processes in acquiring knowledge in key domains. Our main goal is to provide our students with a foundational framework in cognitive psychology that can be applied to better understand human behavior and learning. The first part of the course will focus on perception, attention, memory, categorization, and reasoning. The second part of the course will focus on learning in key domains of cognition, such as mathematics, science, and language.

ELHE620301
Universities and the Prison Industrial Complex CONWAY, PATRICK F
Summer 2020
This course examines the involvement of higher education institutions in providing educational opportunities for incarcerated individuals. Students will gain insight into the prison complex by exploring pertinent issues related to mass incarceration, to inequities within the American judicial system, and to the role that higher education can play in responding to such trends.
Students will achieve a better understanding of both the history and current status of prison education policies at both the federal and state levels. The focus of the course is threefold: (1) provide an overview of federal and state policies related to higher education in prison, situating these policies within broader empirical scholarship on mass incarceration in the United States;
(2) explore moral and ethical implications related to prison education; and (3) consider the challenges, barriers, and opportunities within the implementation and administration of higher education programs for incarcerated students.

Serving International Students and Scholars NUSSBAUM, ADRIENNE J
Summer 2020

Despite recent trends, the United States continues to be one of the most popular destination countries globally for internationally students, faculty, and researchers. Serving this growing and diverse population has taken on new and complex dimensions under the current administration, with implications for universities at all levels. This course will provide participants with a grounding in the fundamentals of international student and scholar services. This will include an overview of practical matters governing effective support services design and delivery such as immigration advising and cross-cultural programming. Additionally, the specific knowledge, attitudes, and skills required to work in this profession will be explored, with a particular emphasis on intercultural competency. Ideally suited for early practitioners hoping to work directly with international students and scholars, this course may also be useful for anyone looking for greater insight into inbound mobility trends and issues affecting U.S. higher education and their practical implications.

Internationalizing the Curriculum LEASK, BETTY R
Summer 2020
Increasingly, universities across the world are focusing on new ways to internationalize students' learning as they simultaneously deal with the ongoing challenges of the pandemic. While some of the opportunities are context-dependent, others are shared across a range of different disciplinary, institutional, and national contexts. But with opportunities come challenges. This course will stimulate participants to think in new ways about internationalization and how staff, students, and faculty might contribute to internationalizing classrooms and campuses during and post-pandemic.

ELHE640601
Refugees and Migrants in Higher Education DEWIT, JOHANNES W; UNANGST, LISA M
Summer 2020
Forced displacement, as calculated by UNHCR, has now exceeded 68 million people worldwide. The resulting influx of refugees to temporary and semi-permanent "host" countries has prompted higher education institutions and policy actors to innovate pathways to tertiary education. Concurrently, both "old" and "new" immigrant-receiving contexts are called to facilitate the tertiary access and attainment of students from a migrant background. This population may include students of the so-called first, second, or third generations. In this online course, we probe questions of access and experience among migrant and refugee populations as related to higher education institutions globally. We focus this conversation on the post-1945 period, beginning our discussions with a brief overview of global migration trends. We then consider various approaches to the support of migrant students in key world regions, highlighting comparative data, before turning to refugee student support in both "brick and mortar" as well as online settings. The final portion of the course allows for an integrative discussion of educational equity and policy innovation supporting immigrant and refugee students alike. A final paper of 2000 words will be required for course completion.

ELHE740801
Summer Institute WES-CIHE DEWIT, JOHANNES W
Summer 2020
This annual symposium offered by World Education Services (WES) and the Center for International Higher Education (CIHE) aims to address questions around the internationalization of higher education and provide a space to discuss implications for institutions worldwide. Over the past decades, international higher education has grown exponentially. The global knowledge economy, the massive movement of students, scholars, and academic programs around the world, the IT revolution and its impact on international teaching and learning have all contributed to a strong feeling of interconnectedness and global citizenship in the higher education community. In many local communities outside of academia, however, an increasing frustration over the lack of benefits from globalization has emerged. This disconnect has resulted in rising nationalism and xenophobia, as manifested in several referenda and elections in the past two years. What does this mean for our policies and strategies for internationalization? What lessons are to be learned from these developments? What are the ethical challenges for international education in this political climate? BC students are eligible to receive credit for attending the conference (June 10-12, 2020). Those wishing to earn credit for participation will be required to submit a 1500-2000 word paper on a topic discussed at the conference. The paper will be due by the end of June.

Transforming the Field of Catholic Education MELLEY, KRISTIN B
Summer 2020
This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

ELHE770101
Introduction to Educational Leadership and Change GOUGH, BRIDGET A
Summer 2020
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

Education Policy and Practice MCEWEN, LORI B
Summer 2020
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy.
Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process.
During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

ELHE770401
Ethics and Equity in Education ICIN, EYLEM B
Summer 2020
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

ELHE770701
Leadership for Social Justice JOHNSON, LAURI D
Summer 2020
This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

ELHE770801
Instructional Leadership PEDERSEN, JOELLE M
Summer 2020
Introduces students to many of the contested issues in the field of supervision, such as the relationship between supervision and teacher development, teacher empowerment, teacher alienation, learning theories, school effectiveness, school restructuring, curriculum development, and scientific management. Supervision will be viewed also as a moral, community-nested, artistic, motivating, and collaborative activity. Will stress the need for a restructuring of supervision as an institutional process.

ELHE771101
Using Data and Evidence for School Improvements GRAVES, KENNETH E
Summer 2020
This course prepares leaders to manage initiatives around continuous improvement and data- informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

ELHE772601
Organizational Theory and Learning DRISCOLL, WILLIAM
Summer 2020
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Reflection on Leadership Seminar Information SCANLAN, MARTIN K
Summer 2020
The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner.

PSAP Cohort BRUNELLE, MARYELLEN
Summer 2020
The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The program was developed by Boston College more than three decades ago to provide an opportunity for full-time school administrators to pursue doctoral study. The Lynch School of Education at Boston College partners with the Massachusetts Association of School Superintendents (MASS) and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools.
Boston College's Ed.D. program is an active member of the Carnegie Project on the Education Doctorate, a national effort by 55 institutions to reform and strengthen the

education doctorate. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning.
Through a cohort model that emphasizes collaborative learning and support, PSAP aims to create a powerful network of district-level leaders throughout the Commonwealth of Massachusetts and beyond

ELHE780407
Global Perspectives on Higher Education Leadership and Management
HAZELKORN, ELLEN S
Summer 2020
This course--which is delivered fully online, but does require some synchronous participation-- aims to provide students with an understanding of the multi-dimensional nature of contemporary higher education leadership and management, and to examine these issues from a comparative and international perspective. Strong emphasis is placed on the global context and appreciating how different national contexts and issues impact and affect higher education. Students learn about different issues and experiences directly from leaders, practitioners, and case studies, and are encouraged to draw upon their own experiences--as university administrators, policy makers, faculty or researchers--at the country and institutional level.

Capstone: Adulting ARNOLD, KAREN
Fall 2020
Most college students in their early 20s feel neither fully adult nor fully competent in the tasks, responsibilities, and behaviors that are traditionally associated with grown-up life. In this class, students will take stock of their journey to adulthood so far and look ahead to what relationships, work, citizenship, and spirituality might look like in post-college life. Readings on the developmental psychology of young adulthood will be paired with popular media, exercises, and reflective writing to help students progress in their own "adulting" as they prepare to negotiate the transition out of college. Students may sign-up for this cross-listed course under UNCP Capstone or through the Lynch School ELHE department.

Higher Education in American Society
JAMES, MICHAEL J
Fall 2020
An introduction to higher education in America, this course focuses on the complex relationships between colleges and universities, and the political and social systems of society. This analysis includes a historical perspective on the evolution of American higher education, and especially the development of the contemporary university since the beginning of the twentieth century. Attention is also paid to the impact of federal and state governments on higher education; the role of research in the university; issues of accountability, autonomy, and academic freedom; the academic profession, student politics and culture; affirmative action issues; and others.

Transforming the Field of Catholic Education MILLER, ANDREW F
Fall 2020
This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic

education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

Introduction to Educational Leadership and Change JOHNSON, LAURI D
Fall 2020
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201
Education Policy and Practice MCEWEN, LORI B
Fall 2020
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy.
Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process.
During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

ELHE770501
Education Policy Analysis KRAMER, JENNA
Fall 2020
This course provides a foundation for engaging in analysis of educational policy by developing students' knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

Leadership for Social Justice TAYLOR, KRIS A
Fall 2020
This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

Using Data and Evidence for School Improvements CHO, VINCENT
Fall 2020
This course prepares leaders to manage initiatives around continuous improvement and data- informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

ELHE772601
Organizational Theory and Learning GEISER, JILL S
Fall 2020
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Reflection on Leadership Seminar Information SCANLAN, MARTIN K
Fall 2020
The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner.

Practicum in School Principalship LIBANO, JOSE A
Fall 2020
A 500-hour, field-based experience designed to enable the student to develop the competencies required to be an effective assistant principal/principal. The practicum is supervised jointly by a University representative and a cooperating practitioner. The student is expected to engage in a variety of experiences defined in the state standards for certification and to provide leadership to a major administrative project. The student will maintain a reflective journal of experiences and develop a portfolio that demonstrates the learning and insights gained during the practicum.

Educational Leadership and Higher Education Courses: Spring 2021

ELHE229501
Spirituality, Religion, and College Student Experience JAMES, MICHAEL J
Spring 2021
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

ELHE710301
Education Law and Public Policy MUNIZ CASTRO, RAQUEL
Spring 2021
This course addresses the political and legal aspects of the role of education in our democratic society. Provides an introductory survey of public policy issues and laws governing preschool, elementary, secondary, and higher education. Included are such topics as religious freedom, free speech, and due process; the liability of educational institutions and educators; the legal distinctions between private and public institutions; student and parent privacy rights; disability rights; and the promotion of educational equity among all groups regardless of gender, sexual orientation, language, race, religion, ethnicity, or socioeconomic background.

ELHE730301
Financial Management in Higher Education ZONA, JOHN J
Spring 2021
This course strives to provide a comprehensive introduction to modern day financial management theories and techniques in higher education. A specific focus will be placed on real life context and practical application across a broad range of specialized topics including: endowment management, fundraising, budgeting, long range planning, debt management, financial statement analysis, cash management, resource allocation and risk management.
These topics will be examined through the lens of the recent economic downturn, which has structurally changed the financial and economic landscape of higher education. The tradeoff between risk and return will serve as a common framework for class discussions.

ELHE740201
College Student Experience: Access, Choice, and Persistence ANDERSON, ALANA S
Spring 2021
This course explores the ways in which the higher education community has addressed three basic questions: Who goes to college? What sorts of experiences do students have in college? And, as a consequence of their experiences, who do they become by graduation? The course will familiarize students with the nature and characteristics of the college student population in American higher education, the variety of research methods used to study college students, and some of the many effects and outcomes of college student experiences.

Internationalization of Higher Education BLANCO, GERARDO L
Spring 2021
Higher education around the world today is increasingly affected by the forces of internationalization. Professionals working in postsecondary education in the United States and elsewhere must have a clear understanding of the range of opportunities and challenges presented by the evolution of this phenomenon. This course has two main objectives. The first is to introduce students to the central issues relevant to the international dimension of higher education in different national contexts. The second objective is to promote students' understanding of the practical implications of internationalization for their own work in higher education administration and/or policy-making contexts

ELHE760701
Seminar on Law and Higher Education CATANZANO, PHILIP J
Spring 2021
The Law and Higher Education seminar covers a broad range of pressing contemporary topics impacting institutions of higher education. Topics range from First Amendment concerns on campus, to the business of higher educational institutions (e.g., intellectual property protections and high profile athletic programs), to the impact of government and non-governmental actors on the university, to the future prospects of the American higher education model. The legal, historical, and theoretical underpinnings of each issue are covered, but the focus of the seminar is on the practical decision-making of general counsel, administrators, students, and others who coexist in the university context.

ELHE770101
Introduction to Educational Leadership and Change BRUNELLE, MARYELLEN
Spring 2021
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201
Education Policy and Practice LOWENHAUPT, REBECCA J
Spring 2021
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy.
Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process.
During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

ELHE770401
Ethics and Equity in Education ICIN, EYLEM B
Spring 2021
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

ELHE771101
Using Data and Evidence for School Improvements GRAVES, KENNETH E
Spring 2021
This course prepares leaders to manage initiatives around continuous improvement and data- informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

ELHE772601
Organizational Theory and Learning CHO, VINCENT
Spring 2021
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Reflection on Leadership Seminar Information SCANLAN, MARTIN K
Spring 2021
The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner.

Practicum in School Principalship LIBANO, JOSE A
Spring 2021
A 500-hour, field-based experience designed to enable the student to develop the competencies required to be an effective assistant principal/principal. The practicum is supervised jointly by a University representative and a cooperating practitioner. The student is expected to engage in a variety of experiences defined in the state standards for certification and to provide leadership to a major administrative project. The student will maintain a reflective journal of experiences and develop a portfolio that demonstrates the learning and insights gained during the practicum.

Research Design II
MILLER, ANDREW F; JOHNSON, LAURI D
Spring 2021
In this course, students will learn about the design of research studies. Building on an introduction to methods presented in Research I, this course will walk students through the proposal writing process. Students will learn about a range of research designs, the ethics of human subjects research, and the initial stages of data collection. In addition to drafting their dissertation proposal during the course of the semester, students will learn about the IRB process, negotiating entry to a research site, and approaches to data collection. They will continue to develop skills in multiple methods, including quantitative, qualitative, and mixed- methods designs.

Experience, Reflection, Action Courses: Summer 2020

ERAL400001
First Year Experience, Reflection, and Action WHITCAVITCH-DEVOY, JULIA
Summer 2020
First Year Experience, Reflection, and Action is a seminar designed to help first-year students negotiate the rigors and dilemmas of college life and become more critical citizens. Readings, discussions, and panel presentations will address moral-cognitive decision-making, vocational discernment in the context of Ignatian Pedagogy, local, state, and national trends in Applied Psychology and Human Development and Teacher Education and expose students to the Lynch School and university faculty and student research. Participants will read and critique current research about college student issues and learn to self-reflect critically in order to make more informed choices and decisions.

ERAL110006
First Year Experience, Reflection, and Action WHITCAVITCH-DEVOY, JULIA
Fall 2020
First Year Experience, Reflection, and Action is a seminar designed to help first year students negotiate the rigors and dilemmas of college life and become more critical citizens. Readings, discussions, and panel presentations will address moral-cognitive decision-making, vocational discernment in the context of Ignatian Pedagogy, local, state, and national trends in Applied Psychology and Human Development and Teacher Education and expose students to the Lynch School and university faculty and student research. Participants will read and critique current research about college student issues and learn to self-reflect critically in order to make more informed choices and decisions.

Learning Engineering Courses: Summer 2020

LREN711301
Design Studio 3 KOLODNER, JANET L
Summer 2020
The Design Studio is the venue for learning how to practice Learning Engineering. Students will learn practices of design thinking and design decision making in the context of an internship, focused on designing learning experiences for a targeted population of learners that foster learning of targeted learning objectives. The Design Studio will be richly-facilitated and orchestrated as a Cognitive Apprenticeship. Students will work with the internship organization individually or in pairs, and also spend time as a Knowledge Building Community sharing what they are designing and the complexities they are facing, providing advice to each other, and reflecting on and articulating what they are learning about designing for learners.

LREN712301
Reflective Seminar 3 KOLODNER, JANET L
Summer 2020
This one-credit seminar is designed to help students make sense of and synthesize across the new concepts, skills, and practices they are learning as participants in the M.A. in Learning Engineering Program. Focus will be taking what they are learning into the workplace. Students will continue to reflect on their experiences to identify their strengths and what brings them joy, to imagine the special expertise they'd like to develop, and to identify the kinds of responsibilities they'd enjoy taking on in the workplace.

LREN720601
Collaborative Learning Environments and Social Media ZHANG, HELEN Z
Summer 2020
In this module, students will engage with a variety of collaborative learning environments and social media platforms, reading relevant papers, exploring exemplary projects, and applying ideas to the functional design, adaptation, personalization, and use of learning technology. The module includes a "Design Concept" assignment, where students work in small teams to apply what they are learning to some learning design. Students will work to curate a "knowledge base" of exemplary projects, including examples both from current practice and from the research literature.

Learning Engineering Courses: Fall 2020

LREN710101
Introduction to Learning Engineering KOLODNER, JANET L
Fall 2020
This course introduces the content and skills needed to thrive as systematic designers of learning experiences, environments, and technologies. It focuses on three themes: (1) how people learn--cognitive processes involved in learning and social, cultural, physical, affective, and other influences on those processes; (2) how to fostering or promote learning--what we know about the help learners need to engage and participate at their best and ultimately to become more knowledgeable and capable; and (3) designing for learners and analyzing those designs-- how to apply what you are learning to the design and analysis of learning experiences, environments, and technologies.

LREN720101
Games for Learning SIDMAN, JASON G
Fall 2020
What can we learn from games about engaging learners and fostering learning? How can games be developed specifically to promote learning? What kinds of things can be learned from games? What does it take to foster learning from games? Some educational games that have been designed in research labs can inform about the answers to these questions. As well, there are many computer games around that can teach us about sustaining engagement, particularly important for understanding deeply and mastering capabilities. In this module, students will engage with and read about a variety of games for learning and, hopefully, develop imagination about what different kinds of games and ways of interacting with games afford with respect to learning and come to recognize aspects of game design that are relevant to designing learning experiences. Your project will be the conceptual design of a game to achieve a set of learning goals of your choice.

Principles of Fostering Learning LASKI, ELIDA V
Fall 2020
This course will introduce students to what the field of psychology has to say about how humans learn. This includes examining the basic cognitive processes involved in learning, and considering how these processes interact with task demands and organization. The course is organized around key principles about learning and cognition which have emerged from empirical work in the fields of cognitive and developmental psychology. Its focus will be to identify practices that can be used to foster learning in different settings and interactions, including approaches such as spaced practice and group discussions.

Motivation in Educational Contexts PEREZ, SHENIRA A
Spring 2021
In this module, we will explore what it means to be motivated and what it is that we want at a fundamental level (i.e., our basic human needs). We will also learn about important theories of achievement motivation from the fields of educational, developmental, and social psychology, as well as empirical research that supports these theories. The contextual focus of the module will be on what motivates students to learn and what kinds of instructional practices and interventions can be employed in order to foster student motivation and engagement.

MESA546001
Interpretation and Evaluation of Research LITTENBERG-TOBIAS, JOSHUA
Summer 2020
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal

Introductory Statistics BROWN, NATHANIEL
Summer 2020
An introduction to descriptive and inferential statistics. In particular, students will learn descriptive statistics, graphical and numerical representations of information; measures of location, dispersion, position, and dependence; the normal distribution; and exploratory data analysis. Also, students will be introduced to inferential statistics, point and interval estimation, tests of statistical hypotheses, sampling distribution of t, and inferences involving one or more populations, as well as ordinary least squares regression and chi-square analyses. Provides computer instruction on PC and Mac platforms and in the SPSS statistical package.

MESA746001
Interpretation and Evaluation of Research LITTENBERG-TOBIAS, JOSHUA
Summer 2020
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal
Credits: 03
Room and Schedule: M W 4-7;ONLINE COURSE;;SYNCHRONOUS;MAY 13 - JUN 19;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: ELHE7460,MESA5460
Frequency: Annually
Student Level: GRADUATE
Comments: Mental Health students MUST TAKE APSY7460.12. Other section DO NOT meet licensing requirements for mental health students.
Status: OPEN

MESA746801
Introductory Statistics BROWN, NATHANIEL
Summer 2020
An introduction to descriptive and inferential statistics. In particular, students will learn descriptive statistics, graphical and numerical representations of information; measures of location, dispersion, position, and dependence; the normal distribution; and exploratory data analysis. Also, students will be introduced to inferential statistics, point and interval estimation, tests of statistical hypotheses, sampling distribution of t, and inferences involving one or more populations, as well as ordinary least squares regression and chi-square analyses. Provides computer instruction on PC and Mac platforms and in the SPSS statistical package.
Credits: 03
Room and Schedule: M W F 1-3 30;ONLINE COURSE;;SYNCHRONOUS;JUL 06 - AUG 07;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None

Measurement, Evaluation, Statistics, and Assessment Courses: Fall 2020

MESA106001
Classroom Assessment LYONS, SUSAN C
Fall 2020
This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

Assessment and Test Construction MONCALEANO, SEBASTIAN
Fall 2020
This course addresses the major issues of educational assessment, with emphasis on the characteristics, administration, scoring, and interpretation of both formal and informal assessments, including but not limited to tests of achievement. All forms of assessment are examined including observation, portfolios, performance tasks, and paper-and-pencil tests, including standardized tests. Basic techniques of test construction, item writing, and analysis are included. Standardized norm-referenced tests and statewide testing programs are also examined.

MESA546601
Evaluation Practice and Methods GATES, EMILY F
Fall 2020
This course introduces the process of conducting evaluations from beginning to end. Evaluation is a form of applied social science research focused on systematically assessing the value--merit, worth, or significance--of interventions. The evaluation process includes defining the intervention to be evaluated and its context; framing the evaluation purposes, questions, and quality criteria; designing the evaluation; collecting and analyzing data; synthesizing findings; and disseminating and supporting use. Students will have opportunities to learn and teach each other about a variety of concepts, methods, and tools that can be used at different points in the process. Taking an interdisciplinary approach to evaluation, this course draws on scholarly articles and examples from multiple fields including education, public health, social services, and international development and addressing evaluation at various scales including program, organizational, and systems-level evaluations. By the end of the course, students will gain knowledge of how to carry out evaluations; apply this knowledge to develop evaluation plans for real-world interventions; and gain skills to critique existing evaluations supporting their development as informed, critical consumers of evaluations.

MESA866801
Multivariate Statistical Analysis BRAUN, HENRY I
Fall 2020
This course provides lectures, examples, and lab analyses that address multinomial and ordinal logistic regression models, multiple group discriminant analysis, cluster analysis, multivariate analysis of variance, principal component analysis, factor analysis, and structural equation modeling. We cover various issues related to research design, model building, and the interpretation of the output from SPSS, R, Lisrel, and SAS software programs

MESA866901
Psychometrics I: Classical Test Theory and Rasch Models LUDLOW, LARRY H
Fall 2020
Presents a study of theoretical concepts, statistical models, and practical applications in educational and psychological measurement. General topics include the history of measurement, Thurstone and Guttman scales, classical true-score theory, and item response theory. Specific topics include principles of Rasch measurement, parameter estimation procedures, fit statistics, item banking, and computer adaptive testing.
Credits: 03
Room and Schedule: TH 4 30-6 50;ONLINE;SYNCHRONOUS;

MESA886201
Design of Experiments O'DWYER, LAURA
Fall 2020
This course will introduce experimental design as a paradigm for thinking about the conduct of educational research and evaluation. The goals of this course are to introduce students to the design and statistical principles of the experimental approach to educational research with particular emphasis on the correct analysis of data arising from designed experiments. We will discuss a variety of experimental designs, their advantages and disadvantages, estimation of treatment effects, and significance testing. The topics covered will include the underlying logic of experimental and quasi-experimental designs, regression discontinuity and factorial designs as well as cluster randomized and multi-site trials.

MESA994101
Dissertation Seminar in Educational Research, Measurement, and Evaluation O'DWYER, LAURA
Fall 2020
This two-semester seminar is designed to assist doctoral candidates in the preparation of a formal doctoral dissertation proposal. All aspects of dissertation development will be discussed (e.g., problem development, human subjects review, final defense). Students will develop and present a series of draft proposals for faculty and student reaction. Depending on the circumstances of the student, an acceptable pre-proposal (Intent) or full dissertation proposal is required for completion of the course.

Measurement, Evaluation, Statistics, and Assessment Courses: Spring 2021

MESA106001
Classroom Assessment LYONS, SUSAN C
Spring 2021
This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

MESA746001
Interpretation and Evaluation of Research BEBELL, DAMIAN
Spring 2021
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal

MESA746701
Evaluation Theory and Research GATES, EMILY F
Spring 2021
Evaluation as a professional practice and academic discipline is characterized by variation in perspectives on what evaluation is and how it should be practiced. This course introduces students to evaluation theory, key debates, and research on evaluation in order to develop students as critical, responsible evaluators and evaluation scholars. Evaluation theories are models, approaches, or frameworks that prescribe how and why one should conduct evaluation in a particular way. Debates in the evaluation field center on the following issues: role of evaluation in society, particularly around advancing equity, social justice, and human rights; the relationship between theory and practice; role of stakeholder and public interest values in evaluation and the theory and practice of valuing; what constitutes credible evidence and, particularly evidence of outcomes and impact; influence of politics on evaluation and evaluation on policy-making; what are and should be evaluators? professional competencies and responsibilities; and future of evaluation. Research on evaluation involves conceptual and empirical investigations of theories, methods, and practices in order to better understand and improve evaluation. By the end of the course, students will be familiar with evaluation theories, debates, and research on evaluation and, ideally, strengthen their perspective and sense of responsibility within the evaluation field.

MESA746801
Introductory Statistics BROWN, NATHANIEL
Spring 2021
An introduction to descriptive and inferential statistics. In particular, students will learn descriptive statistics, graphical and numerical representations of information; measures of location, dispersion, position, and dependence; the normal distribution; and exploratory data analysis. Also, students will be introduced to inferential statistics, point and interval estimation, tests of statistical hypotheses, sampling distribution of t, and inferences involving one or more populations, as well as ordinary least squares regression and chi-square analyses. Provides computer instruction on PC and Mac platforms and in the SPSS statistical package.

Large-Scale Assessment: Methods and Practice MULLIS, INA V
Spring 2021
Examines large scale assessment procedures internationally (TIMSS and PIRLS) and nationally (NAEP and NCLB). Considers technical, operational, and reporting procedures in view of requirements for reliability and validity as well as resource constraints and political issues. Uses examples from the TIMSS and PIRLS international assessments in mathematics, science, and reading to illustrate procedures for instrument development, sampling, data collection, analysis, IRT scaling, and reporting results.

MESA867001
Psychometrics II: Item Response Theory LI, ZHUSHAN
Spring 2021
This course presents an advanced study of theoretical concepts, statistical models, and practical applications in educational and psychological measurement. Topics include item response theory, two-parameter model, three-parameter model, methods for estimating latent trait and item parameters, models for polytomously scored items, differential Item Functioning (DIF), test equating, vertical scaling, computerized adaptive testing, standard setting, and multidimensional item response theory models. The IRT software or tools used in this course include R, IRTPRO, BILOG-MG, PARSCALE, NOHARM, DIF related software, STUIRT, ST., EQUATE, etc.

MESA886101
Multilevel Regression Models O'DWYER, LAURA
Spring 2021
This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

Teacher Education and Curriculum and Instruction Courses: Summer 2020

EDUC330801
Bilingualism in Schools and Communities ALVARADO, JASMINE N
Summer 2020
The goal of this course is to prepare students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the fields of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;JUN 29 - AUG 14; **Satisfies Core Requirement:** None

Language Learner in Global Perspective KIM, DEOKSOON
Summer 2020
This course provides an overview of language learning and the situation of second language learners in schools. First, we review processes of language learning and the challenges language learners face when they must simultaneously learn a language and learn subject matter in that language. We do this from a socialcultural perspective, exploring language learning as embedded in sociohistorically situated activities. We develop and account of how learning language is also learning culture. Second, we study how these processes vary across cultural contexts. Because language learning is woven into social and historical contexts, processes of language learning and schooling vary around the world. The course develops several case studies from different areas of the globe in order to illustrate how language learning and schooling can intersect in different ways.

EDUC630801
Curriculum Theories, Practice, and Design
JONES, RENATA L
Summer 2020
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of elective and equitable curricular organization. To do so, the class explores varied ways of

conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of elective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

Classroom Management CASS, RICHARD J
Summer 2020
Focuses on observation and description of learning behaviors, with emphasis on examining the relationship of teacher behavior and student motivation. Prepares teachers to analyze behavior in the context of a regular classroom setting that serves moderate special needs students and to select, organize, plan, and promote developmentally appropriate behavior management strategies that support positive learning. Also considers theoretical models of discipline and classroom management strategies, and requires students to propose and develop a rationale for selection of specific techniques for specific classroom behaviors.

In the Footsteps of Leaders BEAUMIER, CASEY
Summer 2020
This course considers the distinctive methods of Jesuit leadership by situating them in their historical and geographic context. The course begins with ten days of experiential learning in Spain and Rome where students immerse themselves in the key places that became the roots of the Society of Jesus using primary sources to critically examine the decisions and actions of the early Jesuits. The course continues at Boston College with lectures, discussions, and case-study analyses moderated by distinguished leaders of Jesuit apostolates. Students will consider contemporary topics such as the challenges and opportunities experienced by administrators and teachers at secondary and higher-education schools. Coursework features selected readings, workshops, and projects to be completed in small groups. Through this course, students will gain an understanding of the Jesuits' early vision of leadership and of the ways that vision has both changed and remained constant.

Assessment and Grading for Equity MOODY, RACHEL L
Summer 2020
This course is designed to introduce students to principles of assessment and grading, with a focus on grading practices that proactively try to mitigate issues of equity and implicit bias. The course emphasizes a combination of practice and theory. Students will practice different ways of grading the same assessment, design their own grading systems, and critically examine traditional and innovative grading philosophies. Important grading-related topics include: purposes of grading, "homework" as grading category, the influence of student behavior on grading practices, rubrics and grading scales, use of percentages in grading, and the infamous "zero."

Teaching, Curriculum, and Learning Environments: Global Perspectives None
Summer 2020
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

Family and Community Engagement
SCANLAN, MARTIN K
Summer 2020
The purpose of this course is to introduce participants to theories, practices, and empirical research regarding family and community engagement in schools. The focus is on how school leaders--formal and informal--enact organizational models, educational programs, and political strategies that increase authentic relationships with parents and community members. Topics of study will include community schools/full service schools, parent involvement models, involvement of diverse families, grassroots organizing for community development, afterschool and community-based education, and school board-community relations. Direct participation in inquiry into school-community activities conducted on-site in schools and neighborhoods will be requirement of the course.

Globalization, Mobility, and Education JEON, AHRUM
Summer 2020
This course address political economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes in schools, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course asks how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students' opportunities for learning through changes in policies, pedagogies, and curricula.

EDUC735501
Korean Culture and Education in Global Perspective KIM, DEOKSOON
Summer 2020
Korean society, politics, culture, and values are quite different now than they have been in the past. This course provides an overview of modern Korean history, Korean language, and Korean culture and values in the contemporary, interconnected global world. The course will explore Korean traditions such as Confucianism, Shamanism, and Buddhism, the modern education system in Korea, arts, science, and technology in modern Korea, as well as Korean popular culture. The course will take place at Seoul National University in Seoul, Korea, as a combined class with Korean students who are enrolled at Seoul National University. By engaging in various assignments such as a case study, discussions, field work, and digital storytelling, students will gain insights into Korean culture, history, values, pop culture, and current society, and they will also learn about these topics through lived experiences and trips in Korea.

EDUC740101
Supervision in Action COWNIE, CHARLES T
Summer 2020
This course is designed as an introduction to research-based clinical supervision models in teacher education. Hands-on application-in action includes observational strategies, collaborative assessment logs, and summative reports as resources for ongoing data collection. Course participants acquire and then apply the Massachusetts Department of Education Pre- service Performance Assessment rubric for coaching and evaluating student teachers, integrating the BC Teacher Education themes that emphasize teaching for equity and social justice. This course is restricted to cooperating teachers in BC Partnership Schools who are supervising a BC student teacher in a full-time practica and to new BC Clinical Faculty.

Theories of Instruction
FRIEDMAN, AUDREY A
Summer 2020
This provides an in-depth review of modern instructional models classified into selected families with regard to perception of knowledge, the learner, curriculum, instruction, and evaluation.
Each student will be asked to survey models in his/her own field(s) and to select, describe, and defend a personal theory in light of today's educational settings based upon personal experiences, reflection on current research, and contemporary issues central to the education of all learners.

Instruction of Students with Special Needs and Diverse Learners FRANCIS, HEATHER
Summer 2020
This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform.
Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

Teaching Writing CORBITT, ALEXANDER P
Summer 2020
In this course, developing and sustaining a writing curriculum for teachers in K-12 will be practiced and discussed, including a variety of pedagogical approaches to developing a sustained and enjoyable classroom writing culture. The primary emphasis will be on learning through doing--students will write in a variety of genres themselves (poetry, short fiction, memoir, reader response essay) with group discussion on process and implementation in their individual classrooms and based on their own students' needs. Grade is based on a portfolio of finished writing and a strategic plan for implementing writing protocols and ideas in the classroom.

EDUC754701
Teaching Narrative Writing to K-8 Students BRISK, MARIA E
Summer 2020
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Bilingualism, Second Language, and Literacy Development BECKER, MARIANA N
Summer 2020
Explores first and second language and literacy development of children raised bilingually as well as students acquiring a second language during pre-school, elementary, or secondary school years. Also addresses theories of first and second language acquisition, literacy development in the second language, and factors affecting second language and literacy learning. Participants will assess the development of one aspect of language or language skill of a bilingual individual and draw implications for instruction, parent involvement, and policy. This course is fully online. The course will have biweekly synchronous meetings. The course meeting time will be determined at the first session by consulting with all students. The first session will be on September 4 (Thursday) at 9:00 AM.

Academic Writing for Multiple Audiences WARGO, JON M
Summer 2020
The course will provide a foundation focus on the topic of scholarly writing while also supporting the development of the unique writing needs of participating students. Course readings will explicitly introduce students to text structures and language demands of different genres of scholarly writing in education and other related areas. Assignments will build on the writing that students are already doing in their doctoral programs. Foundational instruction sets the stage of individualized attention to the unique challenges and audience demands of each student's writing focus

Teacher Education and Curriculum and Instruction Courses: Fall 2020

EDUC103001
Child Growth and Development LASKI, ELIDA V
Fall 2020
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

EDUC105001
The Educational Conversation CASALINI, CRISTIANO
Fall 2020
What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

Teaching, Curriculum, and Learning Environments: Global Perspectives SHIRLEY, DENNIS L
Fall 2020
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

Learning and Curriculum in the Elementary School HOMZA, ANNE E
Fall 2020
Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunity to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.

Teaching Language Arts NGUYEN, MINH H
Fall 2020
Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to teaching methods that support development. In the fall semester, content and approaches related to teaching in English/Spanish bilingual programs will be included. Students will have the opportunity to apply their learning through practical lesson development, and implementation in connection to their pre-practicum placement. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they mediate theory and practice.

Teaching Reading HEAVEY, MARYKATE
Fall 2020
This course is designed to offer preservice teachers theoretical and practical knowledge and experience into teaching literacy to elementary age students. Emphasis will be placed on the social, political, and cultural context of reading instruction. Students will gain understanding of major theoretical perspectives on literacy development and the myriad strategies for teaching reading in a variety of contexts. Students will also be expected to spend time in a context where they can gain experiences in providing reading instruction in a relevant and productive way.

Teaching Mathematics and Technology MITCHELL, REBECCA
Fall 2020
This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as

inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

Teaching About the Natural World GONZALEZ, CASANDRA
Fall 2020
This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a "practice" that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

Educational Strategies: Children with Special Needs PARK, HAERIN
Fall 2020
This course provides instruction to pre-service teachers interested in learning more about instruction, curriculum, and teaching for children with special needs, with a framework highlighting important educational issues pertinent to their professional development and the realities of teaching. The course emphasizes the complexities of teaching children with individual learning profiles in inclusive settings. Students will examine educational readings and instructional practices through the lenses of curriculum, author voice, and academic tension.
Class participants will develop a comprehensive understanding of the historical, legal, and political developments influencing current general and special education practices.

Secondary Curriculum and Instruction DECELLES, DANIEL G
Fall 2020
Provides an introduction to secondary teaching practices as well as an overview of the history and structure of secondary schools. Topics include curriculum theory and development, interdisciplinary teaching, teaching students with diverse learning abilities, application of educational research, assessment, national standards, and alternative models for secondary schools. Focuses on the role of the teacher in secondary education reform. Taught on-site and in conjunction with secondary education teacher candidates' first prepracticum experience, this course offers a unique opportunity for a cohort experience in which preservice teachers work closely with each other, high school faculty, the instructor, and urban students.

Bilingualism in Schools and Communities PAEZ, MARIELA M
Fall 2020
The goal of this course is to prepare students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the fields of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education.

Reading and Special Needs Instruction for Secondary and Middle School Students DUNN, LORI A
Fall 2020
Develops knowledge of the reading process and how to "teach reading the content areas." Students will develop curriculum and instruction that integrates reading instruction in the content areas, addressing diverse learners. Involves understanding relationship among assessment, evaluation, and curriculum; learning what and how to teach based on student assessments; developing and providing scaffolded instruction that addresses reading comprehension and critical thinking; and integrating reading, writing, speaking, listening, and thinking into content curriculum. Also addresses how to help students comprehend non-printed text.

Inclusive Education Field Observation SCANLON, DAVID
Fall 2020
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six-courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

EDUC610001
Partnering with Diverse Families and Communities in Early Childhood PAEZ, MARIELA M
Fall 2020
This course is designed to help early childhood educators establish effective partnerships and reciprocal relationships with diverse families and communities. First, students will learn about models of family involvement and important family developmental processes in early childhood such as attachment, maternal responsiveness, and parenting styles. Second, we discuss important social, cultural, and linguistic characteristics which shape the life of families and children and are relevant for understanding diverse families. Third, we present strategies for supporting and working with diverse families through family, school, and community partnerships. At the end of this course, students will have developed an action plan for working with diverse families in early childhood settings including activities for: collecting and providing information, planning for family involvement in the classroom, establishing reciprocal relationships with families, and collaborating with communities.

EDUC630201
Secondary and Middle School English Methods DECELLES, DANIEL G
Fall 2020
Develops knowledge, skills, and dispositions essential for competent understanding, development, and delivery of effective English Language Arts instruction in a diverse classroom. Addresses educational and literary theory, pedagogy, assessment, evaluation, content, curriculum, media literacy, and sensitivity to and respect for adolescents who come from a variety of cultures, abilities, interests, and needs. Provides knowledge of local, state, and national standards and strategies to help students reach those standards. Encourages risk- taking, experimentation, flexibility, application of theory, and innovation. Good teaching demands open-mindedness, critical reading, writing, and thinking, honest reflection, high expectations, ongoing revision, and commitment to social justice.

EDUC632501
Innovative Pedagogy for English Language Learners KIM, DEOKSOON
Fall 2020
This course will enable you to understand and respond to the diverse linguistic, cultural, and educational needs of English learners in your K-12 content area classes. The course engages with questions of equity as preservice and in-service teachers and language learners prepare to serve culturally and linguistically diverse populations. The course will prepare you to teach emergent bilinguals (or English language learners) guided by the principles of comprehensibility, cultural awareness, and cultural sensitivity. The course will equip you with techniques and strategies for your specific classrooms. We will investigate theory and practice in cross-cultural communication, language acquisition, methods of language teaching, curriculum development, and language assessment. You will engage in activities and tasks, online and in the field, that will address practical and philosophical issues in fostering optimal environments for language and content learning for English learners. This course is fully online. The course will have biweekly synchronous meetings. The course meeting time will be determined at the first session by consulting with all students. The first session will be on September 3 (Wednesday) at 9:00 AM.

Teaching and Learning Strategies for Moderate Special Needs SCANLON, DAVID
Fall 2020
This course is intended to help prospective and experienced special education teachers and other educators a repertoire of skills for teaching students with mild/moderate (high incidence) educational disabilities. Participants will accomplish this goal by making connections among their knowledge of disabilities, special education policy and practices, assessments, education theory, and teaching methods. Students will learn how to develop, implement, and monitor individualized education programs, implement research-based effective intervention practices, and collaborate with others to meet the needs of special education students in inclusive and other educational settings. Successful students will have familiarity and competency with a variety of special education procedures and teaching approaches and specific practices. Appropriate for both elementary and secondary level education. Class sessions will routinely include time to practice skills being learned.

EDUC713101
Social Justice in Jesuit Contexts CASALINI, CRISTIANO
Fall 2020
The Social Apostolate of the Society of Jesus has developed in a variety of ways over the centuries according the diverse contexts where Jesuits have operated as agents of "social justice." This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a "preferential option for the poor"; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students' knowledge of current practices and stimulating dialogue.

A History of The Jesuits MEEHAN, SETH M
Fall 2020
introductory survey to this rich and varied past with particular attention, following the Jesuits' suppression in 1773, to various enterprises and enterprisers in the Americas. The course seeks to answer these questions: What have been the characteristics of the Society of Jesus and its associated works? And how and why have those characteristics remained the same or changed? Complementing the other courses in the Certificate program, the course traces the development, expansion, suppression, restoration, and recent developments of the Society of Jesus by closely examining the historical contributions of significant Jesuits.

EDUC723101
Accessible and Inclusive Design LAPINSKI, SCOTT D
Fall 2020
This survey course focuses on practical considerations regarding inclusive and accessible design. The focus is around guiding principles and key content that learners and designers can apply to their particular area of design. Particular focus is paid to understanding the functional barriers that individuals with disabilities might encounter, how these barriers can be addressed proactively, and why retrofitting designs can be costly and ineffective. After a general introduction to some of the guiding ideas behind inclusion and accessibility, both Universal Design for Learning (UDL) and accessibility are discussed to provide practical paths towards design that is ultimately more effective for all learners

EDUC730201
Models and Theories of Instructional Design JACKSON, RICHARD

Fall 2020
Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability. Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction.

EDUC730301
Curriculum Theories, Practice, and Design MORALES, MELITA M
Fall 2020
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

EDUC730801
Designing Learning Environments in a Social and Digital World KIM, MIN JUNG
Fall 2020
In today's society, what counts as knowledge and expertise has changed considering the global shifts in interconnectivity, social interactions, and technology. Previous models of learning focused on knowledge as a collection of facts within curriculum and learning environments helping individuals obtain those facts. However, today technology can enable all individuals to quickly obtain facts. Instead, expertise requires deep knowledge in which ideas are applied across multiple contexts in particular contexts with people and tools. These shifts in knowledge as well as technological advances have significant implications for how we design curriculum and other learning environments. In this course, we will examine different learning environments as well as various aspects within those environments. For example, we will examine curriculum to evaluate the scaffolds to support student learning, analyze digital learning environments for professional development to support teacher learning and critique video of classroom discourse to examine student interactions and community development. In this course, we will consider the environment both as conceptualized by its designers (the design) and as it is experienced by participants as learning interactions unfold in particular settings (the enactment) to evaluate the effectiveness of those learning environments.

Advanced Graduate Inquiry Seminar DAVIS, CHERYL J
Fall 2020
This course is designed for the Lynch School Fifth Year Program students who have successfully completed a licensure program at Boston College. It is designed to build on teacher candidates' experiences with inquiry as stance and expand their skills in conducting classroom-based research that leads to pupil achievement and teaching for social justice in their new license area. The hybrid course is online with one class meeting. A case-study approach is used to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from experiences with students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is EDUC7432 which is taken in conjunction with full-time student teaching (EDUC7420).

Instruction of Students with Special Needs and Diverse Learners FRANCIS, HEATHER
Fall 2020
This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform.
Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

Teaching Narrative Writing to K-8 Students MACDONALD, ELIZABETH A
Fall 2020
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Foundations of Bilingual Education ALVARADO, JASMINE N
Fall 2020
Students will be able to walk into any school that offers a bilingual program and/or serves bilingual pupils and identify the type of program in place depending on the specifics of different contexts. In service of this goal, students will explore the following characteristics of language education programs in the U.S specifically: history, models (and key attribute of program types), political contexts, and legal foundations. Students will understand dual language models, design, and implementation, specifically: competencies, knowledge, and skills of dual language teachers, features of instruction and assessment, and implementation.

Bilingualism, Second Language, and Literacy Development KIM, DEOKSOON
Fall 2020
Explores first and second language and literacy development of children raised bilingually as well as students acquiring a second language during pre-school, elementary, or secondary school years. Also addresses theories of first and second language acquisition, literacy development in the second language, and factors affecting second language and literacy learning. Participants will assess the development of one aspect of language or language skill of a bilingual individual and draw implications for instruction, parent involvement, and policy. This course is fully online. The course will have biweekly synchronous meetings. The course meeting time will be determined at the first session by consulting with all students. The first session will be on September 4 (Thursday) at 9:00 AM.

Participatory Action Research: Gender, Race, Power LYKES, M BRINTON
Fall 2020
This graduate seminar introduces students to theoretical and practical issues in the design and implementation of community- and school-based participatory and action research, including a review of theories and practices that have contributed to community-based knowledge construction and social change policies and processes. Ethnographic, narrative, oral history, and visual methodologies are additional resources for understanding and representing the individual and collective stories co-constructed through the research process. Students participate in a community-based collaborative undoing racism workshop and have opportunities for ongoing collaborative work on a site. We reflect collaboratively and contextually on multiple and complex constructions of "gender," "race," and social class in and through these research processes. OPEN TO ALL Ph.D. STUDENTS. MASTER'S LEVEL STUDENTS REQUIRE PERMISSION OF THE INSTRUCTOR.
Credits: 03
Room and Schedule: T 1 30-4 20;ONLINE;SYNCHRONOUS;

Research on Teaching COCHRAN-SMITH, MARILYN
Fall 2020
Introduce Ph.D. students to conceptual and empirical scholarship about teaching and teacher education as well as to contrasting paradigms and methodological approaches upon which this literature is based. Helps students become aware of major substantive areas in the field of research on teaching/teacher education, develop critical perspectives and questions on contrasting paradigms, and raise questions about implications of this research for curriculum and instruction, policy and practice, and teacher education/professional development.
Considers issues related to epistemology, methodology, and ethics.

Advanced Qualitative Research WARGO, JON M
Fall 2020
Building upon the foundation concepts of qualitative research and initial exploration of an introductory course in qualitative methodologies, this course explores the theoretical, methodological, and analytic implications of conducting qualitative research from differing theoretical perspectives. Key readings include texts on social theory, qualitative methodologies, and exemplar qualitative research from various social scientific fields. Students will distinguish between methodology and methods, analyze data, and produce either a report for a specified audience or a research manuscript for possible submission to an educational research journal.

Teacher Education and Curriculum and Instruction Courses: Spring 2021

EDUC103001
Child Growth and Development LASKI, ELIDA V
Spring 2021
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

EDUC105101
Reimagining School and Society HIGGINS, CHRISTOPHER R
Spring 2021
Schooling as we understand it dates to the early nineteenth century, born of and contributing to a period of rapid social change marked by the spread of literacy, the rise of the nation state, and the advent of industrialization. Schooling remains one of the most powerful educational tools ever invented, but how well does it equip us to confront the educational task of today? How will education, in and out of school, need to evolve in light of new technologies and media ecologies, global interconnectedness, health crises, mass migrations, surges of xenophobia, entrenched inequality, climate emergency, and the new "post-truth" political condition?

Computer Applications for Educators KINDER, T SCOTT
Spring 2021
The technology which is often available in contemporary classrooms affords opportunities for reaching more students in relevant ways. This course covers fundamental knowledge and skills needed by teachers who wish to use that technology and affords students opportunities to develop their expertise in mainstream and emerging educational technologies. This course includes presentations on hardware (e.g., computers, scanners, digital cameras, video cameras) and software (e.g., interactive, web, productivity) and discussion of how these integrate into classroom instruction. Substantial hands-on project time is provided.

Learning and Curriculum in the Elementary School HOMZA, ANNE E
Spring 2021
Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunity to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.

Teaching Language Arts MCELWAINE, MICHELLE L
Spring 2021

Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to teaching methods that support development. In the fall semester, content and approaches related to teaching in English/Spanish bilingual programs will be included. Students will have the opportunity to apply their learning through practical lesson development, and implementation in connection to their pre-practicum placement. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they mediate theory and practice.

Teaching Mathematics and Technology ALBERT, LILLIE
Spring 2021
This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

EDUC210901
Teaching About the Natural World LOWELL, BENJAMIN R
Spring 2021
This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a "practice" that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

EDUC225201
Language Learners in Global Perspective KIM, DEOKSOON
Spring 2021
This course provides an overview of language learning as a process, language learning in global contexts, and the experiences of second language learners in schools. We will hear from experts at BC and around the world, learning about current trends in and contexts for language learning. There are several central themes that will recur during this course, including: examining theories of learning, with a focus on language learning and language acquisition; the experiences of bilingual learners and bilingual education; language learning and technology in the twenty-first century, including issues of multimodal literacy and digital storytelling; and connections between language learning and identity formation. While interacting with and reading work by experts in the field, we will discuss both local and global settings, exploring how language learning affects heritage language revitalization, bilingualism, indigenous communities, and others. We will discuss how language learning is never a neutral process, but instead happens in social contexts and inevitably shapes identities. We will learn how to facilitate language learning in ways that promote justice, increase empathy, and meet the needs of diverse students. Throughout, we will take a global perspective and consider language learning from multiple points of view.

Bilingualism in Schools and Communities PAEZ, MARIELA M
Spring 2021
The goal of this course is to prepare students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the fields of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use

of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education.

Inclusive Education Field Observation SCANLON, DAVID
Spring 2021
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six-courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

Art and Music in Early Childhood Education
PAEZ, MARIELA M
Spring 2021
The main purpose of this course is to encourage early childhood educators to embrace the unique characteristics of young children's artistic and musical expression and appreciation of these experiences. By providing a foundational knowledge of young children's creative thinking and aesthetic development, the course will teach you how to apply effective pedagogical strategies in teaching art and music and how to integrate art and music across the early childhood curriculum. Students will learn how to bridge theory and practice through various readings, recorded lectures, and classroom examples. At the end of this course, you will be able to plan effective process-focused art and music lessons, use various materials and medium for artistic and musical expression, maximize the potential of your classroom resources, and use art and music to promote multiculturalism, diversity, and enhance family involvement.

Science Playing and Learning in the Early Childhood Classroom PAEZ, MARIELA M
Spring 2021
This course is designed to encourage and prepare early childhood educators for planning and implementing engaging and developmentally appropriate science learning experiences (Pre-K- 2nd grade). An overarching focus of the course is instilling in students an appreciation for the wonder of science and the world around them. The course is divided into three science content areas: Earth and Space Sciences, Life Sciences, and Physical Sciences. Students will learn how to connect their teaching with new science, technology, and engineering standards. Through interactive activities and discussions including the review of video, science lessons, and research in science education, we will explore key elements and challenges of science teaching and provide a foundation for supporting science learning in the early childhood classroom.

EDUC630701
Teachers and Educational Reform MCQUILLAN, PATRICK J
Spring 2021

Issues of school reform are constantly in the media--high-stakes testing, charter schools, the Common Core. At the heart of these reforms are teachers and the work they do with students in their classrooms. In this course, students look in-depth at the nature of teaching and learning in schools and classrooms. In particular, the course attends to issues and practices linked to current efforts at educational reform, approaching these matters through active inquiry and experiential enactment of such practices. Focused reflection is also a central component of this class.

Developmentally Appropriate Curriculum in Early Childhood Education CRISTELLO, KAREN M
Spring 2021
This course focuses on the development and implementation of curriculum in early education. The Massachusetts Guidelines for Preschool Learning Experiences and the national standards for developmentally appropriate practices will be utilized throughout the semester. This course will highlight each of the curriculum domains (language/literacy, mathematics, science and technology, social studies, health, and the arts) while demonstrating how to build an integrated curriculum in an early childhood classroom. The importance and value of play in the early years will be emphasized, and strategies will be shared to help teacher candidates document student learning.

Classroom Management CASS, RICHARD J
Spring 2021
Focuses on observation and description of learning behaviors, with emphasis on examining the relationship of teacher behavior and student motivation. Prepares teachers to analyze behavior in the context of a regular classroom setting that serves moderate special needs students and to select, organize, plan, and promote developmentally appropriate behavior management strategies that support positive learning. Also considers theoretical models of discipline and classroom management strategies, and requires students to propose and develop a rationale for selection of specific techniques for specific classroom behaviors.

Ed Implications/Sensory, Motor, and Health Impairments MILLER, THOMAS
Spring 2021
This course addresses the impact of physical disabilities on learning. Emphasis is placed on the educational needs of children with cerebral palsy, visual impairment, or hearing loss in combination with intellectual disability. Basic anatomy of the eye and ear are covered along with the common causes of vision and hearing loss. This course prepares teachers to perform functional vision and hearing evaluations and to translate those findings into appropriate classroom accommodations and adaptations. Many children with disabilities have unmet sensory integration needs that influence their behavior and subsequent readiness to learn.

Teaching and Learning Strategies for Moderate Special Needs DEPT
Spring 2021
This course is intended to help prospective and experienced special education teachers and other educators a repertoire of skills for teaching students with mild/moderate (high incidence) educational disabilities. Participants will accomplish this goal by making connections among their knowledge of disabilities, special education policy and practices, assessments, education theory, and teaching methods. Students will learn how to develop, implement, and monitor individualized education programs, implement research-based effective intervention practices, and collaborate with others to meet the needs of special education students in inclusive and other educational settings. Successful students will have familiarity and competency with a variety of special education procedures and teaching approaches and specific practices. Appropriate for both elementary and secondary level education. Class sessions will routinely include time to practice skills being learned.

EDUC713201
Discernment and Prayer in the Spiritual Exercises of St. Ignatius GEGER, BARTON T
Spring 2021
A study of the spiritual doctrine of St. Ignatius Loyola as articulated in the text of the Spiritual Exercises, but with reference to other texts such as Ignatius' Testament, letters, and the Constitutions of the Society of Jesus. The focus is how Ignatius' treatment of prayer, discernment of spirits, and discernment of God's will, work together to form a "contemplative in action."

Jesuit Pedagogy
CASALINI, CRISTIANO
Spring 2021
This three-credit, graduate-level online course examines the distinctiveness of the Jesuits' approaches to teaching and of their philosophy of education that have propelled their schools to unprecedented success over the centuries. One key to the unprecedented success of Jesuit education has been the tension between the recognizable mark of uniformity that long distinguished the methods, contents, and practices of Jesuit schools and their ability to adapt to different contexts and times. Both aspects-the uniformity and the adaptability-were explicitly supported by the "Ratio studiorum," the Jesuits' foundational plan of studies issued in 1599, which, despite the schools' many variations and complexities, has retained some influence over time. With the "Ratio" discarded, Jesuit schools had to clarify what made them distinctively Jesuit, reconciling their mission with the contemporary world. This three-credit, graduate-level class sketches the developments of Jesuit educational endeavors by focusing on both the permanent and changing traits of its distinctive pedagogy.

Accessible and Inclusive Design DEPT
Spring 2021
This survey course focuses on practical considerations regarding inclusive and accessible design. The focus is around guiding principles and key content that learners and designers can apply to their particular area of design. Particular focus is paid to understanding the functional barriers that individuals with disabilities might encounter, how these barriers can be addressed proactively, and why retrofitting designs can be costly and ineffective. After a general introduction to some of the guiding ideas behind inclusion and accessibility, both Universal Design for Learning (UDL) and accessibility are discussed to provide practical paths towards design that is ultimately more effective for all learners

Teaching, Curriculum, and Learning Environments: Global Perspectives SHIRLEY, DENNIS L
Spring 2021
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

EDUC730201
Models and Theories of Instructional Design JACKSON, RICHARD
Spring 2021
Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability. Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction.

EDUC730301
Curriculum Theories, Practice, and Design PETERS, WILLIAM D
Spring 2021
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

Globalization, Mobility, and Education AGOSTINELLI, ADAM V
Spring 2021
This course address political economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes in schools, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course asks how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students' opportunities for learning through changes in policies, pedagogies, and curricula.

EDUC730601
Language Learner in Global Perspective KIM, DEOKSOON
Spring 2021
This course provides an overview of language learning and the situation of second language learners in schools. First, we review processes of language learning and the challenges language learners face when they must simultaneously learn a language and learn subject matter in that language. We do this from a socialcultural perspective, exploring language learning as embedded in sociohistorically situated activities. We develop and account of how learning language is also learning culture. Second, we study how these processes vary across cultural contexts. Because language learning is woven into social and historical contexts, processes of language learning and schooling vary around the world. The course develops several case studies from different areas of the globe in order to illustrate how language learning and schooling can intersect in different ways.

EDUC730701
Perspectives on Disabilities and Special Education Practices SCANLON, DAVID
Spring 2021
In the modern world there are many differing perspectives about the significance of disabilities. In this course we examine both "medical model" perspectives on the origin and nature of disabilities, as rooted in the scientific method, and post-modern critical perspectives. Cultural influences on how those perspectives are valued will also be considered. Differing approaches to special education practice--both service delivery systems and interventions--will be critically compared to the thought traditions. The ethics and social value of special education will also be considered.

EDUC731101

Graduate Inquiry Seminar: One CUDA, JOSEPHINE
Spring 2021
The course will coincide with the pre-practicum experience. It is designed to introduce teacher candidates to inquiry as stance and the skills necessary to conduct classroom-based research that leads to pupil achievement and teaching for social justice. The course is designed to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from their students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is 432 which is taken in conjunction with full-time student teaching (EDUC7420). In the fall of 2020 this course will be fully online. Part is asynchronous and part synchronous. The synchronous part will be scheduled for 8:00-9:30 pm on the scheduled day of the course. Since this is a 1-credit course, there will be 5 synchronous sessions. The dates of the five synchronous sessions have not been set, but these sessions will occur over the course of the semester (i.e., not five weeks in a row)

EDUC746101
Human Rights Interdisciplinary Seminar LYKES, M BRINTON
Spring 2021
The study of human rights defies disciplinary boundaries. This seminar, sponsored by the Center for Human Rights and International Justice, provides a rare space to examine human rights from an interdisciplinary perspective. It brings together faculty affiliated with the Center, students from across the university, visiting scholars, and guest speakers to examine issues of human rights and international justice. The spring 2021 seminar will begin with an overview and brief historical review of human rights as understood in the West and then explore a series of complexities for those seeking to engage in human rights scholarship, advocacy, and activism.
We seek to engage critically with human rights discourse and actions as they intersect with gender, culture/ethnicity, "race," social class, and other categorizations as well as with emergent challenges from Indigenous people of the global South beyond Northern epistemologies, understandings, and praxis.

Spring 2021
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Bilingual Literacy and Literature ALVARADO, JASMINE N
Spring 2021
This course is designed to provide pre- and in-service practitioners exposure to contemporary issues, perspectives, and approaches for literacy instruction in bilingual education settings.
These bilingual education settings include transitional and dual language bilingual education programs, and we will explore literacy instruction as it pertains within and across these different program models. At its core, the course is designed to model the types of instructional approaches it espouses. The course will be delivered bilingually, in Spanish and English. As such, the language of instruction of the course, as well as expectations for participation, are fluid and variable. The course targets a range of literacy related topics (see topics grid below) all designed to orient the bilingual educator toward bilingual literacy instruction in contemporary bilingual education contexts.

Bilingualism, Second Language, and Literacy Development ZORAN
Spring 2021
Explores first and second language and literacy development of children raised bilingually as well as students acquiring a second language during pre-school, elementary, or secondary school years. Also addresses theories of first and second language acquisition, literacy development in the second language, and factors affecting second language and literacy learning. Participants will assess the development of one aspect of language or language skill of a bilingual individual and draw implications for instruction, parent involvement, and policy. This course is fully online. The course will have biweekly synchronous meetings. The course meeting time will be determined at the first session by consulting with all students. The first session will be on September 4 (Thursday) at 9:00 AM.

EDUC920101
Discourse Analysis
BOTTEMA-BEUTEL, KRISTEN M
Spring 2021
Discourse analysis (DA) is a broad field of research which incorporates theory and method from linguistics, anthropology, and sociology, among other disciplines. The common thread across these areas of scholarship is a commitment to studying language in action; to understanding what people do and mean with language, how people interact with language, and what people come to expect with language. Close analysis of language in context can illuminate the processes through which social constructs such as identity, power, and social selves are built.
This course will cover the theoretical foundations of DA, in tandem with the methodological implications of each theory. Topics will include Speech Act theory, sequence organization and Conversation Analysis, Narrative Analysis, Classroom Discourse and Critical Discourse Analysis. The course will place an especial focus on the contributions of discourse analytic approaches to understanding educational contexts. Students will be asked to collect, transcribe, analyze, and present their own data over the course of the semester.

Historical and Political Contexts of Curriculum OLIVEIRA, GABRIELLE; HIGGINS, CHRISTOPHER R
Spring 2021
Introduces Ph.D. students in Curriculum and Instruction to the major curriculum movements in American educational history by examining the history and implementation of curriculum development on the macro and micro levels of schooling. Focuses on key campaigns and controversies in curriculum theory and practice, using primary source materials to place them within the academic, political, economic, and social contexts that have marked their conceptualization, and change inside and outside of schools.

EDUC972901
Controversies in Curriculum and Instruction COCHRAN-SMITH, MARILYN
Spring 2021
Explores contemporary curriculum controversies in American education as well as the ways these are shaped by differing conceptions of teaching, learning, and the purposes of schooling and by the larger social, historical, political, and cultural contexts in which schooling occurs. The course assumes a broad and encompassing definition of curriculum and the aspects of instruction, assessment, and teacher preparation that have major implications for curriculum. Although the focus of the course is on curricular controversies in K-12 education, controversies related to the curriculum of early childhood education, adult learning, and higher education are also relevant.

Morrissey College of Arts and Sciences

African and African Diaspora Studies Courses: Summer 2020

AADS447101
Paris Noir: From La Negritude to Le Hip-Hop JEAN-CHARLES, REGINE M
Summer 2020
Afropeen... Negropolitain... France-antilles... Senegaulois... Franco-africain... Black Frenchmen... The numerous ways of referring to people of African descent in France

reflects the complexity of how racial identity is approached, considered and imagined. Indeed, since the Negritude movement of the 1930s people from Africa and the diaspora have been making their mark in Paris. This course explores the idea of Black Paris in various forms of cultural expression including poetry, literature, film, drama, autobiography and music. We will examine how race, national identity, and immigration are important issues addressed by not only writers and filmmakers, but also by hip hop artists, comedians and soccer players.
Credits: 03
Room and Schedule: None
Satisfies Core Requirement: Cultural Diversity
Prerequisites: None
Corequisites: None
Cross-listed with: FREN3378
Frequency: Periodically
Student Level: UNDERGRAD ELECT
Comments: As a part of the summer class students will also go on field trips to museums, a hip hop performance, restaurants, walking tours of Paris, and a weekend away to Bordeaux which was one of the ports in the trans-Atlantic slave trade.
Status: CANCELLED

African and African Diaspora Studies Courses: Fall 2020

AADS110401
African-American History I MILLER, KAREN
Fall 2020
This two-semester survey examines the history and culture of African-Americans from the pre- colonial period to the present. The first semester treats the period before the middle passage, the evolution of slave and free society, the development of Black institutions, and the emergence of protest movements through the Civil War's end. During the second semester, the emphases are placed on issues of freedom and equality from Reconstruction, urban migration, and civil rights struggles through current consideration of race, class, and gender conflicts.

AADS111001
Introduction to African Diaspora Studies SUMMERS, MARTIN A
Fall 2020
A survey of the African continent and the Diaspora that would include geography, history, politics, economics and literature. The purpose of the course is to introduce students to specific historical, cultural, social and political topics related to Africa and the African Diaspora. Because the scope of the course is so vast, we will explore important issues and themes to give students a desire to further pursue more specific classes in African and African Diaspora Studies. Boston College faculty members will be invited to lecture in their area of expertise specific to Africa and the Diaspora throughout the semester.

When Gods Begin Again: Intro to African and African Diaspora Religions MCELWAINE, MICHELLE L
Fall 2020
This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yoruba and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santeria, Brazilian Candomble, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyotunji Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of Africana religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of these traditions.

From #BlackLivesMatter to #MeToo: Violence and Representation in the African Diaspora JEAN-CHARLES, REGINE M; MCGUFFEY, CLIFTON S
Fall 2020
This course explores pressing problems of modern race and gender-based sexual violence in the U.S. and throughout the African Diaspora. Utilizing interdisciplinary perspectives in both the humanities and social sciences, we will examine the roots of sexual violence, the ways in which it has been expressed, the meanings attached to it, and its implications for society from an intersectional perspective. Students will: (1) examine the wide-ranging ramifications of racism on rape culture; (2) formulate solutions for intervening in and eradicating rape culture; and (3) summon their imaginations to envision a world without sexual violence.

AADS220001
The Underground Press ARDS, ANGELA
Fall 2020
The underground press was a vast network of loosely affiliated newspapers that emerged in the 1950s and 60s when young people asked very hard questions about the meaning of power and the role of the press. The outsider outlets spread through hundreds of communities throughout the nation, ranging from big city weeklies like "The Village Voice" and the Berkeley "Barb" to specialized periodicals representing the Black press, as well as other ethnic newspapers, progressive weeklies, and various conservative perspectives. This course examines the factors that helped pave the way for this journalism of dissent and how this history affects alternative media today.

Spirits, Race, and Culture VATS, ANJALI S
Fall 2020
In the early 2000s, the resurgence of Prohibition Era cocktail culture led to renewed interest in hard liquor. As speakeasy style cocktail bars popped up all over the country, the demand for spirits rose. This course examines the racial implications of America's drinking cultures, specifically the complex relationships between race, colonialism, capitalism, and liquor consumption. Using examples such as the construction of cocktail bars, the production of rum, the development of tiki culture, and the disenfranchisement of sugar cane farmers, we will think about the identity implications of drinking.

AADS230001
The Walking Dead ADKINS, AMEY
Fall 2020
What happens when we die? Historically, the conditions of death in America have never been equal or just for all, but do visions of an afterlife resolve the inequities of lived experience? With Orlando Patterson's pronouncement of the black slave and social death in mind, this course examines the way a theological vision of "the damned" informs everything from racialized injustice and incarceration, to sovereignty and Zombie anxiety in the American conscience.
Bringing together philosophy, theology, and critical race theory, we will consider how constructions of death, memory, eternity, and the Other speak to the ethics of a life "well-lived."

Blackness, Performance, and Freedom CURSEEN, ALLISON S
Fall 2020
From Henry Box Brown's cargo dramatics to Ellen Craft's incredible performance as a feeble white male traveling with his black servant to Brer Rabbit's feigned fear of the briar patch, artifice, and performance repeatedly serve as the necessary means, if not the conditions of possibility for, fugitive departure and black life. This course asks how masks, masquerades, con- acts, and acting enable resistance and escape. We will explore how the radical work of historical black performances continue in contemporary black performances like Danny Glover's Childish Gambino; Beyonce's Sasha Fierce; Ru Paul's Drag Race; and the increasingly popular interest in black speculative and afro futurism (i.e., Random Acts of Flyness and Get Out).

We Wear the Mask DANIELS, KYRAH M
Spring 2021
In acts of mourning and in times of celebration, in solemn rites of passage and in elaborate performance, we decorate our faces and adorn our bodies. This course introduces students to the diversity of African and African Diaspora ritual arts traditions. We take a comparative approach to study traditions of masquerade in initiation ceremonies, street festivals, carnivals, and funerary rites of the Black Atlantic. Employing a material culture approach, we explore particularly "festive" sites such as the sacred city of Ile-Ife, Nigeria, which hosts festivals nearly 360 days of the year, a Caribbean carnival-capital in Jacmel, Haiti, and New Orleans traditions of Mardi Gras Indians and jazz funerals. Students will gain concrete skills in visual art analysis, research, and writing, becoming versed in the fields of art history, religion, anthropology, and museum studies. By the end of this course, students will gain familiarity with various definitions of parade, masquerade, funeral, and carnival, and analyze the role of masks and art implements in private ritual ceremony as well as public festival. In this way, students will develop a deeper understanding of the intricate relationship between sacred arts and religious ceremony.
